

CRUZTOOLS

2015 CATALOG
Tools for Motorcyclists, Musicians, and Pilots

WE BUILD CUSTOMERS ONE KIT AT A TIME

We're driven by passion. Passion for motorcycles, music, and aviation. Passion to provide the best possible products that you can depend on anywhere, anytime. A passion for highly satisfied customers. Those were our founding principles, and they remain intact nearly twenty years later. Put us to the test, and join the legion of customers who place their trust in CruzTOOLS.

Pilot's Tool Kit

The fleet of general aviation aircraft is aging. Mandated maintenance promotes reliability, but experienced pilots know mechanical issues can still arise, sometimes far from an open FBO. Our Pilot's Tool Kit provides the most common tools and other contents to help get you airborne, including a set of combination wrenches, 8" adjustable wrench, tire pressure gauge, locking pliers, 6-in-1 screwdriver, hex wrenches, and diagonal cutters. A special aviation spark plug socket (also sold separately) handles most spark plug makes, and a way-cool mini-ratchet and socket set provide additional utility. Finally, a telescopic mirror, cable ties, and 30 feet of 0.032" aviation-grade safety wire are included. Everything is nicely organized into a tough roll-up pouch. While designed to carry on the plane, this may well become your go-to kit for the hangar or ramp. **PTK1**

NEW!!

NEW!!

Aviation Spark Plug Socket

Aviation spark plugs have special needs. They use a non-standard 7/8" hex, and exhaust manifolds can get in the way of wrench access. A thin-wall socket is necessary for many applications. And to ensure compatibility with all makes of plugs including Champion® and Tempest®, a deep well is called for. Our socket meets all these needs, with a combo hex and 3/8" drive for additional flexibility. Pro-quality. **ASPS78**

Stagehand™ Guitar/Bass Tech Kit

The Stagehand kit puts considerable capability into a small package, and at a modest price! Central to the concept is a 19-piece magnetic bit set and screwdriver-style bit holder, with both inch and metric hex wrenches, screwdrivers, and sockets to handle virtually any make and model of guitar or bass. A capo and 15-blade thickness gauge with integrated ruler permit accurate neck measurement, and also included are downsized string cutters and a string winder. It's ready to hit the road. **GTSH1**

GrooveTech® Guitar Tech Kit

A good setup will improve your performance! The GrooveTech provides everything you need to work on your guitar, plus an Easy Setup Guide that takes the mystery out of the process. Eleven hex keys are color-coded gold for metric and black for inch sizes, and long pattern for easy access. All truss rod sizes are ball end. Also included is a thickness gauge, ruler, capo, cutters, string winder, and 6-in-1 screwdriver. Tools are lifetime guaranteed and pro-grade. **GTGTR1**

GrooveTech® Bass Tech Kit

Not wanting to leave bass players out, we developed an alternate kit optimized for low-enders. The hex key set is matched to virtually all bass makes, and the string winder has been removed to save a couple of bucks. Tools are top-shelf and stored in a pouch that will fit into many gig bags. An Easy Setup Guide will make you comfortable with truss rod, action, and other adjustments. After a few setups, you'll immediately know when a minor tweak is called for. **GTBAS1**

GrooveTech® Multi-Tool

The first multi-tool for guitars and basses that's ultra functional, without unnecessary gimmicks. Whether you have a USA-made or imported axe, we've got you covered for most bridge, truss rod, and other adjustments. Includes four metric and three fractional hex wrenches, two Phillips screwdrivers, a 2.5mm slotted screwdriver, and ruler for setting action. Truss rod sizes are ball-end for easy access. All components are top quality and sport a polished chrome finish. **GTMLT1**

Jack/Pot Wrench

Instrument and amp jacks are notorious for coming loose. And with a shallow nut and recessed cavity, access can be challenging. Until now, that is. The GrooveTech Jack and Pot Wrench provides three thin-wall sockets in a compact four-inch tool to handle the most common sizes of jacks *and* pots on instruments, amps, and other audio gear. Add a dab of threadlocker, and you'll probably never have to deal with that loose jack again. Sockets are pro-grade with a dazzling polished chrome finish. **GTJPT1**

String Cutters

Guitar and bass strings are made of hardened stainless steel or nickel with thicknesses up to 3mm. Ordinary diagonal cutters are designed for soft copper, and thus fail miserably when used on strings. GrooveTech String Cutters were developed specifically for this application, using a proprietary heat-treatment process. Despite its compact six-inch length, even "B" bass strings cut easily and dented blades will be a thing of the past. Vinyl grips feel great in your hands. **GTSC1**

Vintage Truss Rod Drivers

Vintage-style truss rod nuts have unconventional slots which are easily damaged. Traditional adjustment involves removal of the neck, and our Standard Driver provides firm contact for damage-free adjustment. The Cheater Driver™ allows quick minor adjustment without removing the neck. Both have oversized handles with extra-long shafts for a sure grip and easy access. **GTTRS1** (Standard), **GTTRC2** (Cheater)

Sound Hole Truss Rod Drivers

Acoustic guitar truss rods need adjustment like electrics, but manufacturers sure don't make it easy. Access is through the sound hole, and the nut may be one or two braces away. Our new Sound Hole Drivers allow access to nuts on most makes and models of acoustics, with a precision ball-end tip for easy fit, extra length on both segments of the blade, and an oversized handle for confidence when making adjustments.

GTAW4 (4mm), **GTAW5** (5mm)

GrooveTech® Drum Multi-Tool

Drums take a beating. Literally. The GrooveTech Drum Multi-Tool for virtually all makes and models of drums starts with a drum key made to the same high standards as our T-Handle Drum Key. We then added 5mm slotted and #1 and #2 Phillips screwdrivers. But where this tool really adds value is its collection of both inch and metric hex wrench sizes to handle pedals and other hardware. All tools are forged to precision tolerances using a heat-treated S2 alloy, and sport a polished chrome finish for a little extra bling on the bandstand. **GTDMT1**

GrooveTech® T-Handle Drum Key

The GrooveTech puts a new spin on drum keys with a unique sliding "T" handle that allows quick and easy changing of drum heads without power tools. The handle can be slid from one end to the other for extra leverage – especially useful for high-tension drum corps tuning. Fit and finish is top-drawer, using heat-treated chrome vanadium alloy with a polished chrome finish. The detachable 1/4" drive socket is made to precise tolerances. **GTDKY1**
1/4" drive socket only: **SCTDKY**

RoadTech™ H3

We've combined the road-proven EconoKIT® H1 with the best of our MiniSet™ for this super-charged roadside solution. Like the H1, it includes our top-grade combination wrenches, an adjustable wrench, locking pliers, tire gauge, hex and star keys, screwdriver and more. But you'll also love the mini ratchet and socket set, making this the last tool kit you'll ever need to buy. **RTH3**

RoadTech™ Teardrop

Our RoadTech tool kit series combines road-proven EconoKIT content with a nifty mini ratchet and socket set. Softail® riders can also get in on the action with the RoadTech Teardrop which packs virtually everything from the RoadTech H3 into a compact pouch designed to fit genuine and aftermarket teardrop tool boxes. While the pouch is designed for teardrop tool boxes, the tool set is equally applicable to all air-cooled models. **RTTD1**

EconoKIT® H1

If you're on a tight budget but still want a complete tool kit, consider the H1. Five combination wrenches cover most fasteners, and an eight-inch adjustable wrench handles the rest, including most axle nuts. Locking pliers, tire gauge, hex and star keys, and much more will help get you back on the road in no time. The double-panel 600-denier polyester pouch is designed to last. **EKH1**

EconoKIT® H2

Don't let the H2's diminutive stature scare you off, because considerable capability is packed into a compact package, and at a budget price too. The most common fasteners are covered with five combination wrenches, plus a stout 6-in-1 screwdriver, tire gauge, hex and star keys, 2-in-1 spark plug socket, and more. The rugged pouch, with self-healing zippers, won't let you down. **EKH2**

SPEEDKIT™ for H-D

Our new SPEEDKIT tool kit series provides a new standard for capability and compactness. The SKHD was developed to cover the most common needs for all Harley-Davidson models except the V-Rod, with wrenches, nut drivers, star bits, hex keys, screwdriver, pliers, 2-in-1 spark plug socket, and tire pressure gauge. Everything fits into a rugged pouch that measures only 7" x 2" x 2" (175 x 50 x 50mm), with dependability you've come to expect from CruzTOOLS. **SKHD**

Outback'r™ H13

The Outback'r H13 is a powerhouse of functionality. Included are three hex keys (5/32", 3/16", 1/4"), two star keys (T25, T27), slotted and Phillips screwdrivers, a socket driver with 3/8", 7/16", and 1/2" sockets, 10mm box and 9/16" open-end wrenches, plus a spoke wrench. At only 10 ounces and 3.5" long, even chopper riders won't have trouble carrying it. **OH13**

RoadTech™ B1 for BMW® Motorcycles

BMW motorcycles are legendary for innovation, and their choice of fasteners are no exception. Female star fasteners are commonplace, and some models even use rare male star screws. Add special wrench and hex key needs, and it becomes clear that a unique tool kit is called for. We've exceeded these needs with the new RoadTech B1 for BMWs, which packs top grade tools and other roadside items into a sturdy roll-up pouch. **RTB1** Special T50 wrench for single-sided swingarm when removal: **T50BM** (see page 13)

RoadTech™ M3

Ride a metric cruiser? Then check out the RoadTech M3. It's essentially an EconoKIT M1 and MiniSet MSM1 combined into a handy roll-up pouch. While the M3 is perfect for cruisers, it's equally at home on tourers, sport bikes, standards, and quads. Put this in your fork bag, tank bag, or saddlebag and you'll be ready for just about anything the road will throw at you. **RTM3**

NEW!!
Camo Shell!

DMX™ Fanny Pack Tool Kit

We did our homework and put together the ultimate off-road tool kit. Complementing the long list of tools and other items is a stout and functional pouch using a super-tough nylon shell, top grade hardware and zippers, plenty of storage – including a unique mesh cash and document pocket – and key clip. With the DMX, you're ready to roll! **DMX1**

NEW!!
Camo Shell!

DMX™ Fender Mount Tool Kit

Everyone loves our DMX1 Fanny Pack Tool Kit. Well, almost everyone, because some riders just don't want to wear a fanny pack. We heard you loud and clear, and put together the ultimate fender-mounted tool kit. It's essentially the same contents as the DMX1, except we substituted our personal favorite Mini T-driver and socket set for the PackWrench. Includes fender mounting pad and rain fly. **DMX2**
Spare mounting pad: **PADDMX2**

EKM2

EKM1

EconoKIT® M1 and M2

Seasoned riders know from experience the importance of carrying a tool kit. OEM tool kits don't provide effective roadside or trailside relief, and cobbling together tools from the garage probably won't cut it. Our metric EconoKITS provide the items you'll need in the middle of nowhere, with quality you can depend on. Both include our exclusive combination wrenches, plus a host of other essentials. The M2 is a baseline solution, while the M1 adds additional content.

Outback'r™ M14

Function, space, and value converge in this nifty unit! You'll get 14 tools – four hex keys (3, 4, 5, and 6mm), two screwdrivers, a socket driver with 8, 10, and 12mm sockets, 13 and 14mm open-end wrenches, and three spoke wrenches – all in a nine ounce unit that's only 3.5" long. Except for the sockets, there's no loose pieces to put together for operation. **OM14**

SPEEDKIT™ DMX

Offroad vehicles suffer the most abuse, which makes a good case for carrying quality tools. The new SPEEDKIT DMX provides the essence of its bigger DMX siblings, but condensed to the format of our SPEEDKIT series. Contents have been fine-tuned to the primary needs of offroad vehicles, and perfectly complemented by a camo-pattern pouch for that woody look. The result is an extremely compact and affordable tool kit that meets the CruzTOOLS standard of absolute dependability. **SKDMX**

SPEEDKIT™ JAS

Who said tool kits needed to be bulky? Our new SPEEDKIT provides unprecedented capability in an ultra-compact 7" x 2" x 2" pouch. They'll fit into most OEM tool cavities, but with more content and technician-grade tools. Included are wrenches, hex keys, a 5/8" x 18mm spark plug socket, pliers, tire gauge, and more - all housed in a sturdy zip-up pouch. The SKJAS is applicable to all Japanese motorcycles, ATVs, snowmobiles, and personal watercraft. **SKJAS**

SPEEDKIT™ EU

European motorcycles, despite their typically taller price tags, have not been spared of "cheap tool kit" syndrome. Not to worry - there's a SPEEDKIT for you. The SKEU packs the same muscle as the SKJAS, but with a slightly different wrench set to match European metric size standards. It will fit into most OEM tool cavities and provides dependable quality and surprising capability. **SKEU**

T-Driver and Socket Set

Our sliding T-handle combo features a 3/8" drive tip and set of eight sockets that should take care of just about any operation. Includes: 8, 10, 12, 14, and 17mm sockets; 5 and 6mm hex bits; and a #2 Phillips screwdriver bit, all on a socket clip that attaches to the driver. Since the driver has a standard 3/8" drive tip, it opens up your entire tool box to T-handle usage. The T-driver is about 12" long, and the set includes a rugged vinyl pouch. **TSDS38**

1/4" T-Driver

T-handles are extremely useful for all sorts of applications. And they're even more functional if your existing sockets can be used. Here's a favorite member of our family, which has a standard 1/4" drive tip. At about 7", it's easily carried on your bike and likely to become a staple in your tool box as well. The mini driver has our unique sliding "T" feature and a polished chrome finish. **MTD14**

PackWrench™ 3-Way Wrench

Many metric vehicles can almost be stripped and rebuilt with only three sizes: 8, 10, and 12mm. The PackWrench provides these three socket sizes in a T-style wrench that's small enough (about 5.5" long) to fit into a fanny pack, tankbag, or under your seat. It's so handy that it'll become one of your most-used tools in the garage, too. **PW1**

TirePro™ Dial Gauge

Check out the tool box of your local mechanic and you're likely to see a dial-type tire gauge because they're very accurate and easy to read. The TirePro gauge has a 12" flexible hose that makes even hard-to-access valves less of a task. Readings are held until released, and a built-in valve lets you "bleed" down to the desired pressure. Readings are in psi and kPa, and the dial is protected by a rubber boot. **DTPG1**

TirePro™ Digital Gauge

The TirePro Digital Tire Gauge is ideal for motorcycle and ATV use, with a large display and accuracy over a wide range of pressure levels. Readings are shown to 0.1 psi levels, with bar, Kpa, and Kg-cm² scales also provided. An ergonomic shape fits nicely in your hand. This may well become your favorite tire gauge! **DGTG2**

TirePro™ Tire Lever Set

Changing tires is about as much fun as painting your house, but having the right tools can make the job easier. Our tire levers are forged and heat treated, using carbon steel alloy. They'll flex, not bend, giving you confidence. At 240mm (9"), they're long enough for necessary leverage, but small enough to fit into most fanny packs, saddlebags, or tank bags. **TLS1**

The Pouch™ Roll-Up Pouch

A very rugged roll-up pouch constructed of industrial-grade nylon, with eighteen pockets of varying width at two heights to accommodate a wide range of contents. Two lower pockets have a mesh cover to hold small or loose items in place. A strip of reflective material is sewn into the back in case you're stuck on the road at night. About 9.5" high by 16" wide when open.

TPOUCH1

Combo Axle Wrenches

Off-road motorcycle axles range from 17mm to 32mm. Ordinary wrenches are simply too large and heavy to carry with you, so we developed updated combo wrenches to handle most make and model combinations. One has 22mm and 27mm, while the other combines 22mm and 32mm. Both include 14mm for many OEM spark plug sockets. Wrenches are high strength and sport a polished chrome finish to give your fanny pack a little bling.

3/8" Drive Socket Bit Sets

Hex and star fasteners are very common on Powersports vehicles. They're vulnerable to damage from tools with loose tolerances and/or inferior materials. Our three sets are professional quality, with polished chrome socket bodies and bits made of a heat-treated chrome vanadium alloy. All sockets are 3/8" drive so you only need one ratchet or T-handle size. A reverse laser imprint provides for easy size identification, and all sets include a handy storage rail.

MaxHook™ Spring Hook

Springs can be a testy bunch to handle. You may need to push, pull, twist, or otherwise contort to get it on or off the bike. Our second-generation spring hook is up to any task you put it to. The tip is precision cut using heat-treated carbon steel, while the PVC-coated T-handle allows you to put as much muscle into the job as needed. **SH2**

Stainless Shock Spanner

Proper adjustment of shock “sag” can have a substantial impact on handling and comfort, yet few riders ever make the adjustment. It’s quite simple and quick, but you’ll need a shock spanner to set preload. Our spanner is made of tough stainless iron, and is compact enough to fit inside your tool kit. It’s designed to fit most major makes of shock absorbers.

SPAN1

9-LED Flashlight

You’ll probably love this flashlight. Nine LEDs provide extremely bright illumination, with a much more natural hue than incandescent bulbs. LEDs are also very miserly on power - one set of batteries can provide days of continuous use. A unique cannister holds three AAA batteries (included), yet allows a very short length. **FL9L**

T50 Rear Wheel Star Wrench

BMW single-sided swingarms use an array of T50 star bolts to fasten the rear wheel. Access may be difficult due to a recessed wheel, obstructing mufflers, and saddlebags. Our T50 Star Wrench is designed specifically for this high-torque application in a compact 190 x 100mm profile that will easily fit into a tank bag. Star tips are provided on both ends for maximum flexibility. The wrench is compliant with professional standards and has a corrosion-resistant satin finish. **T50BM**

Media Quotes

"Whether you do your own setups or the occasional string change, this is one indispensable kit...What especially impressed me was the quality of the tools." – *M Music*

"You'd be hard pressed to find a comparable OEM or after-market toolkit for even twice the price." – *SPEEDKIT review in Thunder Press*

"...this has to be the deal of the decade. We use it, we rely on it and don't leave the office without it." – *DMX1 review in Dirt Bike*

"If you've ever been dismayed by the damage that cutting strings can inflict on ordinary diagonal cutters, you need to get CruzTOOLS' GrooveTech Cutters" – *Guitar Player*

"If I've yammered on, it's because the difference between the ordinary tool kit and this one merits it...It blows the competition into the weeds. Buy one." – *Motorcycle Times*

"Your tool box isn't complete without a set of T-handles...and it's even less complete if they aren't Cruz T-handles." – *PowerDrive T-Handle review in Motocross Action*

"The GrooveTech Jack and Pot Wrench...providing an inexpensive and invaluable tool that should find a home in every guitarist's case...your guitar toolbox, or at least your roadies!" – *Performer Magazine*

"Barely larger than the palm of your hand, this tool *should* be in your traveling kit. Heck, at \$14.95, buy two and keep one in the shop." – *PackWrench review in Motorcyclist*

"A great kit with many high-quality tools for the money...I don't leave home without my H3 kit." – *Hot Bike*

"CruzTOOLS may be able to put your toolkit on a diet with its Combo Axle Wrenches...tough enough to easily withstand my 215-pound weight...yet they're light and flat enough not to be a boat anchor in my fanny pack." – *Cycle World*

"Maybe it's time to lighten your load with the new GrooveTech Drum Multi-Tool..." – *DRUM!*

"I decided that it was high time for a new tool kit. Since my chosen mount was a BMW, I chose CruzTOOLS' RoadTech B1 kit...I'd say it was pretty cheap insurance." – *Motorcycle Consumer News*

"What do I think of the DMX Fanny Pack, you're wondering? Well, I hope CruzTOOLS isn't planning for me to send it back." – *Cycle World*

"And, like all the CruzTOOLS I've used, the quality and finish of these tools is world class...If you want the very best, you ought to check out the CruzTOOLS line." – *Review in American Iron*

"Pretty much everything you need to get through a gig, a recording session, a string change, or a setup" – *GrooveTech Tech Kit in Guitar Player*

"Would you leave on a long ride without your boots? Well why would you leave without a roadside tool kit?" – *EconoKIT H2 in Iron Works*

"Here's a tool that'll ease your burden and impress your tool-nut riding pals." – *Outback'r review in Motorcyclist*

"CruzTOOLS emulated the basic concept of the OE kits but executed it much better, using higher-quality tools and even adding several that those factory kits never contained" – *Cycle World*
