Stretched Saddlebag Bottom Set

- Includes right and left side with black unfinished surface.
- This saddlebag set is a perfect fit with all mounting holes that match stock locations, may re-use stock hardware for a true bolt-on experience. All mount holes are pre-drilled in stock location and pre-fit for the ease of installation.
- The bottoms are 2” deeper in the front than stock and 3” deeper in the rear, which gives these the stretched look.
- Designed for models with dual exhaust.
- Complete hinge, latch, and hardware kit is available separately for Road King riders looking to keep stock bags complete or for converting from leather covered bags. Order lids separately.

51-0403

The typical airflow pattern of the wake from most windscreens is called a van Karman vortex. At speeds of 50-90 mph, the air swirls off the windscreen in an approximate 90-degree segment of rotation, hits the bottom of the rider's neck on the way up, and curves off the shoulder at approximately 45 degrees.

The patented "V" shape is so quiet because it pushes this vortex out and away from the side of the rider's head. The rider's helmet then resides in still air, and the passenger's environment is greatly improved as well.

Reduced wind noise... less turbulence... superior strength... perfect style. The VStream revolution is here!

Duro Soft | **Duro Ceramic** | **Duro Semi Metallic** | **Velroprene** | **Duro Sintered** | **SBS Sintered** | **SBS Ceramic** | **SBS Carbon Tech**

Duro Soft designed to be compatible to all types of brake discs.
Duro Ceramic for general purpose use on carbon steel brake discs.
Duro Semi Metallic durable and have a reputation of excellent heat transfer for all types of brake discs.
Veloprene is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.
Duro Sintered excellent stopping on all types of brake discs
SBS Sintered provides maximum stopping power with stainless steel discs.
SBS Ceramic for general purpose use on carbon steel brake discs
SBS Carbon Tech for use on all stock or aftermarket calipers and work well with stainless steel or cast iron discs.

51-1609

Touring Chassis Component

The Touring Torque Linkage System

• No modifications are necessary to install this unit. After the unit is installed it will eliminate the lateral movement while still allowing the Iso mounted factory design of the “floating” drive train to move vertically as designed through connecting the rear of the transmission case to the frame. The kit utilizes an isolation link with a urethane plunger so there is no contact between the frame and engine transmission assembly, therefore reducing vibration.

VT No.	Finish	Fits
51-1609	Black	FLT 1991-2008

Note: Installation on 1993-2001 models require 27-1235 foot peg spacer set as shown. Purchase 27-1235 separately.

Duro Shocks

• Fit 1999-up FLT models

54-0063 54-0064 54-0065

FLT Replacement Shock Absorbers

•Nitrogen-charged steel monotube damper bodies with hard chrome-plated shafts
•Progressively wound springs for a smooth, comfortable ride
•Adjustable spring pre-load
•Mount with existing hardware
•Available in several lengths to suit most riding styles
•Sold in pairs

Note: Lowering the motorcycle will reduce ground and cornering clearance.

Note: Before purchasing or attempting to install shocks that are different than the OEM length, confirm that your wheel travel can be altered without causing clearance issues such as swing-arm/ axle to exhaust contact, as well as chain/ belt guard or tire contact.

Note: OEM upper shock mount covers will not fit with these shocks.

33-1737

33-1738

SMD LED H4 Headlight “Bulbs”

These LED projector bulbs feature state of the art SMD technology and have a heavy duty construction unlike conventional bulbs, a high resistance to torsional frame vibrations.

• The high powered patterned SMD type LEDs provide maximum illumination.

• Bulbs come complete with socket adapters to allow fitment with any headlight with H4, HS1, BA20D, T19, P43T or P45 base. High Beam is 1,500 Lumen at only 18 Watt low beam is 1,000 Lumen at only 12 watt, which is better as a common H4 bulb. Does not require the installation of separate ballast as these bulbs feature a built-in rotary cooling fan.

LED H4 Bulbs.

Mount Bracket Kit

- Simplifies the process of securing your bike to a trailer or lift. These stylish brackets mount cleanly to the front fork cover to connect tie down straps.
- Moving the tie down point from the handlebar to the triple tree area reduces wear on the handlebar bushings and ensures a consistent easy to access mounting point.
- Includes mounting hardware.

Chrome	Black	Fits
50-0622	**50-0623**	2014-up FLHT, FLHTCU, FLHTK, FLHX

Auxiliary LED Run/Brake/Turn Lamps

• Emit a soft neon-like glow when the ignition is on and the center row of fast-acting LED lamps burn brightly when the brakes or turn signals are activated.

• Mounted in a sealed housing that slips into the opening, and are held in place with the saddlebag support hardware and an adhesive pad.

• Kit includes left and right lamps and a plug-and-play wiring harness.

Fits 2014-up FLHTCU, FLHTCUL, FLHTK, FLHTKL and FLTRU models.

27-1235	Contour

51-1601 Installed shown with 27-1235

Touring Torque Linkage System features a chrome finish and will fit all Touring models with no modifications necessary to install unit. This unit will eliminate the lateral movement while still allowing the Iso mounted factory design of the "floating" drive train to move vertically as designed through connecting the rear of the transmission case to the frame. Kit utilizes an isolation link with a urethane plunger so there is no contact between the frame and engine transmission assembly, therefore reducing vibration. Fits 1993-2008 FLT.

VT No.
51-1602

Extreme Duty Battery Cable Sets.

•#2 gauge wires are very fat and flexible.
• The battery cables will transfer more cranking power with the very least amount of voltage drop. Over 2000 bare strands of copper are covered with special vinyl insulation that is covered by a synthetic thermo-rubber jacket.
• Sealed and insulated with black heat shrink tubing means no moisture will get in these cables.

VT No.	Year	Length

S&S Evo Long Block is shipped fully assembled. Features a natural finish and includes V80, 508 cam.
Fits 1987-99 FXST, FLST.
VT No. 10-8799

Case Bolt

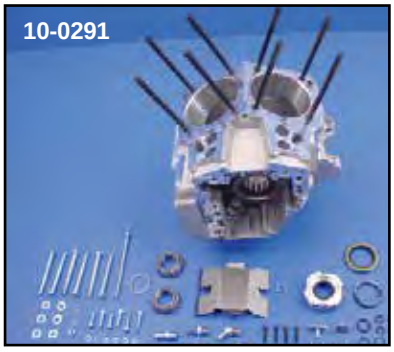

Engine Case Bolt Kit includes the necessary hardware to bolt together the cases of the years listed. Fits 1996-99 FXST, FLST, FLT, FXD.
VT No. 9883-20

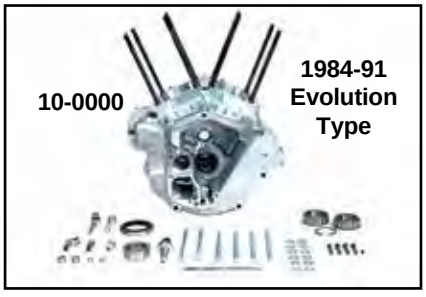

Chrome Engine Case Allen Bolt Kit fasten engine case halves together. Fits 1983-95 Big Twin Evo.
VT No. 37-9191

Ship in your Twin Cam Flywheel and we will remove the old sprocket shaft bearing and replace with new extreme duty bearing. Service requires work order number. Please contact our Motor Shop Department.

For TC-88 Models

S&S Crankcase Sets are shipped set up with Timken left side bearing and race assembly, seal and seal spacer, oil pump drive bushing, needle bearing and pinion race for right side, (pressed in and line honed) ready to assemble. Also included are cylinder studs, nickel plated case bolts, crankcase fittings and a timing and magnetic drain plug. Accepts wheels up to 8½" diameter. Note: Oil pump required for assembly.

Note: Features Evolution Engine Mounts.
Replacement Ring Sets for S&S Pistons only are for two pistons with 4¼" and .010 O.S.
VT No. 11-1401

Crankcase Set

Our Motor Shop can install this update for you!

Extreme Duty Left Side Main Bearing Kit is for all 2003-17 Twin Cam models. Includes bearing, spacer, thrust washers and snap ring. When high-performance engine modifications are made, the increased torque is transferred via the crankshaft to the drive system, putting a significantly higher load on the bearing. The extreme duty bearing is case hardened on the inner and outer race to provide increased load capacity and enhanced durability in high-torque applications. Installed in the left side of the crank case and supports the output shaft to the primary drive system.
Fits 2003-17 FLST, FXST, FXD, FLT.

VT No.	Item
10-0346	Kit
60-0261	Installation Service

Jims Forceflow Cylinder Head Cooler includes high powered fan, housing, horn, hardware and all wiring. Kit installs from horn location and is supported by center case bolt location. Use on 1999-16 Twin Cam Touring models.

Flywheel

Complete Stock Stroke Flywheel Assembly is shipped assembled and trued with shafts. VT No. 10-1091 requires the use of 1987-up type Pinion Shaft Bearing assembly and VT No. 12-0967 late bearing retainer.

VT No.	OEM	Fits	Note
10-1091	23906-78G	1984-90 FXST, FLST	1,2
10-1042**	23906-93B	1993-99 FXST, FLST FXD, 1993-84 FXR	1,2

Notes:
1. Features replaceable pinion and sprocket shafts and narrow sprocket side flywheel
2. Require use of 1987-up type pinon shaft bearing and retaining ring.

S&S Twin Cam 3 Piece Flywheel Assemblies feature heat-treated 4140 material that is 114% stronger than stock. Larger 1.671" crankpin for increased crank-pin clamping force. Integral mainshafts eliminates two potential points of weakness. Reduced mainshaft deflection at high rpm, less vibration, reduced piston and rod side thrusting, prevents oil pump damage, fully compatible with gear drive cams. 2007-up stock rod length is 7.659". Stock pistons in 2007 and later engines require rods with tapered wristpin ends. **Note:** Flywheel assemblies supplied with sprocket shaft bearing race installed are compatible with stock roller style sprocket shaft bearings. Assemblies with no race require a Timken sprocket shaft bearing.

V-Twin can provide quality professional machine shop and engine building service through a Motorshop. We can handle any job from fitting a set of pistons in your cylinder to complete rebuild of any engine. Contact your V-Twin customer representative for details.

V-Twin Motor Shop Twin Cam Flywheel Remanufacturing Services

Flywheel that are out of round or scissored can be repaired. The new flywheels on the 1999-up Big Twin are pressed together, but no match for our V-Twin Motor Shop. We will press apart and disassemble this style wheel assembly, inspect shafts, and crank pin components. V-Twin Motor Shop will rebuild your Twin Cam flywheel assembly to OEM specification using new bearings, crank pin and solid plugs, then balance and true. We can also weld the pin and plugs, if requested, at the flywheel and crank pin interface, for rigid power. We stock the bearings, cages and oversize crank pins to provide you with the components at hand when your flywheel arrives. We will hone the rods to allow the oversize pin to be fitted as required. Flywheel set will be trued and balanced. The final assembly and press is complete in our dedicated TC-88 flywheel fixture assembly.

Hydraulic Cam Plate Kit updates the cam chain tension of Twin Cam 88 engine to the latest design. The plate has been designed to allow the installation of the TC 96 hydraulic cam chain tension to TC88 equipped models. This cam chain tension will outlast the spring loaded tensioners and are an addition to the engine modified for improved performance. For use with cam chain tensioner kit.

"Super-Pump" Spring Kit for 1966-99 Big Twin engines. This color coated spring kit ensures that your engine maintains the recommended oil pressure of at least 10 p.s.i. @idle and up to 36 p.s.i.@road speed with a warm engine. Each spring is individually installed in the pressure relief valve of the oil pump. Works in all stock oil pumps as well as S&S and other aftermarket pump.
VT No. 13-9222

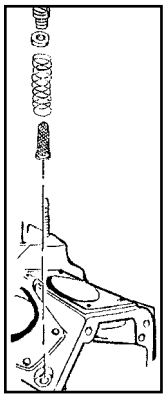

Pro Just Adjustable Pressure Relief Cap allows the precise adjustment of oil pressure by turning the adjusting screw clockwise to increase oil pressure or counterclockwise to reduce oil pressure. Comes with a "super pump" spring provided in our spring kit 13-9222. Works in stock 1981-99 oil pumps as well as S&S and other aftermarket oil pumps. Fits 1981-99 without oil vent.
VT No. 12-9921

Oil Screen Kit includes proper plug, screen, O-ring and spring.

Breather Gear

Sifton™ Breather Gear Kit is constructed of precision ground steel with screen installed. 8 piece steel thrust washer set included. Fits 1978-85 BT.

VT No. 12-1540

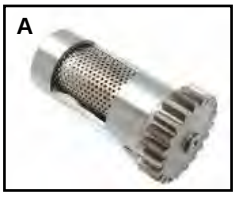

S&S Reed Breather features three steel reeds that are normally in the closed position. The downward cylinder motion increases crankcase pressure to open the reeds. On the upward stroke a vacuum is created.

VT No. 12-1949

Sifton Air Ramp fits S&S/Sifton Breather Gear on 1936-99 models to remove more air and oil from crankcase. Requires removal of screen for installation. Gear not included.

VT No. 12-1945

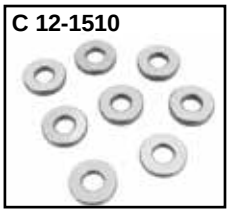

A-Big Twin Steel Breather Valve is a machined breather valve and gear. Designed to replace the stock steel or plastic units. Order 8-piece thrust washers separately. Available in stock duration only with either standard or +.030 oversize outside dimension.

ANDREWS Cam for 1984-99 Evo

For a better street cam for a stock motor, a big lift cam for a dragster or in between, Andrews Products can supply it. All cams are computer designed and precision ground from alloy steel billets.

Andrews Engine Cams for Evo. Evo series cams are designed to maximize Evo motor performance while retaining hydraulic tappets. Both cams offered bolt in with no head work in most cases. Note Shovelhead and V2 cams are not interchangeable.

VT No.	Grind	Timing*	Duration	Lift	Springs	Application
—	Stock 89-91	01/37 53/01	218 232	.495 .495	STOCK	Listed for comparison. 1984-87 cam is 212° intake 202° exhaust .472" lift on both valves.
—	Stock 92-95	-02/30 31/-09	208 202	.472 .472	STOCK	Listed for comparison. 92 cam very close to 84-87 specs. California cams are approximately 178° duration.
10-1171	EV13	15/31 45/13	226 238	.485 .495	STOCK	Bolt-in cam for street or touring with more mid range and upper end power more power than stock EV cam.
10-1123	EV23	10/30 40/8	220 228	.498 .498	STOCK	Bolt-in cam. Crisp throttle response and strong pulling power from 1500 to 6000 RPM.
10-2651	EV3	21/37 43/15	238 238	.495 .495	STOCK	Bolt-in cam for light bikes (FXRS, etc). More mid range power. Idle smoothness unaffected. This is a 6000 RPM cam for stock heads and springs with hydraulic tappets.
10-1180	EV27	20/36 44/16	236 240	.495 .495	STOCK	Bolt-in street cam with fast open and close ramps. Similar timing to EV3 but designed to produce a broad torque band. Pulls 1500-6000.
10-1146	EV46	25/41 49/17	246 246	.495 .495	STOCK	Bolt-in performance with fast open and close ramps. Similar to EV3 but higher static compression pressure for 6000+ RPM with stock heads and hydraulic tappets.
10-1183	EV51	28/44 54/22	252 256	.510 .510	STOCK	Easy installation with longer duration for modified street engines with hydraulic tappets. Power range from 3000-6500 RPM.

***Note:** Timing measured at .053 cam lift.

***Note:** Timing and duration listed for .053 cam lift. ****Note:** Requires S&S Gear Drive

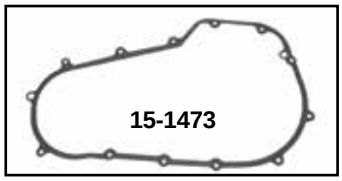

Camshaft for M-8

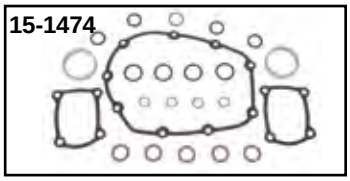

Andrews M-8 Camshafts Milwaukee 8 bikes are available in both 107 and 114 cubic inch engine sizes. With high efficiency four-valve heads, M-8 engines show great potential for performance gains especially with new design Andrews M-8 series camshafts. Keep in mind, cam timing specs for four valve heads look very different from camshafts designed for two valve applications. Engines with four valve heads have much greater flow efficiency so listed cam timing durations are a lot shorter.

M-8 Components

M-8 Adjustable Pushrod Conversion Kit includes chrome covers, adjustable pushrod set and o-rings. These pushrods are tapered for enhanced clearance at the cylinder head, allowing the use of higher lift cams. The one-piece chrome moly pushrod adds rigidity and durability and the threaded adjustment feature provides easy cam installation without removing the cylinder heads or rocker boxes.

VT No.	Item
11-9665	Complete Kit
11-9980	Pushrods Only

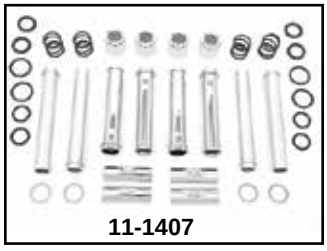

Andrews M-8 Adjustable Pushrod Set features a tapered end. Set is for use with high lift cams. Fits 2017-up FLT, 2018-up FLST, FXST. **VT No. 11-1208**

M-8 Rocker Arm Tower Stud and Nut Kit. Studs and nuts are heat treated alloy steel and have rolled threads for use on all 2017-up M-8 Engines. Each kit includes eight studs and eight nuts.
VT No. 11-1101

M-8 Cylinder Stud Set. Heat treated alloy steel stud set features rolled threads and are centerless ground. Set is for use on all 2017-up M-8 motors. Fits 2017-up FLT, 2018-up FXST.
VT No. 11-1103

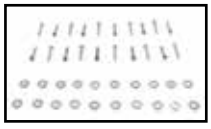

Replica Pushrod Cover Kit for M-8 models. Includes all pieces necessary for installation. M-8 fits 2017-up FLT, 2018-up FXST, FLST.

10-4275

S&S Twin Cam Gear Drive Cams and Camshaft Kits increase valve timing accuracy by eliminating timing chain lash and also reverses the rear cams direction of rotation providing additional operating clearance between cam lobes that will allow higher cam lifts. **Complete Cam Kits** include cams, complete gear drive kit and cam installation kit.
Gear Drive Cams can only be used with gear drive kit and also must be used with adjustable pushrods and performance valve spring kit. **Cams only** include inner gears. Outer cam drive gear kit must be ordered separately. Material must be removed from the inner surface of the stock gear cover and crank case modification is required on .625" and .640 lift cams.

SHOP TIP Piston Installation

Caution: Do not install piston pin without lubricating it first with motor oil or assembly lube. Touch up outer edges of piston pins with emery cloth before installation.
1. Refer to applicable service manual for proper installation methods.
2. Piston should be measured front-to-rear at the base of piston skirt, perpendicular to wrist pin.
3. Piston should be set-up with the following tolerances:
Recommended piston/cylinder running clearances:

	Minimum	Maximum	Preferred
Evolution® Models (Aluminum Cylinders)	.0015	.0022	.002
Big Twin Models (Cast Iron Cylinders)	.0015	.003	.0025
Sportster Models (Cast Iron Cylinders)	.003	.004	.0035

Specifications for ring end-gap are supplied with the ring sets and vary by type and size.
Note: Run engine at moderate speeds for at least 500 miles, avoiding excessive running in lower gears, in order to properly break in new pistons and rings.

Cylinder for 1984-99 Evo

Cylinder and Piston Kits for Evo Late 1985-99 1340 cc are honed and pre-fitted with stock compression cast pistons and Hastings Rings. They are ready to run and will require break-in as suggested in the appropriate shop manual. Sold in pairs for stock stroke only. Order gasket set separately.

VT No.	Finish	Compression
11-2618	Black	8.5:1
11-2610	Silver	8.5:1

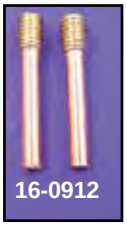

1340cc Black Cylinder to fit Evo are sold each.

Sifton Cylinder Drain Inner Filter for returning top end oil. Features a stainless steel screen and a ceramic magnet that will stop all ferrous debris from common valve train wear and is most effective in stopping broken valve spring material from entering engines oiling system through cylinder drain. The thin wall steel dowel protects the magnet and provides proper head to cylinder alignment. Fit Evo. **VT No. 40-0250**

1 Cubic Inch = 16.38 cc
1 Cubic Inch = .0163871 liter
π = 3.14

Bolt-On Cylinder Kit

83”

The Sifton cylinders have a very thick, large outside diameter, “cast in” liner which has been proven to be an important factor to maintain thermal stability which is the ability to retain the important cylinder bore dimension through repeated heat cycles.

11-1253

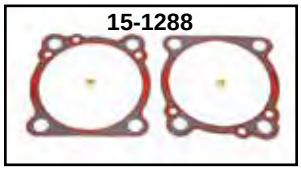

11-1258

Bolt-On Cylinder Kit includes 10:1 compression Wiseco forged piston kit fitted. No case boring required. Fits Evo 83”.

99-17 Big Bore Cylinder Kit for TC-88 or 96

3⅞" Big Bore Cylinder Kit increases displacement of the Twin Cam 96 to 103 cubic inches. Can be used on Twin Cam 96" models to produce 103 cubic inches with stock flywheels. These cylinders require no crankcase machining and are finished and honed. Fits all 2007-11 Twin Cam 96" models with stock stroke flywheels. Can also be used as a stock replacement cylinder set on 2012-17 Twin Cam 103" models includes Wiseco piston kit.

TC Big Bore Kit

110”

110" Motorshop 4" Big Bore Bolt-On Cylinder and Piston Kit takes your 96 or 103 cubic inch motor to a full 110 cubic inches without removing the engine from chassis. 4” Big Bore Cylinder and Piston package increases the internal bore from 3⅞” to 4”, without increasing the outside diameter of the cylinder spigot. The cylinder slips into the existing case bore without modification. Kit will add a whooping 7 cubic inches of displacement for more torque throughout the RPM range. This kit includes front and rear cylinder, system-matched pistons with rings. Fits 2007-17 FXST, FLST, FXD, 2007-16 FLT.

KB PERFORMANCE PISTONS

11-2264

11-2216

KB PERFORMANCE PISTONS

The Keith Black 390 Hypereutectic alloy is cast in a permanent steel mold which makes it possible to build a light weight piston that makes more power and uses less fuel and lasts longer than any other type of piston being made today. We can now forget about running loose, noisy, oil-burning pistons. The low heat transfer of the alloy keeps the skirts cool so piston expansion is minimal. Test engines have run with as little as .0005" (½ thousandth) piston-to-wall clearance. The combination of a low heat transfer piston alloy and high compression ring placement increases power and economy. The high ring placement alone reduces detonation and increases the top ring temperature. It is important to see our ring end gap instructions to avoid ring butting.

The KB piston will make maximum power at 2 to 4 degrees less total timing than conventional pistons. All KB piston sets are supplied with Hastings Moly Ring sets. Safe top ring end gaps can be found by multiplying the bore diameter by the appropriate ring end gap factor from the adjoining chart.

Example: 3.5" bore "Street Normally Aspirated" = 3.5" bore x .0065" = .023" top ring end gap.

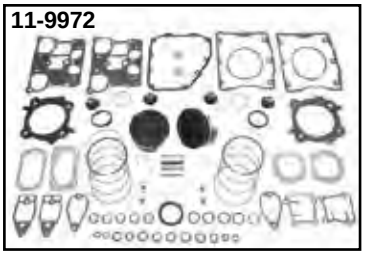

Note: Second ring end gaps do not need extra clearance

High Performance Forged Pistons

- Wiseco's high-tech manufacturing ensures greater operating strength and lower expansion at high temperatures
- Evolution Kits include forged pistons with ArmorGlide™ coated skirts, rings, retainer clips and chrome piston pins
- Twin Cam Kit are available with "Armor X" valve pocket coating that also features "Armor Fit" skirt coating or with ArmorPlating which improves ring seal, eliminates ring micro-welding, and improves the piston's ability to defend against detonation damage
- Piston kits are available with X-Ring package (.062 top ring, .062 compression ring and .158 oil ring), or VM-Rings (1.2mm steel, positive twist, gas nitrided top ring, 1.2mm cast iron, taper under-hook scraper ring and 2.0mm three-piece, flex-vent oil ring with steel chrome-faced rails); VM-Rings, X-Rings and XC-Rings will not interchange
- 103" kits require cylinder boring; 110" kit requires big-bore cylinders and case boring; X-Ring package (.0472" top ring, .0472" compression ring and .118" oil ring); recalibration required

Note: Replacement rings include rings for one piston only.

Gary Bang is credited with creating the first motorcycle aftermarket catalogue but his love of motorcycling began in 1948 when his dad bought him a Cushman motor scooter. By 1954 he was working parts at Kolbe Cycle in Reseda, California and in '65 he began traveling as a road rep for MC Supply. He traveled for a few years learning everything there was to know about the industry.

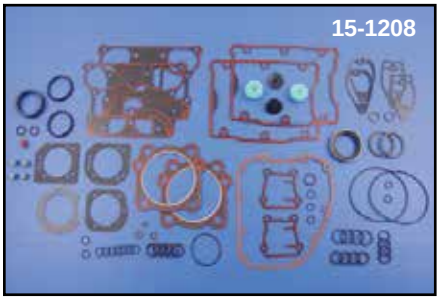

Gary discovered that California was way behind the Midwest in the custom business. Many of the bikes on the floors of those Midwest shops were customized, so in 1967 he found a 1,200 square foot building in Canoga Park, Ca. where his first retail shop was opened. He sold parts for Triumphs and other popular motorcycle brands, specializing in spokes and custom wheel building.

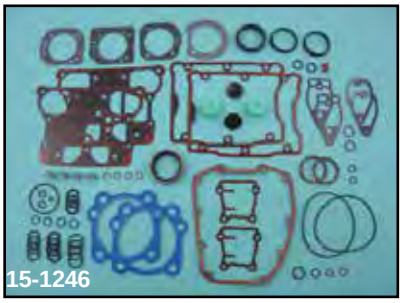

In the early 1970's Gary noticed that the majority of young Harley riders were into chopping and customizing their motorcycles. There was nowhere for these guys to find the product so Gary decided to give them what they wanted. He took out an ad in Big Bike magazine letting everyone know that they could order a Gary Bang Parts catalogue for $1.00. The people finally had a company that had what she or he needed. And if Gary didn't have it, he knew where to find it, or have it made.

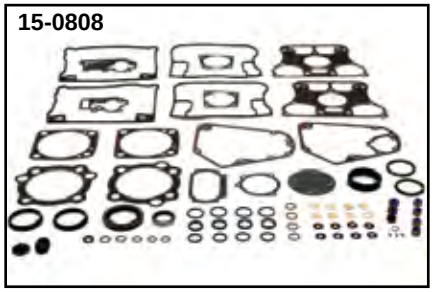

In 1982 Gary opened a Harley-Davidson retail store in Atascadero, California where he works with his wife Mary, daughters Kristy and Lisa, and his granddaughter April.

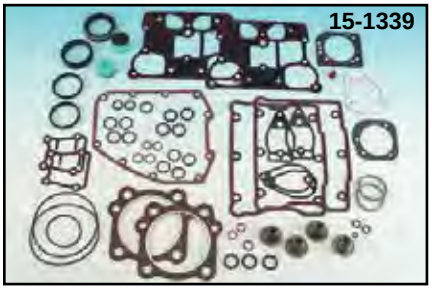

Motor Gasket Sets

21-0997	Shifter Footpeg

This V-Twin part is a steel forging. In this process, the steel is first fired as a red hot ingot. Next a huge air hammer compacts and orients the grain structure into a rough shape of the part. Subsequent hits form the part into its final shape. After which it is machined and heat treated which results in greater strength and resistance to wear. V-Twin supplies many products which are of forged construction, including connecting rods. Frame components and kicker arms.

Billet Shift Arm
fits 5 Speed 86-96 ST 85-94 FXR 91-96 FXD Big Twin transmission.

Big Twin Clutch Pack

York Pro-Clutch

Variable Clutch with Spring includes spring and a stronger clutch engagement as revs increase. Fits 1998-17 FXST, 1998-17 FLST, 1998-15 FLT, 1998-2017 FXD. Fits 96" cubic inch.
VT No. 18-0674

York Posilock Clutch Kit fits 1998-06 Big Twin featuring positive engaging ball ramp activation.
VT No. 18-0780

Pro-Lock Clutch Kit features a positive engaging ball ramp activation system, this applies extra pressure to the clutch plates and prevents clutch slippage without any increase on the lever pull effort by changing the fulcrum point. Fits straight into the stock clutch basket and behind the stock primary cover. Replaces stock pressure plate, diaphragm spring and spring retainer. Fits 1998-17 FXST, FLST and 1998-16 FLT.
VT No. 18-0002

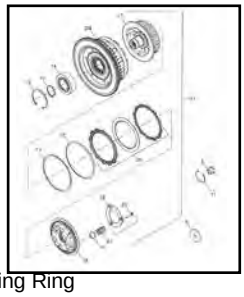

BDL Competitor Clutch Kit features 9 springs and shoulder bolts for simple adjustment, large 40mm double row hub bearing, polished pressure plate and Kevlar clutch.

Rear Pulley Rotor Spacer is ideal to get belt pulleys or chain sprockets in line. These spacers can also be used as a disc spacer. Spacer can be machined down to the next size under without having to worry about the spigot alignment, when you machine the face of the spacer down to the desired thickness on spacers with spigot. Spacers are drilled for use with 7/16" bolts. I.D. is 2 1/16" for 1980-99 and 2 1/4" for 2000-up.

Motor Sprocket

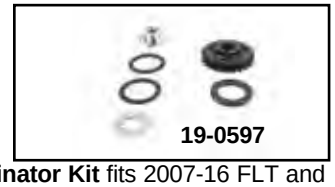

Compensator Sprocket Eliminator Kit fits 2007-16 FLT and 2007-17 FXST, FLST and FXD models as noted. Solid steel one piece design sprocket kit is spring less and much quieter than stock style compensator. Eliminates the need for a complete compensator assembly. Kit includes washer, spacer, bolt and sprocket.

VT No.	Teeth	Type
19-0295	24T	1984- FXR, 1984-93 FLT, 1991-93 FXD

12-1102		Bolt Set
28-0483		Replacement Tensioner Shoe Only for 19-0028

***Note:** Requires shorter primary chain. FLT applications require **VT No. 19-0933** primary chain and FXST, FLST, FXD applications require **VT No. 19-0380** primary chain.

****Note:** Includes **VT No. 19-0933** 84 link primary chain for FLT applications only.

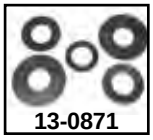

Compensator Bolt Torx Socket is for 2014-up Big Twins. Used to remove or install compensator bolt. **VT No. 16-1669**

Compensator Sprocket Kit. Engineered with heavier springs for increased travel. Heavy duty kit should be used for higher than stock horse power engines.

VT No.	Item	Note	Fits
19-0299	Kit	1&3	2012-13 FXD, FXST, 2011-13 FLT 2009-13 FLHXXX
19-0014	Kit	1&3	As Above
19-0587		1,2,3	As Above
19-0159	Kit		2017-up FLT
12-1105	Hex Nut for Motor Sprocket		

Note 1: Can also be used on 2006-11 FXD, 2007-11 FXST, FLST and 2007-10 FLT but will require the separate purchase of **32-0870** alternator rotor. 2006 FXD models will also require the separate purchase of **32-0868** stator.

Note 2: Requires spring kit **13-0871** for installation.

Note 3: Stock replacement for 2014-17 FXD, FXST, FLST and 2014-16 FLT models.

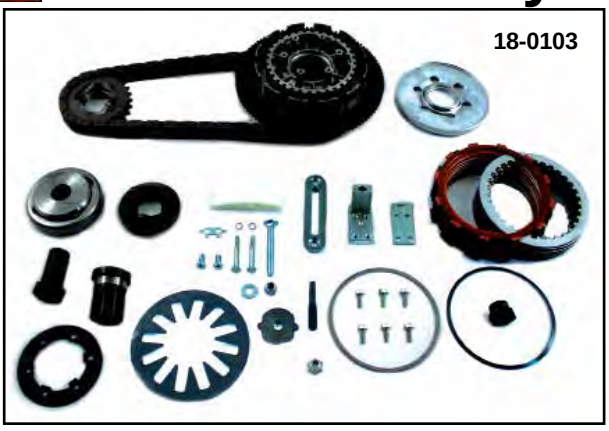

Compensator Sprocket Lock Nut Kit includes a lock plate and lock tabs which secure the nut to the sprocket retainers that the compensator nut and lock plate bolts do not come loose. Similar to the transmission pulley mega nut. Use on all Big Twins with **VT No. 19-0299** or **VT No. 19-0587** compensator sprocket kit only.

Primary Drive Assembly

Primary Chain Drive Systems for Big Twins include 76 or 82 link Diamond primary chain, chain shoe adjuster assembly, clutch drum basket with starter ring gear and steel and fiber clutch plates with pressure plate assembly. Correct front compensator sprocket assembly includes all parts necessary for installation. Including sprocket nut. 5-Speed Big Twin Softail models and all pre1985 FLH-FX 4-Speeds require 82 link primary chains, 1980-up FLT-FXR 5-Speeds require 76 link primary chains.

82 Links	76 Links	Year

Brake Control Kit for FXST

FXST Replica Forward Brake Control for use on all 1970-99 Big Twin with Shovelhead or Evolution engines equipped with hydraulic disc or drum brakes. Designed after the 1984-99 FXST which places the driver peg in back of the brake pedal, so the brake is easier to operate from this comfortable position. Redesigned to accept a Wagner or Kelsey-Hayes style master cylinder or GMA masters, also available with chrome KH or Wagner style masters. Hardware includes linkage pedal mount plate, rubber covered footpeg. This kit is the exact compliment to our shifter kits listed on opposite page and when used with one of these kits, places the pegs in forward and raised position.

2000-07 Chrome Front Caliper Kit

Front Caliper and Rotor Kit fits 2000-07 FXST models. Kit includes a complete replica 4-piston caliper assembly with pads, polished stainless steel drilled rotor and chrome mounting bolts.

Chrome	Black
23-0561	23-1663

Front Chrome Rotor Caliper Mount Bolt Kit fits all 2000-up Big Twin models.

VT No.	Brand	Fits
37-0816	GW	2000-07
2080-4	Colony	2000-07
2754-12	Colony	2008-up FXST, FLST

Front Chrome Four Piston Brake Caliper Kits feature pistons which are hard anodized aluminum for superior operation and long lift. Brake pad springs eliminate rattles and aid in caliper installation. Direct replacement for stock caliper and bracket. Use with stock brake controls. Require brake line fabrications by installer. Use with D.O.T. 5 brake fluid. Caliper mount holes are 3½" center to center.

Disc Brake Pad Set

Disc Brake Pads available in **Duro** or **SBS brand**. **Duro Brake Disc, Duro Brake Disc Veloprene** for excellent stopping on all types of disc brake discs. **Duro Brake Disc** replacement pads are a soft compound designed to be compatible to all types of brake discs. **SBS brand** is available in **Sintered, Ceramic or Carbon Tech** compounds. **Sintered Metal Pads** provides maximum stopping power but can never be used in calipers that were originally equipped with non-sintered pads. Works best with stainless steel disc brake discs. **Ceramic Pads** are for general purpose use on carbon steel brake discs and can be used on calipers originally equipped with sintered metal brake pads. **Carbon Tech Pads** for use in all stock or aftermarket calipers. Works well with stainless steel or cast iron brake discs. Order anti rattle clips separately. **Veloprene** is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.

Sprocket Bolt Lock Tab zinc plated for 5 bolt sprocket.
VT No. 23-1340

Brake Rotor-Pulley Spacers

Aligning

Standard

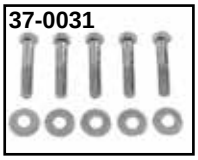

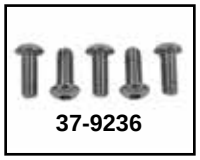

Rear Pulley Rotor Spacer is ideal to get belt pulleys or chain sprockets in line. These spacers can also be used as a disc spacer. Spacer can be machined down to the next size under without having to worry about the spigot alignment, when you machine the face of the spacer down to the desired thickness on spacers with spigot. Spacers are drilled for use with 7⁄16" bolts. I.D. is 2 1⁄16" for 1980-99 and 2¼" for 2000-up.

Rear Pulley Rotor Spacer

Universal Brake Fitting & Bolt

10mm Street Legal Universal Brake Lines are build it yourself line assemblies ready for adapter fittings. They are preassembled with high performance #3 stainless braided hose with a rugged veloprene coated inner, and crimp-on chrome plated female swivel hose ends. Clear coated for abrasion resistance. Meet the guidelines of the D.O.T. MVSS-106 requirements and are 50-state legal, and compatible with all brake fluids.

Attention!!
These fork tubes have been manufactured and tested for exact fit and application per model. It can be difficult to identify the front end assemblies because they may not always be original equipment. Before installing, compare old and new tubes. Be sure the stock top plugs fit into the new fork tubes. To avoid scratching the chrome, we suggest that the tubes be lightly rubbed with oil before installing into fork legs. Be absolutely sure you have the right tubes before you install them. No fork tubes can be accepted for return that are scratched or damaged due to improper installation or handling.

49mm Fork Tube Sets with hard chrome finish.

Steel Fork Brace.
24-1041, 24-1042, 24-1043, 24-1044 custom front fork braces are made from laser cut 3⁄16" thick steel. They allow removal of the front fender and increases rigidity to the front fork better than stock, eliminating any fork twist while safeguarding the integrity of the suspension. The custom styling looks great on any motorcycle, for use with 19" and 21" wheels and tire. **Not for use with front fender.**

Emissions and Noise Regulations
Important Information:

Disclaimer: The California Air Resources Board (CARB does not permit the use of aftermarket emission-related parts) that alter the performance of OEM emission-related devices unless CARB has issued an executive order, other than on racing vehicles on closed course. Check your local laws and manufacturer’s information.

Disclaimer: Emission related parts for OEM Non-emission control system equipped motorcycles as well as slip on mufflers that mount downstream of and which do not alter the performance of OEM emission-related devices, are considered legal replacement parts by CARB. More California exhaust information is available a www. arb.aa.gov.

Disclaimer: Aftermarket products, including but not limited to exhausts, fuel, air controllers, air filter kits, camshafts and carburetors and jet kits which alter, modify, or replace emission control devices or systems of an originally compliant highway motorcycle, are not legal for sale or street use in California unless they have been issued a CARB Executive Order. Aftermarket emissions related products which have not been issued an Executive Order or which are not aftermarket Replacement Parts, as defined in Title 13, California Code of Regulations, Section 1900 (b)(2). are authorized for closed circuit race use only. Products shown may be designed, manufactured, intended and sold for closed circuit race use only and use of the same on public roads or lands may be a violation of local, state and/or federal laws. See manufacturer’s information and state and local laws to determine what is authorized for your use on your vehicle.

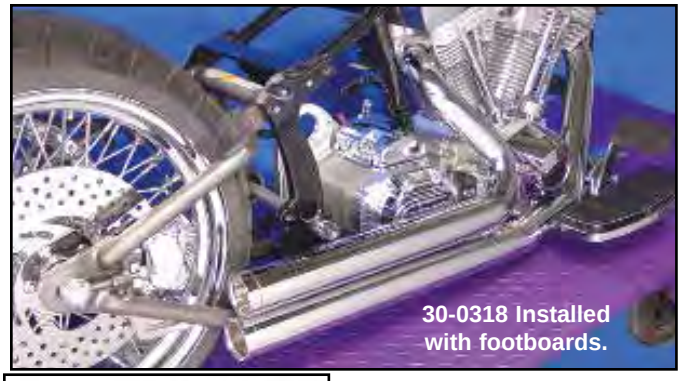

Disclaimer: Products shown may not conform to federal, state or local noise regulations.

Warranty
Disclaimer: There is no warranty on exhaust pipes and mufflers with regard to any discoloration. Discoloration (blueing) is caused by tuning characteristics, i.e. cam timing, carburetor, etc. and is not caused by defective manufacturing.

Disclaimer: Check your applicable laws and manufacturer’s publication(s) and/or website(s) for manufacturer’s warranty, maintenance, safety, mounting and any regulatory compliance/ non-compliance information.

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

Touring Torque Linkage System features a chrome finish and will fit all Touring models with no modifications necessary to install unit. This unit will eliminate the lateral movement while still allowing the Iso mounted factory design of the "floating" drive train to move vertically as designed through connecting the rear of the transmission case to the frame. Kit utilizes an isolation link with a urethane plunger so there is no contact between the frame and engine transmission assembly, therefore reducing vibration. Fits 1993-2008 FLT.
VT No. 51-1602

V-Fire Coil Set is single fire, angle type. Coil set features orange finish, 3.0 ohms.
VT No. 32-0484

V-Fire Single Fire Coils features 45 kv with 1 spark for each cylinder as fired and will mount to stock bracket and accept stock type coil covers. Works with most aftermarket single fire ignition systems.

VT No.	Finish
32-0467	Black
32-0474	Chrome

1. 12 volt wire from ignition switch is connected to center post along with red wire from ignition.
2. Connect the black wire to outer post from front cylinder.
3. Connect the white wire to other outer post for rear cylinder.

45 KV Coil Kit includes coil and cover. To mount on stock 1984-99 Softail .
VT No. 32-0749

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke. This is the way the stock motor works on pre TC-88 engine.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

ACCEL Ignition Coils

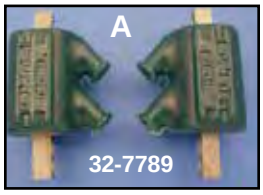

Accel Dual Fire H.V. Super Coil. High performance bolt on for electronic ignition systems. High-tech molding for exact fit on 1965-99. 2.3 ohms.
VT No. 32-7772

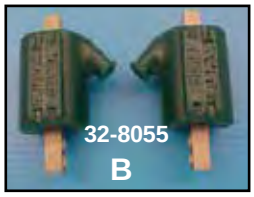

The Accel Stealth Coil eliminates the need for ignition wires forever by mounting the coils directly to the spark plugs for maximum spark energy to the plugs. An aluminum finned cover holds the coil in place and acts as a functional heat sink to pull heat away from the cylinder heads. All wiring is hidden in the fins of the head for a clean, custom look. Available with natural finned heat sink.

VT No.	Fits
32-1141	2002-08 All FLT models with EFI
32-1142	2001-14 All Softail models with EFI
	2009-14 All FLT models with EFI

Accel 8mm S/S Spiral Core Ignition Wire Set
- Designed specifically for Harley-Davidson Milwaukee 8, Twin Cam
- Delivers up to 5 times more peak energy than other "Performance Wires"
- Maximum RFI protection to shield sensitive electronics with 500 Ohms per foot
- Spiral core wire utilizes stainless steel alloy conductor with fiberglass/Kevlar inner core for strength
- Lower resistance delivers more energy to the spark plug
- Custom fit sets are ready to install-no cutting or crimping required
- Fully capable with Delphi fuel injection system

Warranty
All Electrical Components sold as individual pieces or in kits are covered under our warranty "Replacement Only" Provision. All electrical related item part numbers begin with a 32 prefix. No credit will be issued for these items as they are exchange only.

Points Conversion Kit. Both brands include everything necessary for direct replacement on 1970-78 Big Twin, 1971-78 Sportsters or for converting late model electronic-type back to points. Accel type available with microchip points, which will require a domed shaped points cover such as VT No. 42-0299 to accommodate taller points. The V-Twin unit includes stock style points and condenser. 32-0150 available with needle bearing weights.

VT No.	Item	Type

V-Fire Ignition Kits are available in ***dual fire*** where there are two sparks at the same time and ***single fire*** where there is one spark for each cylinder when it is fired, separately. Each kit includes a mechanical advance unit and all hardware. Order coil separately VT No. 32-0467 coil has two separate coils inside to fire independently.

Kits	Type
32-1620	Dual Fire
32-1626	Single Fire

VT No.	Type	Coil
32-0468	Dual Fire	**32-0511**
32-0469	Single Fire	**32-0467**

V-Fire Single Fire Coil gives one spark for each cylinder as fired and will mount to stock bracket and accept stock coil cover.

VT No.	Finish
32-0467	Black
32-0474	Chrome

Accel Late Model Super Coil for late model Twins with carburetor. Features faster rise time, higher voltage, maximum spark and energy to spark plugs for quicker starting, improved idle and crisper throttle response. Fits in OEM location and is available in black finish. Fits 2000-02 FXST-FLST, 2000-05 FXD, 2002-06 FLT with carburetor.
VT No. 32-1810

Dyna Ignition Booster is for single points systems only. It transforms inconsistent electrical surges into controlled bursts of energy so that the coil power is not wasted. **VT No. 32-7787**

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

Ignition

Dyna 2000 Digital Ignition System include Dyna 2000 HD-1 Ignition Module and a matched Dyna Twin Fire Coil for each application. Fits 1996-99 FXST, FLST, 1996-98 FXD, L94-98 FLT
VT No. 32-0802 SFK-3

32-9113

Dyna 2000 Ignition Modules Replacement can be used with stock electronic ignition.
Note: The stock ignition consist of a sensor plate and rotating cup. The 2000 will work on all 1970-up models but requires the 1983-up type ignition cup and sensor plate. The 2000 Advance curves will not work properly if installed with the pre1983 ignition cup and sensor. Dyna 2000 HD-1 can be used with both single fire (separate coils) or Dual fire (Single Coil). The Dyna 2000 HD-2 can be used as dual fire only. **Both units** feature programmable advance curves,rev limiter and LED diagnostic lamp for easy static timing and plugs into stock harness and bolts to stock module location. Also available with USB port that will allow mechanics or tuners more advanced programming but requires separate purchase of Dyna Programming kit. **Note:** Can only be used with suppression spark plug wires. On 1984-90 models Dyna extension harness must also be used.

VT No.	Item/Plug	Years
32-9113	Dyna 2000 HD-2E, 7 Pin with USB Port	1984-95
32-1074	DD2000-HD7EFI 2010-16 FLT with EFI

32-1076	DD2000-HD9EFI 2012-up FXST, FLST with EFI	
32-9087	Ignition Cup Only	
32-9020	Sensor Assembly	
32-9052	Cup Screw, 10 pack	

Dyna	Application
DC6-5	All FXR-FXST and Dynaglide models
DC6-4	Dual Spark Plug Head Application

Dyna Twin Fire Ignition Coils are designed to work with Dyna 2000 HD-I ignition modules. Twin fire coils are slightly larger than stock coils and fit the stock mounting bracket. Twin fire coils can be used with any electric advance ignition system that incorporates dwell control except Dyna DS6-2 or similar type ignitions.

VT No.	Dyna	Ohms/Type
32-9285	DC6-5	3 (A)Twin Fire II Miniature Dual Output Towers, Replaces DC6-3
32-9264	DC6-4	3 (B) Four output towers Fits Dual Spark Plug

V Fire Ignition Systems fit all 1970-98 carbureted models and requires sensor cup for 1982 and earlier applications. Order tach interface, sensor cup and screw separately if required.
Note: Order Coils As Required.

VT No.	Fits
32-9500	Single Fire Ignition fits Evolution, Shovel and Sportster through 1997. It can be set for Street or Race-Electric or Kick Starter includes rear cylinder timing adjustment for rate of advance. Compatible with single fire coils.
32-9503	Single Fire Ignition Kit fits As Above Includes coil, 8.5mm wires & sensor cup
32-0588	8.5mm Wire Set

Notes for installation:
32-9500
Red = Positive (coil)
Black = Negative (front cylinder coil)
White = Negative (rear cylinder coil)
Green = Voes (vacuum switch)
Brown = Tach

Unilite Breakerless Ignition System for all 1970-99 Twins. Unilite Dual fire module features integrated photo coupler, signal processor and power switch. Requires mechanical advance assembly and ignition coil with 3.0 to 4.0 ohms.

VT No.	Item
32-5119	Ignition System
32-7510	Mechanical Advance

VT No.	Item
32-1731	HI-4N Ignition
32-1732	HI-4N Kit

S&S H1-4N Multi Function Performance Ignition features one piece machined aluminum housing, BCD switches with solid detent and legible markings, which allows easy adjustments of mode. Advance rate and rev limit, single or dual fire operation and initial timing marks that allows precise adjustment. Fits 1970-99 XL. Also available as an ignition kit which includes HI-4N ignition, single fire coil and 8.5 mm plug wire set.

Ignition Module Adapter allows use of seven pin module (1991-93) going to eight-pin Deutsch (1994-99) wiring harness or an eight pin module going to a seven pin harness. Cannot be used on electronic fuel injected models.
VT No. 32-0086

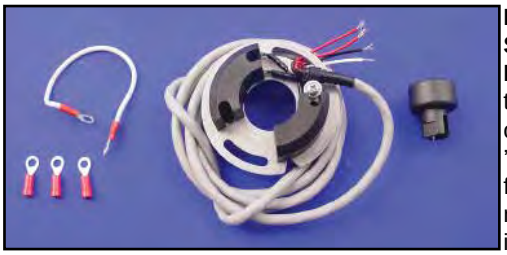

Ignition Timer Sensor Cup Kit
VT No. 32-9130

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

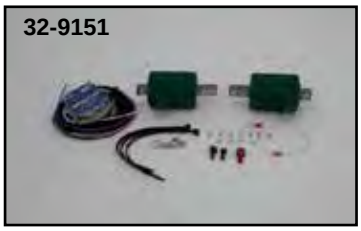

DYNA Ignition

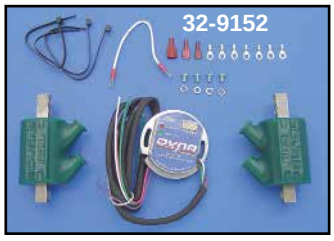

Dyna 'S' Hi-Performance Ignition System is self contained, fits behind ignition cover, uses magnetic rotor with the original spark advancer, so factory advance curve is maintained. Improves performance, extends spark plug life, eliminates points and condensers. **Note:** For dual plugged heads, on 1980-up use advance mechanism, VT No. 32-7510
VT No. 32-7778 (DS6-1)

Dyna 'S' Single Fire Ignition has the features of the Dyna 'S', but fires front and rear cylinders independently of each other which allows accurate timing of each cylinder. Stock ignition systems fire both cylinders at the same time which has the wasted sparks on the exhaust stroke. This eliminates this inherent problem. For use with either dual or single plug heads. On 1980-up models, use VT No. 32-7510 Advance assembly.
VT No. 32-7777 (DS6-2)

Dyna 2000i Digital Ignition available as a module only or complete kits that include correct coil. Features include single or dual fire operation, 8 advance curves, built in tach driver, adjustable RPM limit from 6000 to 7500 and easy static timing with built in timing indicator. Fits all 1970-98 carbureted models and requires 1983-up sensor cup for 1982 and earlier applications. Advanced Programming Software allows the mechanic or tuner the ability to fine tune 2000I Ignition but requires adapter.

VT No.	Item	Plug	Fire	Coil
32-9151	Kit	Single	Single	DC3-1
32-9152	Kit	Dual	Single	DC1-1
32-9155	Kit	Single	Single	DC6-5
32-9159	Module Only			
32-9087	Sensor Cup			
32-9052	Cup Screw, 10 pack			
32-9130	Ignition Timer Sensor Cup Kit			

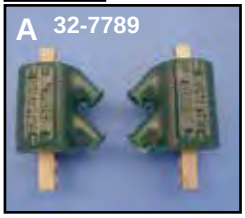

Dyna S Performance Ignition Systems. Available in dual or single fire for street applications only. Each kit includes sensor plate assembly and correct coil for each application. Single plug only. 1980-up applications require 32-7510 advance mechanism.

VT No.	#	Type
32-0800	DSK-6-2	Single Fire
32-0801	SDK-6-1	Dual Fire

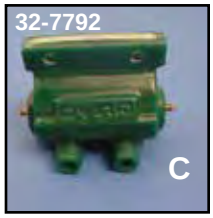

Replacement Rotor for Dyna Ignitions.

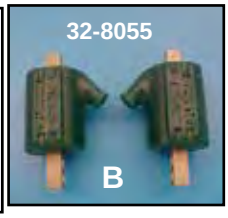

VT No.	Fits
32-9300	DS-6-1
32-9301	DS-6-2

K.V. Recommends the following coils for Dyna Ignitions:
DS6-1 Ignition VT No. 32-7778
Street, Single plugs use DC-7 or DC-8
Race, Single plugs use DC-1 or DC-6
Street/Race Dual plugs use 2 DC-2 or DC-5, wired in series
DS6-2 Ignition VT No. 32-7777
Race, Single plugs use 2 DC-3
Street, Dual plugs use 2 DC-7 or DC-8
Race, Dual plugs use 2 DC-1 or 2 DC-6
Street, Single plug uses 2 DC10-1

Dyna Coils generate 35,000 volts and work with all points ignitions as well as aftermarket or factory electronic ignitions. Note: 32-7792 is electronic, 32-7793 is for points ignition.

VT No.	#	Volt	Ohm	Dyna	Type	U/M
32-7789	A	12V	3	DC-1	Angle, Dual	Pair
32-7790	A	6V	1½	DC-2	Angle, Dual	Pair
Use 2 for dual plug heads						
32-7792	C	12V	3	DC-6	Stock, Dual	Each
32-7793*	C	12V	5	DC-7	Stock, Dual	Each
32-8055	B	12V	3	DC-3	Angle, Single	Pair
32-8086	A	12V	5	DC-8	Angle, Dual	Pair
32-9035	B	12V	5	DC-10-1	Angle, Single	Pair

***Note:** Use two for single fire ignition.

Dyna Electric Tachometer Adapter Kit must be used with Dyna 'S' single fire ignition is installed on any twins when electric tachometer is used.
VT No. 32-7799

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

Daytona Twin Tec Carb Ignition

32-3015

Daytona Twin Tec Internal Ignition Kit has a billet aluminum housing with wide timing advance adjustment range which accommodates stock to highly modified engines. Kit includes ignition, coil and spark plug wire set.

VT No.	Fits
32-3015	84-99 FXST, 86-99 FLST, 82-94 FXR, 91-99 FXD

Dyna Tek

Power Commander V Fuel and Ignition Timing Control for each cylinder. Rev Xtend feature increases stock rev limiter. Switch between two maps "sent on the fly" can be adjusted on a "per gear" basis and allows for one map per cylinder per gear if required. Adjustment of fuel and timing is based on engine temperature provided by the cold start feature. Will power up with USB cable only for programming. **Note:** Not legal for use on pollution controlled vehicles.

VT No.	Fits
32-0843	2009-11 FLSTC/FLSTN (plastic mount tray included)
32-1039	2012 FXST, FLST
32-1043	2012 FXD

Power Commander III USB Engine Management Systems are for fuel injected models and allow for both fuel and ignition adjustments. Each unit includes a specific map, designed to improve performance over stock. The Power Commander includes IBM com32patible link cable and software package which allows you to fully map the fuel ignition curves on IBM compatible computers. If a computer is not available, the fuel curves can be adjusted by using three touch buttons on the face plate.

Dyna Tek FI Controller is a plug module that offers 3 user selectable base fuel curves that are designed to improve engine operation and can be modified to suit a wide variety of modifications. Fuel mixture can be enriched or leaned as required. The Dyna FI controller uses the factory connectors for easy installation and there is no PC required for tuning or adjusting the fuel curves. There are no modifications required to the stock ECU and removing the Dyna. FI controller returns the vehicle to the factory configuration.

32-3049	2014-16 FLT w/CAN bus

Daytona Twin Tec TCFI Gen 5 Auto Tune Fuel Injection Controller is fully programmable plug in replacement for the 36 pin controller with CAN data bus.
Fits 2012-up FXST, FLST, 2012-17 FXD.
VT No. 32-7402

TCFI Gen 6 Fuel Injection Controller for 2008-13 Harley-Davidson® Touring Models with Electronic Control Throttle Control • Fully programmable plug-in replacement for 73 pin Delphi® controller with J1850 data bus used on 2008-13 touring models with electronic throttle control. **VT No. 32-3052**

Twin Tec External Plug In 8 Pin Ignition for 1995-98 Evo Big Twin features 4 rotary switches used to set the operating modes such as single or dual fire, adjust the timing, advance and select RPM limit. Two diagnostic LED's indicate status and start of the VOES switch. The status LED is also used for static timing as it will flash when the engine reaches top dead center.
VT No. 32-1007

Twin Tuner II features all the same function as the original Twin Tuner and includes ignition timing control capability. Requires optional USB interface cable VT No. 32-3045 compatible with Twin Scan II Tuning Aid VT No. 16-0378.

VT No.	Fits
32-3042	2001-2011 FXST, FLST, FXD with 36 pin Delphi
32-3043	2012-up FXST, FLST, FXE with CAN Data Bus.
32-3044	2008-13 FLT with 73 pin Delphi
32-3050	2014-up FLT w/ CAN Bus.
32-3045	Optional USB Interface Cable

Daytona Twin Tec TCFI Gen 4 Auto Tune Fuel Injection Controller is fully programmable plug in replacement for the 36 pin Delphi controller with J1850 data bus.
Fits 2001-11 FXST, FLST, FXD, FLT ***Note:** Not legal for sale or use on pollution controlled vehicles. **VT No. 32-7400**

TBW System

Note: CAN bus system
For Harley-Davidson models, pre-2011, 2012 use analog signal, 2012-up using digital signal. CAN bus system is based on the digital signal. Analog signal runs by wire, so each commands need wire to connect. For digital signals, each command goes to ECM, and ECM gives the proper reaction. This is the basic idea, the real situation is more complicated.

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note for important information regarding emission control regulatory compliance and warranty information.

EFI Components

ThunderJet® Electronic Fuel Injection Manifold.

VT No.	Description
35-0154	4.975-4.980” Long Cylinders fits 117” Kit
35-0155	5.037” Long Cylinders fits 120” Kit

Ultima Extreme-Flow 55mm Intake Manifold features enhanced, 55mm air guzzling geometry and hand polished intake runner to provide uninhibited airflow to the engine. Cast aluminum construction withstands sustained high-engine temperature for reliability. Fits the stock throttle body. All models require ECM calibration. Fits 2018-24 FLST, FXST, 2017-23 FLHX and FLTRX, FLT except 2023-up FLHXSE, FLTRXSE.
VT No. 35-9356

Stock Intake Manifold are of cast alloy spigot type as original.

VT No.	OEM	Fits
35-9169	27019-89	1990-99 Evo
35-0652	27613-99	1999-17 Twin Cam

Billet Flange Set for use when installing larger throttle bodies for electronic fuel injection.
VT No. 35-0787

Induction Flange Set will adapt 34-0181 to 34-0705 Sifton breather bracket.
VT No. 34-1523

Regulator

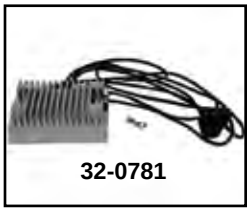

V-Fire and Accel Solid State Regulators

- Feature rugged aluminum alloy construction.
- Provide more accurately regulated voltage under all electrical loads.
- All units listed carry the full replacement warranty by Accel or V-Fire.

Accel brand is available in chrome, alloy or black stock finish with polished top fins. Volt Tech comes in black or chrome finish.

32-1478		2012-17 FXD, FXDWG

Some basic factoids about **3 Phase**...Most of the electric power in the world is **3 Phase**. The concept was originally conceived by Nikola Tesla and was proven that 3 Phase was far superior to single phase power. **3 Phase** power is typically 150% more efficient than single phase in the same power range. In a single phase unit the power falls to zero three times during each cycle in **3 Phase** it never drops to zero. The power deliver to the load is the same at any instant. Also, in **3 Phase** the conductors need only be 75% the size of conductors for single phase for the same power output. Therefore, a **3 Phase** system provides more current delivery for EFI and other electrical accessories and provides more charging power for increased battery life and easier starting. Not really much more complicated than single phase but much more efficient!

Charging Systems for Touring

Alternator Kit for FLT models include rotor, regulator, stator and hardware. Use **32-8926** or **32-0746** rotor only with **32-7780** kit, to produce 45 amp output.

Circuit Breaker Mount Frame Plate to be welded on. Fits1987-99 FXST.
VT No. 51-0583

Battery Cable

Extreme Duty Battery Cable Sets. These #2 gauge wires are very fat and flexible. The battery cables will transfer more cranking power with the very least amount of voltage drop. Over 2000 bare strands of copper are covered with special vinyl insulation that is covered by a synthetic thermo-rubber jacket. Sealed and insulated with black heat shrink tubing means no moisture will get in these cables.

Battery Cable Set

Four gauge battery cable set features a black finish with tinned copper strands. Sold as a set of 2 cables. Includes extra red shrink tubing and features 1/4" and 5/16" terminals.

Air Cleaner

Performance Round High Flow Air Cleaner Kit is center bolt style. The one-piece cast back plate is system machined to the throttle body to deliver a smooth uninterrupted flow, and shaped to permit air to enter around the perimeter of the air cleaner housing. The back plate is topped with a washable filter. This can be fitted with most round accessory center-bolt air cleaner covers. This kit includes air cleaner element, gloss black back plate, breather and all required hardware. Fits 2017-up FLHR, FLHT, FLHX, 2018-up FXBB, FXLR, FXFBS.

Super 'E'

S&S 1⅞ Super 'E' feature adjustable volume pump, enrichment device for ease of starting and a throttle spool assembly designed for late 2 cable operation. Supplied with tear drop air cleaner, mounting bracket and black fuel line. Super 'E' carburetor is approximately 1 7/16" shorter than the Super 'B' carb, making installation length of the Super 'E' the same as stock. Can be used with 3.5 or 5.0 gallon Fatbob tanks. The 1⅞" is for street stock applications. Intake manifold clamps or flanges must be purchased separately when they are required.

Carburetor Air Intake Snoot constructed of cast aluminum with a polished finish for S&S and shorty carburetor applications. Includes the carburetor air snoot door.

VT No.	Type
34-0470	Snoot
34-2766	Teardrop

Throttle Cable Adapter Block fits 1996-07 FLST, FLT, FXD, FXST, XL.

Internal Throttle

Wyatt Internal Throttle Sleeve. Custom design allows pull action of throttle cable for use with billet grips.
VT No. 36-0570

1. Cut 2⅜” off end of handlebar. Remove end of throttle handle that would attach to throttle cables.

2. Mark handlebar for inner throttle sleeve. Drill a hole for the set screw, this will hold throttle on the handlebar.

3. Remove set screw from the outer sleeve of spiral. Slide grip on and mark end of grip on the handlebar. Measure from this mark back to set screw in outer sleeve. This measurement will be used to mark and drill the throttle grip. Once drilled install grip. Use a small amount of Loctite® on set screw for final installation.

4. **Note:** Set Screw (A) should not be tightened so as to make contact with handlebar as it will prevent throttle from turning.

Internal Throttle/Clutch Unit features ball and needle bearing construction with built in return spring.
VT No. 36-0789

Twist Grip Kit with cables features the push-pull type for Keihin butterfly and CV type carburetors. Includes 2 stock length black cables and twist throttle and grip set.

York Clutch Cable

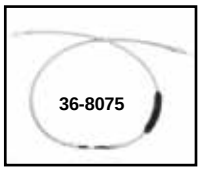

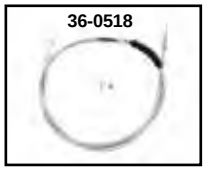

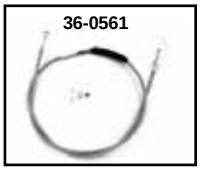

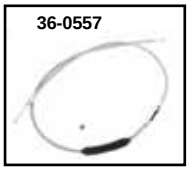

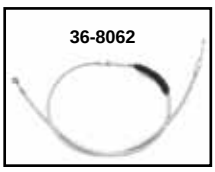

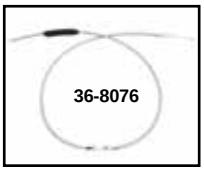

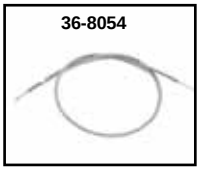

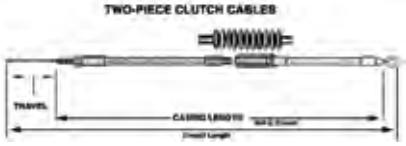

Full Stainless Braid Covering with Clear Coat

Cables are constructed with the Supra™ stainless steel braid which is tightly woven for a bright, quality consistent finish. The clear coat is UV resistant, heat bonded, non-yellowing grade for a long service life. All applications include the correct fittings, adjuster & inner lengths for an exact installation and fit.

Clutch Cables feature heavy duty construction designed for reliability and longer service. By V-Twin in black vinyl or braided stainless covering.

Clutch Cables feature heavy duty construction designed for reliability and longer service. By V-Twin in black vinyl or braided stainless covering.

Quick Connect Upper Clutch Cables economically replace the OE upper cable section on select models. Easily and quickly connects to the existing over cable section. Significantly reduces installation time, plus there's no need to drain transmission fluid. Unique design reuses OE cover and housing parts. Low effort, high efficiency cable design meets or exceeds OE specification for fitment construction and endurance.

Cable

Throttle Idle Clips, Cable Retaining Clips & Ferrules. Sold in 10 pack.

Gas Tank 2" Lift Kit VT No. 38-0855

Important Gas Tank Information: All tanks are shipped unpainted unless otherwise noted. Caps and petcocks are not included. Carefully check the new tank for flaws and fit before painting. **Do not grind or sand the seams or joints**. Clean the inside of the tank and it is suggested to pressure test and use a tank sealer. Check petcock openings, making sure the petcock can be easily installed. Use proper hardware to mount tank, including the bushings, brackets and spacers required for assembly. Tedd Cycle, Inc. is not liable for paint work or labor claims of any kind. Tedd Cycle, Inc. is not the manufacturer of the gas tanks.

For Measurements of Our Gas Tanks see our website www.vtwinmfg.com

Chrome Oil Gauge Cover is machined of alloy, with square hole in bottom.
VT No. 40-0448

Developed by Marty MacCollum, USA Racing 1987

Sifton Oil Pre-Filters are constructed of machined alloy with a #40 mesh screen installed to trap large debris and a circular magnetic collar to collect the ultra fine ferrous particles before they reach the engine. Unit can be installed in the following locations for ⅜" inner diameter oil line:

- Supply line before the engine on all models
- Primary scavenger return line on Early FLH and FX models
- Return line to oil tank on FL-EL-UL and models without a factory filter
- External oil return on high performance heads.
- Any pressure supply or return (use the prelifter with the ⅛" NPT body).

The ½" unit recommended for Softail TC-88 models on the path between the cam bearing housing and oil pump.

VT No.	Type	Hose

Die Cast Primary Covers are manufactured from a casting process. It is the nature of parts produced from this process to have small random subsurface imperfections that can be uncovered during the polishing process. These may appear as very small cosmetic imperfections after chrome plating. We also do not polish in areas that are not readily visible once assembled on the motorcycle or by polishing machines such as small depressions or tight corners. As these conditions are common in polished and chrome-plated castings, a reasonable standard of acceptability has been established to bring you the highest quality product at an affordable price. This part meets Perma Chrome™ cosmetic standard. The aforementioned cosmetic conditions are considered reasonable for this part and are not considered warrantable.

Outer Primary

Note: Big Twin Outer Primary Covers are from new die cast tooling to replace stock parts. Kits include chrome primary cover, chrome allen screws, outer cover starter bearing and gaskets for derby, inspection and outer covers. All other covers are sold as cover only.

Chrome 3-D Derby Cover features concealed mounting by use of plate which installs like a derby cover. The 3-D spinner cover mounts to stud on plate and held firmly in place by O-ring. The red backing plate can be painted to match color scheme. **VT No. 42-0108**

Primary Hardware

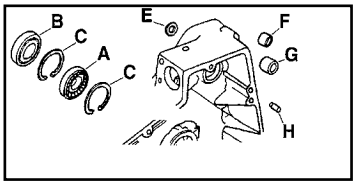

Late 1984-17 Big Twin Inner Primary Bearing supports transmission mainshaft at inner primary area. Available in OEM floating style roller bearing *Type (B)* which requires purchase of the inner sleeve, 17-9941. *Type (A)* is the double sealed ball bearing style which does not require the sleeve.

VT No.	Type
12-9935	Sealed Ball Bearing (A)
12-0357	Stock Roller Bearing (B)
12-1279	Bearing Only, 2007-17 (B)
17-9941	1984-05 Sleeve

Stepped Inner Primary Bearing Race for all 1991-05 Big Twins features an extra step on the inside diameter that acts as a stop on the transmission mainshaft. When the race is pressed on the shaft the step will not allow the race to move inward toward mainshaft seal.
VT No. 17-0465

Wheel Assemblies

Rear Wheel Assemblies for left hand drive with 2000-up hub for Softail models tube type or tubeless application. Wheels have extension on pulley side to minimize pulley spacers and bearing is moved outboard to prevent bent axles. Rear wheels accept 11½” disc rotors. Single flange are for right side drive. The 1984-99 hub types use Timken bearings and the 2000-up hub types use sealed bearings without ABS. 1” axle size.

Mid-Frame Dyna Deflector
Improve rider comfort during the summer riding season. Designed for severe duty and extreme temperature applications, these conspicuous deflectors attach to the frame and surround the top of the rear cylinder head. The scoop shape captures the moving air and uses the flow to direct the heat down and away from rider to improve comfort. Kit includes all required mounting hardware. Fits 2006-17 Dyna, 06-11 require the removal of the original equipment coil cover. **VT No. 42-0147**

Linkert Carb included

Replica Knucklehead Long Block is fitted with V-Twin Mfg.'s replica exhaust system produced with our world exclusive tooling and fixtures.

Replica 74" Long Block Knucklehead with natural rocker boxes, parkerized valve cover cups and a Linkert 4-bolt manifold. See web for details.
VT No. 10-1377

Over 500 Long Blocks Sold!

Replica 74" Long Block Knucklehead
• Features polished rocker boxes, parkerized valve cover cups and a Linkert "baby butt" manifold.
• Fully assembled and tested for oil pressure.
• Includes the motor sprocket and 18mm spark plug set. **VT No. 10-1393**

Replica V-Twin™ Mfg. Knucklehead Long Block
• Shipped fully assembled less carburetor and generator and shop tested for oil pressure.
Components used in the assembly include:
• **Crank Case Replica V-Twin Mfg.** with authentic cast profiles. Including relay and number bosses.
• **Rocker Boxes** with natural finish and overhead oiler provision from timing cover.
• **Heads** newly casted Knuckleheads with parkerized lower valve cover cups and tops.
• **Flywheels** are cast iron type, assembled with stock rods and Torrington rollers with steel cages at sprocket and pinion shaft ends.
• **Valve Train** includes solid tappet assemblies with Sifton lightning cam, Sifton solid stock pushrods and chrome pushrod covers.
• **Cast Iron Cylinders** fitted with 8.5:1 cast pistons and Hastings rings
• **Oil Pump V-Twin Replica** cast iron with early iron cover
• **Distributor mechanical advance** with corresponding relay mount with distributor post guide slot
• **Intake Manifold** Linkert style 4 bolt manifold with plumber style nuts and brass seals.

Flywheel Assembly with 4⅝” stroker is for 1973-84 Big Twins. These flywheels are machined from heat treated steel forgings which makes them structurally superior to cast iron designs. Flywheels are assembled with heavy duty rod set, trued and balanced for pistons listed. Piston sets must be ordered separately.
VT No. 10-0038

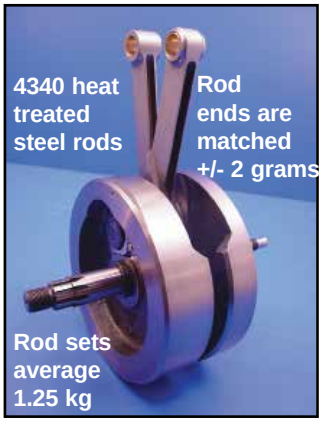

Replica Flywheel Sets feature cast construction to accept OE style components.

CLASSIC

Big Twin Oil Pump Assembly

Sifton™ Oil Pump Assembly features improved oil pump pressure regulation that will ensure correct oiling to all areas of Big Twin engines. This pump kit includes all necessary fittings, snap rings, keys, gaskets and mounting bolts. Can be used on either chain drive or belt drive models. **Note:** On 1970-80 models a drilling operation is required, use **VT No. 16-0986** drill fixture. Available with breather gear kit. Oil pump kits with breather include drive gear, breather gear and washers, uses S&S style gaskets.

12-8001	1936-72
12-8002	1973-91

Oil Pump Kits with Breather Assembly
12-8008 1973-91

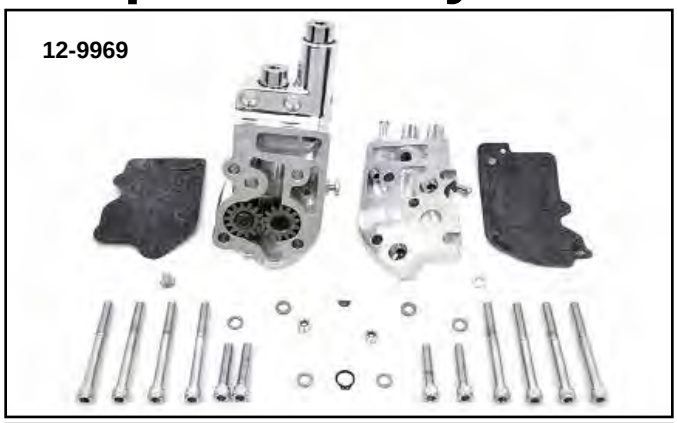

S&S Oil Pump Gasket and Master Rebuild Kits are available with paper or mylar gaskets. Gasket kits include inner and outer gaskets, drive shaft key and snap ring. Master rebuild kits include seal, snap rings, springs, ball, inner and outer gasket, O-rings, and keys.

Gasket Kit	Master Rebuild Kit	Type	Year
15-0657	—	Mylar	1936-91
15-0658	**15-0361**	Paper	1936-91
15-0362	**15-0364**	Mylar	1992-99

Note: S&S Oil Pumps are machined for two basic groups 1936-72 and 1973-91. Installations on engines from 1936-1969 and 1981-91 are strictly bolt on and require no modifications. Engines from 1970-80 require a simple drilling step and engines from 1970-72 require a plugging step. Both steps can be performed while the engine is still in the chassis. All 1973-76 applications require 1977-up diameter pinion and cam gears.

Rear Chain Oiler Fitting fits 1941-69 FL, zinc. Fitting is positioned between the oil pressure gauge and oil pump fitting. **VT No. 12-1280**

Oil Pump Assembly for Big Twins is high-quality replacement cast aluminum pump body with steel gears and shafts. Features cast aluminum finish. Gaskets and seals included. Mount hardware sold separately. **Note:** 1973-80 models may require drilling of crank case use drill jig **VT No. 16-0986.**

SIFTON MOTORCYCLE PRODUCTS

Taper Lite Adjustable Pushrod Set f 1966-84 are manufactured from 4130 steel. Use with stock hydraulic lifters.
VT No. 11-9704

Solid Pushrod Conversion fit 1966-84 Shovelheads. We put the adjuster into the lifter body to increase the stability of the pushrod at greater angles. A tapered split lock nut is used for the best way to lock the adjusting bolt into the lifter body. We use a 5⁄16 -32 extra fine thread for easier and close adjustments. Pushrods are long enough to accommodate engines with stroker cylinders. Alloy pushrods have hardened steel tips.
VT No. 11-9535

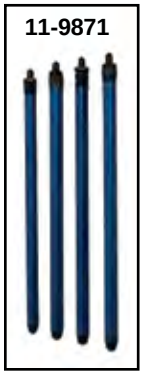

Solid Tappet Kits for 1966-84 Shovelhead are made from aircraft quality 4130 seamless chromoly tubing. Each set includes 4 pushrods and 4 adjustable solid lifter adapters. Smaller diameter than most moly pushrod sets for clearance in pushrod cover tubes. Instructions included. Fit stock or .200 longer stroker cylinders.
VT No. 11-9545

Replacement Nuts fit each brand of pushrods or tappets.

14-0451	1936-40 Seal Kit with extension tubes	

Sifton Valve Stem Seal features a Viton seal with double coil spring for tension, and steel band to secure to guide. Fits 1978-84 Shovelhead. **VT No. 14-0973**

Sifton Veloprene Coated Valve Stem Seal Set for Big Twin provide maximum valve stem oil control as seals wipe excess oil from the valve stem by means of a unique spring loaded wiper assembly which prevents unwanted oil from reaching and contaminating the cylinder. Machining required. Fits 1948-84.**VT No. 14-0259**

Valve Spring

13-2110

Kibblewhite Lightweight Valve Spring Kits include springs, keepers, upper retainer, and steel lower collars. Note: 13-2115 are for use with valve guides that have a .625 top O.D.

74" and 80" Shovelhead, 1966-84

VT No.	Type
13-2110	Has 160 lb seat pressure, up to .600" valve travel. Hard-anodized aluminum upper retainers. Use on 1966-E79.
13-2115	Has 160 lb seat pressure up to .600" valve travel. Steel upper retainers. Uses on L1979-84.

11-2020

Kibblewhite Valve Spring Retainers and Keeper Sets. Keepers are CNC machined and then heat treated.

Keeper Set

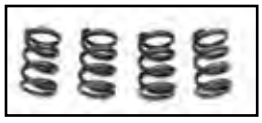

11-2021 Pan/Shovelhead

Upper Retainer Sets

11-2020 Pan/Shovel Titanium Offset 0.070" to allow more installed spring height.

11-4248 Pan/Shovel Aluminum Offset 0.070" to allow more installed spring height.

11-2022 Lower collar set. Pan/Shovelhead machined to work with .562" diameter guide seals and counter Bored for added clearance.

Kibblewhite Big Twin Valve Spring Set for high lift cams can be used with stock retainers and lower collars for up to .600" lift. Fits 1948-84.

VT No. 13-2000

Valve Spring

MANLEY

Manley 1948-79 Valve Spring Kits 74 and 80 FL-FX .495 Lift Kits except Evo

VT No.	Collars Top	Combined Loads	Coil Bind	Recommended Cam Lift
11-9229	Titanium	140 @ 1.480 300 @ 1.000	.950	Stock-.500"

The above ".495" lift kits do not require cylinder head machining for installation. These kits are supplied with lower collars that allow additional spring travel as compared to stock collar and provides these kits the ability to accept camshafts up to .495" lift. Note: 11-9229 is for stock stem diameter valves.

Manley Valve Kits.

74 and 80 FL-FX .500"-.600" Lift Kit except Evo

VT No.	Combined Coil Loads	Recommended Bind	Cam Lift
11-9612	180 @ 1.600 320 @ 1.100 360 @ 1.000	.930	.500-.600

The above kit features tri-spring (outer-intermediate-inner) interference fit to reduce harmonics and control spring surge. Additional machining is required to lower the height of the valve guide to avoid interference with the top collar. Springs have more pressure than stock but can be used with .500" lift or .600" lift cams. Includes titanium top collars.

74 and 80 FL-FX .465" Lift Kit except Evo

VT No.	Combined Coil Loads	Recommended Bind	Cam Lift
11-9613	150 @ 1.450 300 @ 1.000	.950	Stock .465

The above kit does not require machining for installation. However, do not exceed .465 lift due to the potentially high stress on the springs. The springs are interference fit to help the harmonics. Supplied with steel top collars. Use with stock stem diameter valves only.

Sifton Valve Spring Kits feature four double matched competition springs. Fits 1941-84 FX-FL, order top colored collars separately from this page. Mfg# 3030.

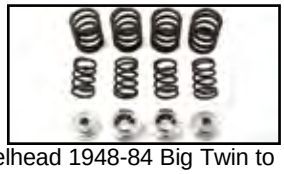

VT No. 11-9618

Valve and Spring Kit by Sifton for Shovelheads includes two intake and two exhaust valves with nitrated finish, complete spring set and keepers with upper and lower collars. Four piece valve set available separately.

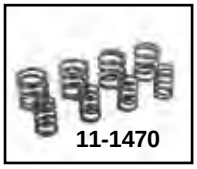

VT No.	Year	Item

Valves by Precision Machining (Kibblewhite). Intake valves are made of 8645 heat treated valve steel and the exhaust valves are made of 21-2N heat treated non-magnetic stainless steel. These valves are available with the following stems and heads:

(1) **Racing by Kibblewhite Precision Machining** feature a sharper profile angle to maximize flow, 11-6015 has 2.00 head, 11-6016 has 1.812 head, 11-6017 has 1.780 head.

(2) **Black Diamond:** One piece stainless steel valve with a stellite tip and black nitrone impregnated stem to improve wear properties and reduce friction.

Manley Stainless Valve machined from 1-piece forging with a swirl polished finish and chrome plated stem. Sold pairs.

SHOP TIP Piston Installation
Caution: Do not install piston pin without lubricating it first with motor oil or assembly lube. Touch up outer edges of piston pins with emery cloth before installation.
1. Refer to applicable service manual for proper installation methods.
2. Piston should be measured front-to-rear at the base of piston skirt, perpendicular to wrist pin.
3. Piston should be set-up with the following tolerances:
Recommended piston/cylinder running clearances:

	Minimum	Maximum	Preferred
Evolution® Models (Aluminum Cylinders)	.0015	.0022	.002
Big Twin Models (Cast Iron Cylinders)	.0015	.003	.0025
Sportster Models (Cast Iron Cylinders)	.003	.004	.0035

Specifications for ring end-gap are supplied with the ring sets and vary by type and size.
Note: Run engine at moderate speeds for at least 500 miles, avoiding excessive running in lower gears, in order to properly break-in new pistons and rings.

Raw	Chrome
18-3159	**18-0526**

Barnett Scorpion Clutch Kit features over twice as much friction surface area compared to stock clutch. All Scorpion clutches provide a positive engagement and release. Scorpion clutches incorporate 6 heavy duty coil springs. In addition, an extra spring set with a different spring rate is included which allows the clutch to be tuned for street or race application depending on usage. Tunability is easy without removal of the primary cover. Barnett Friction Plates are compatible with any primary oil. Kit is designed to be used with stock type clutch basket. Fits 1936-Early84.
VT No. 18-3822

Clutch Set

Extreme Duty Police Service Clutch Set is an original molded fiber over metal replacement clutch set for Big Twins 1936-84. It is superior to stock or competition units in that fiber is integrally molded to plates, not glued on and holds constant thickness under heat. The1968-84 type is also available bonded to alloy plate for lighter weight. Use steel plate VT No. 18-3652 when installing.

VT No.	Years	Type	Plates	Material
18-1124	1936-67	Steel	3½	Fiber
18-1121	1968-84	Steel	5	Fiber
18-0150	1968-84	Steel	5	V-Prene
18-1122	1968-84	Alloy	5	Fiber

Steel Plates. Note 18-8301 has smaller lug cut.

18-8287	Rattler	1941-67	Alto

V-Prene Clutch Kit for 1941-84 Big Twin includes 5 friction and 4 steel plates.
VT No. 18-0172

Red Eagle Clutch Set by Alto is available in fibers and steel. Sold as V-Prene or Red Eagle type. Both are bonded to steel.

VT No.	Year	Type
18-8277	1941-67	Red Eagle, requires extra steel plate
18-8279	1968-83	Red Eagle
18-8280	1968-83	V-Prene

Barnett Series K Clutch performs flawlessly under extreme heat conditions with smooth precise shifting. The steel backing plates have maximum strength and V-Prene friction plate is the most durable friction material made.

Fits 1941-83. Note: Made to run wet or dry in a sealed primary. Incidental oil from primary chain will not affect clutch operation. One extra steel plate is required for 1967 and older models. Rivets are sold in a pack of 25.

VT No.	Item	Year

	20-0180	1 1/8"
	20-0134	1 3/8"

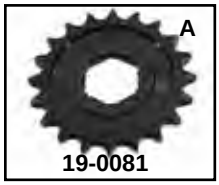

Rear Pulley or Rotor Spacer is ideal to get belt pulleys or chain sprockets in line. These spacers can also be used as a disc spacer. Spacer can be machined down to the next size under without having to worry about the spigot alignment, when you machine the face of the spacer down to the desired thickness on spacers with spigot. Spacers are drilled for use with 7/16" bolts. I.D. is 2 1/16" for 1980-99.

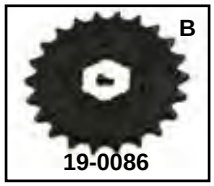

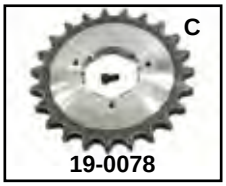

Rear Chain Tensioner by LBV reduces chain vibration and frequency of adjustment by utilizing a durable urethane roller which revolves on sealed bearings mounted on chrome anchor plates.

Forward Shifter Kit

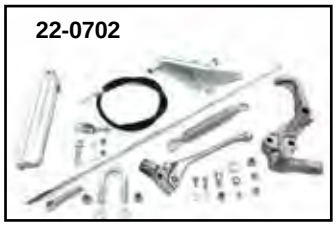

Softail Style Replica Forward Shifter Kit is complete with all hardware necessary for installation on 1952-84 4-speed. Use in conjunction with our FXST replica controls listed, as all kits place pegs in a forward position. Foot rests on peg while shifting for added comfort. This is an exact stock replacement in chrome for 1980-85 FXWG. Kit includes chrome heavy duty shifter bracket, inner lever, shifter lever, rod, rubber shifter peg and foot peg, all which is display packaged and labeled with detailed instructions and assembly diagram for each model listed below.

Forward Brake Control Kit

FXST Replica Forward Brake Control for use on all 1970-99 Big Twin with Shovelhead or Evolution engines equipped with hydraulic disc or drum brakes. Designed after the 1984-99 FXST which places the driver peg in back of the brake pedal, so the brake is easier to operate from this comfortable position. Redesigned to accept a Wagner or Kelsey-Hayes style master cylinder or GMA masters, also available with chrome KH or Wagner style masters. Hardware includes linkage pedal mount plate, rubber covered footpeg. This kit is the exact compliment to our shifter kits listed and when used with one of these kits, places the pegs in forward and raised position.

10mm Street Legal Universal Brake Lines are build it yourself line assemblies ready for adapter fittings. They are preassembled with high performance #3 stainless braided hose with a rugged veloprene coated inner, and crimp-on chrome plated female swivel hose ends. Clear coated for abrasion resistance. Meet the guidelines of the D.O.T. MVSS-106 requirements and are 50-state legal, and compatible with all brake fluids.

1973-84 Big Twin Rear Disc Kit

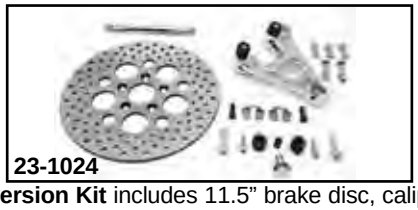

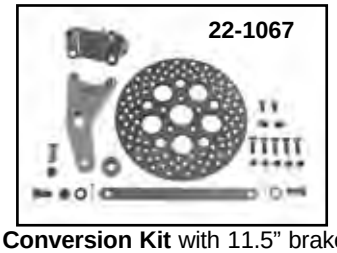

Caliper Conversion Kit includes 11.5” brake disc, caliper mounting bracket and caliper assembly. It helps eliminate caliper rattle and chatter.

VT No.	Rotor	Year	Caliper
23-2216	Steel	1973-82	Black
23-2214	Stainless	1973-82	Black
23-1109	Stainless	1973-82	Chrome
23-1024	Stainless	1982-86	Black

11.5”

Caliper Conversion Kit with 11.5” brake disc updates 1973-82 FX-FL models from 10” to 11.5” brake discs. Includes caliper bracket, 11.5” drilled brake disc in stainless or zinc plated steel, mount bolts and the dual piston caliper. By converting to this style caliper, rattle and chatter will be eliminated and a much greater stopping power will be achieved. Calipers should be used with master cylinders listed below. Use with ⅝” bore master cylinder.

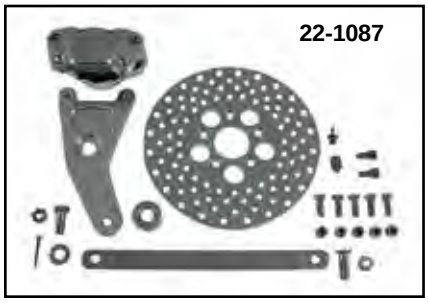

VT No.	Item	Brand
22-1067	11.5” Kit with Stainless Steel Disc	GMA
22-1068	11.5” Kit Complete with Steel Disc	GMA

Brake Disc Pad Set

Brake Pad Assortment. VT No. 23-0000

Brake Disc Pads are available in **Duro** or **SBS brand**. **Duro, Duro Disc Kevlar** for excellent stopping on all types of disc brake rotors. **Duro Roto**r replacement pads are a soft organic compound designed to be compatible to all types of brake rotor. **SBS brand** is available in **Sintered, Ceramic or Carbon Tech** compounds. **Sintered Metal Pads** provides maximum stopping power but can never be used in calipers that were originally equipped with non-sintered pads. Works best with stainless steel brake rotors. **Ceramic Pads** are designed for general purpose use on carbon steel brake rotor and can be used on calipers originally equipped with sintered metal brake pads. **Carbon Tech Pads** designed for use in all stock or aftermarket calipers. Works well with stainless steel or cast iron rotors. **Veloprene** is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.

41mm 10” Dual Disc Fork Assembly

Glide Fork Assembly with chrome sliders accepts left side drum brake. Assembly features black triple trees without lock tab and 3” center to center spacing which will accept rubber bushing kit.
VT No. 24-0867

The V-Twin™ Fork Assembly is shipped complete with axle, axle nut, spacer, top nut, bearings, cone nut, dust cover, triple trees, fork tubes and sliders. Fork tubes and sliders are fully assembled with internals. Final assembly of the remaining components is done by the dealer. Every leg assembly is shipped dry. We recommend use of the appropriate fork oil such as Type B. The amount of fork oil to add varies by model. A FX will need about 6 oz per leg, a FL will need about 8.5 oz per leg and a FXWG needs about 10 oz per leg. Due to oil cling, a dry fork leg needs about 1 oz more to fill than a drained leg would require.

41mm Glide Fork Assemblies include forged chrome replica triple trees and hard chrome tubes on stock length forks, chrome tubes on overstock length and polished or chrome lower legs with all internals installed less hardware. Stock overall length is 31”.

FXWG Style Dual Disc Fork/Wheel and Caliper Assemblies to fit 1948-99 Big Twin FL-FX-FXWG feature polished or chromed lower sliders without reflector boss, hard chrome fork tubes and internals installed. Includes chrome trees with 1” diameter stem and frame lock tab, neck bearings, axle spacer and top nut. Stock length is 31” overall. Kit also includes 21” all chrome assembled wheel with bearings, drilled 10” steel brake discs with chrome screws, and choice of black or chrome dual disc calipers complete with pads. VT No. 24-9947 has smooth lower legs.

Chrome Top Fork Tube Plug fits 1952-71 33.4 mm tubes. Replaces 45756-59. Sold each.
VT No. 7621-1

Attention!!
These fork tubes have been manufactured and tested for exact fit and application per model. It can be difficult to identify the front end assemblies because they may not always be original equipment. Before installing, compare old and new tubes. Be sure the stock top plugs fit into the new fork tubes. To avoid scratching the chrome, we suggest that the tubes be lightly rubbed with oil before installing into fork legs. Be absolutely sure you have the right tubes before you install them. No fork tubes can be accepted for return that are scratched or damaged due to improper installation or handling.

V-Twin Replica Motorcycle Kit

V-Twin Replica Knucklehead
This machine is recreated with the original *Bobber* styling of the late 1940's, utilizing the full range of V-Twin Replica Parts. Engine details include cast motor case with relay and number boss, but reinforced at cylinder base area for added strength. Knuckleheads are replicated from ductile cast iron with accurately formed valve cover set and plumber style manifold. Foot Shift model includes handshift gate and handle for decoration only. Other components in assembly include:

- 29° V-Twin Replica frame
- Replica Knuckle Tanks
- Chopper Solo Seat
- 16" Rear and 18" Front Wheel
- Chrome Stock Inline Spring Fork

We've done your homework on this one!

- V-Twin Replica Motorcycle Kits are equipped with all the necessary parts except gas, oil and battery electrolyte!
- All components used throughout the assembly have been selected for each particular year of application.
- Engine is completely assembled pre-run and tested for oil pressure
- Transmission completely assembled
- Wheels, laced and trued in our facility with bearings pre-set

Toolbox Bracket Details

V-Twin™ Replica Knucklehead Frame

- Authentic reproduction of the factory version.
- Forged parts as original in neck, front and rear engine mounts, side car loops, top seat yoke, footboard tabs and rear axle plates.
- Brazed parts: Top motor mount, front tank mount, sidecar loops, foot-board mount, transmission strap, center post strap, rear fender cross bar saddles, oil tank mount and upper rear frame bars at tank tube
- Exact blanked and formed stampings are utilized in appropriate areas.
- Rear fender cross bar is supported by exact duplicated "saddles" brazed at each end. Seat post and mechanical brake cross shaft bushings, correct tool box mount and grease fittings are installed.
- The 28° or 29° neck angle will accept inline spring forks.
- Frame accommodate Knucklehead or Big Twin Flathead Engines and 3 or 4 Speed transmission only.
- Knucklehead frames require purchase of clamp on coil bracket kit VT No. 49-0099.

Accepts Knucklehead or BT Flathead engine and 3 or 4-speed transmission. Includes seat post, brake cross shaft, rear axle assembly, transmission plate and a motor alignment plate for safer shipping. Cross shaft bushings, tool box mount and grease fittings are installed.

***Note:** Includes seat post, transmission plate and axle assembly.

***Note:** For original look on rear axle plates, the rear brake slot on the left side must be cut out at the front. We have left this closed for builder to remove as desired. ***Note:** Seat post and cross shaft bushings may require further reaming for proper fit.

V-Twin Replica Knucklehead Frame

1936-40 Neck has original forge mark!

Over 8,000 served *since* 1995!

Replica Frames with accoutrements as shown on detailed areas make this the premier frame in the industry.

The Construction

V-Twin™ Replica Frames feature steel forgings in neck, front and rear engine mounts, rear axle plates, swingarm and shock mounts. In this process, the steel is first fired as red hot ingot, next huge hammers compact and orient the grain structure into a rough shape of the parts. Subsequent hits form the part into its final shape, after which it is machined and heat treated which results in increased strength and resistance to wear. The related components used in construction are accurately formed stampings and drawn over mandrel seamless tubing which is tig welded together during final assembly.

Steel Parts deliver full strength and exact detail in front engine and side car lugs.

Forged Neck yields the hallmark look of this replica, which will accept a neck lock and glide damper stud. Top engine mount has key hole slot which is the 1953-57 type. Spark and throttle cable mount tabs are also provided.

Brazed Joints

Rear Engine and Front Transmission Mount is of forged steel, with bushing installed. Transmission mounts incorporate a formed reinforcement strap to connect the two tier support strap assembly, all of which is constructed accurately of blanked and formed stampings.

1948 Replica Panhead

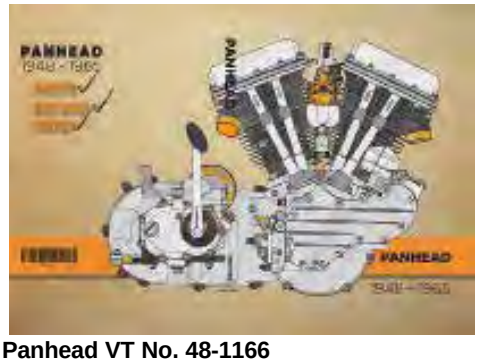

Our Replica is supplied with all the options included. There are no extras. There is nothing else to buy. You can plan your construction project up front and actually be able to visualize the end result. You will not end up spending extra time and money searching for parts that are virtually impossible to find. In the long run, you would spend more time and money on parts than you would the V-Twin kit.

Industry First!
First Assembly done Raw Finish in 1998!

- Available as a complete project kit based on an authentic **V-Twin Replica Wishbone Frame.**
- Unassembled kit is available with parts necessary to complete an entire Exemplar Panhead.
- Kits are available in either chrome, with chrome plated components and accessories, or as a restoration style with restoration finishes of black and parkerized components.
- Choose hand or foot shift control assemblies for desired configuration.
- Supplied with a completely assembled and test run 74" V-Twin Replica Panhead™ engine with either aluminum or chrome detailing.
- Pre-wired dash base assembly
- Parts book and maintenance manual included
- 4-Speed early transmission is assembled into the V-Twin™ Replica 4-Speed gear box, complete with ratchet top and chrome or restoration particulars.
- See the V-Twin Mfg.™ catalog for details on all items included in this kit.
- Replica Motorcycle Kits are sold as component parts. Manufacturer's Statement of Origin (MSO) is supplied for the frame and engine.
- Check your state for registration, title and licensing requirements.

Replica Straight Leg Frame

Replica Straight Leg Rigid Frame with cross tube is for chain drive models. This frame is an authentic reproduction of the 1954-1957 straight leg frame with a stock 30° neck rake. Details include forged parts as original neck, front and rear engine mount, side car mounts, top seat yoke, axle, seat post and footboard tabs. Front engine mount spacer will allow installation of a Knucklehead or Flathead engine. Cross shaft may be removed for use with hydraulic or disc brakes. Disc or drum brake tabs are available separately. Seat post bushing and mechanical brake cross tube bushing may require reaming prior to assembly. The frame has an indent on the left lower rear frame bar for tooling fixture. A Bill of Sale is supplied.

55-2525	1958 Panhead Rolling Chassis
55-2526	1973 Shovelhead

Forged Neck is accomplished in 4 stages.

The Forging Process

In this process, the steel is first fired as red hot ingot, next huge hammers compact and orient the grain structure into a rough shape of the part, subsequent hits form the part into its final shape, after which it is machined and heat treated which results in increased strength and resistance to wear.

Retro Rigid™

Cincy Flyer from the 2008 show, built with the 51-1957 frame.

51-1948

51-1957

Replica Retro Rigid Frame features original style construction including forged parts in neck, side car mounts and rear axle areas. 10¾" between the rear axle plate. Order rear mount for TC-88 models separately.

Frame will accept:

- Evolution or TC-88 engine, Shovelhead, Panhead, Knucklehead
- 5 or 6 Speed Softail Transmission
- Flatside Tanks
- Softail Oil Tank
- 230 Rear Tire with chain
- 200 Rear Tire with belt

+2" Raised Neck

- Stock Rake, 30°
- Order related parts separately.
- **44-1942** axle kit
- **44-1946** axle collars

Sissy Bar Inserts mount with screws to cross bar.
VT No. **Type**
50-0820 Chrome Maltese
42-0156 Live to Ride
48-1203 Finger Silver Patina

- Features a raised up axle position, so this lowers the swingarm and chassis in relation to the axle.
- Axle slots are ¾", for disc brake applications. Swingarm is for use with 4 speed models.
- Lowers bike 2" and lengthens wheel base ½". Axle lowering plates take screw type adjusters. The blocks also have tabs to mount a sissy bar or fender brace to facilitate mounting the rear fender to the swingarm, for the "floating" rear fender look. There are 5/16" x 18 drilled and tapped holes on the swing arm for mounting and "floating". Order swingarm pivot pin assembly separately.
- Race is installed, but the bearings are not included

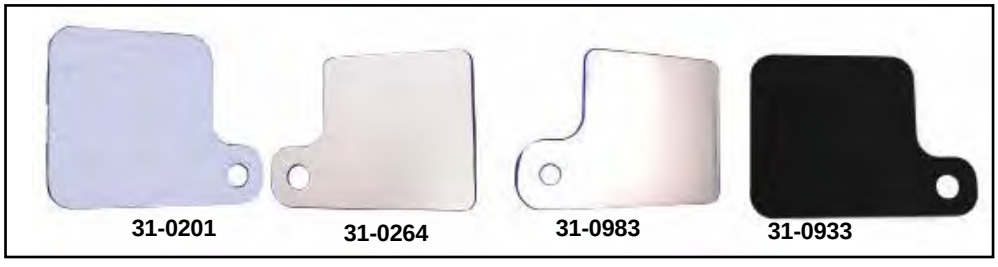

Lowered Rear Axle Plate Set for threaded ⅜"-18 for fender brace sissy bar mounting. Adjusters threaded 3/8"-24 use screws for adjusters, to act as push type. Features a raw cast steel construction.
VT No. 51-1322

Ignition System

V-Fire Ignition Systems fit all 1970-98 carbureted models and requires sensor cup for 1982 and earlier applications. Order tach interface, sensor cup and screw separately if required. **Note: Order Coils When Required.**

VT No.	Fits
32-9500	Single Fire Ignition fits Evo, Shovel and Sportster to 1997. It can be set for Street or Race-Electric or Kick Starter includes rear cylinder timing adjustment for rate of advance. Compatible w/single fire coils.
32-9503	Single Fire Ignition Kit fits As Above Includes coil, 8.5mm wires and sensor cup
32-0588	8.5mm Wire Set

V Fire Ignition Kits are available in ***dual fire*** where there are 2 sparks at the same time and ***single fire*** where there is 1 spark for each cylinder when it is fired, (separate). Each kit includes a mechanical advance unit and all hardware. Order coil separately 32-0467 coil has 2 separate coils inside to fire independently.

VT No.	Type	Coil
32-0468	Dual Fire	**32-0511**
32-0469	Single Fire	**32-0467**
32-1913	Single Fire	**32-0467**

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke.
This is the way the stock motor works on pre TC-88 motors.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

Daytona Twin Tec External Ignition Kit for 1970-84 FL and 1971-84 FX models. Dual fire electronic ignition system which includes trigger rotor for mechanical advance mechanism. Features a digital set RPM limiter in 200 RPM steps from 5,200 to 7,000, status LED for static timing, electronic dwell for maximum ignition energy at high RPM, reduced current draw at low RPM, and a simple two wire hook up. Reliable starting in all conditions by operating down to below 6 volts, and is rated to operate at 260°F. **VT No. 32-1036**

Daytona Twin Tec

Daytona Twin Tec Internal Ignition Kit for 1984-99 Evolution Big Twin, 1970-84 Shovelhead Big Twin and 1971-97 Sportster models. Kit includes ignition, coil and spark plug wire set.

VT No.	Item
32-3015	Kit
32-3054	As Above, ARB compliant E.O. No. D-641- and D-641-2

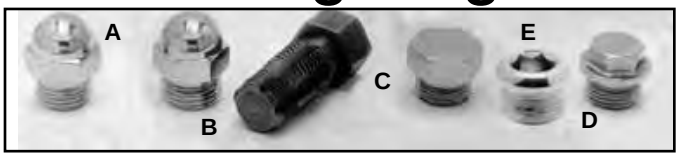

Twin Tec Internal Ignition for 1970-99 models. Two advance curve families with adjustable advance slope accommodate stock to highly modified engines. It features digitally set RPM Limit (100 RPM Steps) and selectable single or dual fire mode. Coil outputs are protected against short circuits.

VT No.	Item
32-1005	Ignition
32-3053	As Above ARB E.O. No. D641-1
32-2013	3 Ohm Coil Single Fire

Timing Plugs

Timing Plugs are available in stock size ⅝ — 18 thread unless noted as oversize (O.S) which is 1 1/16 — 16 thread.

A. Acorn style plug fits all models Big Twin models timing plug holes and oil tanks.

VT No.	Type
7106-1	Chrome

B. Acorn style plug with oversize thread and one tap for rethreading stripped out timing hole. Fits all timing holes.

VT No.	Type
7500-2	Plug and Tap (Oversize)
7501-1	Plug Only (Oversize)
9407-1	1 1/16"—16 Tap (Oversize)

DYNA Ignition

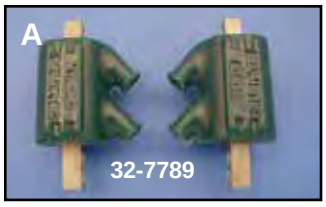

Dyna S Performance Ignition Systems. Available in dual or single fire for street applications only. Each kit includes sensor plate assembly and correct coil for each application. Single plug only. 1980-up applications require 32-7510 advance mechanism.

VT No.	#	Type
32-0800	DSK-6-2	Single Fire
32-0801	SDK-6-1	Dual Fire

Replacement Rotor for Dyna Ignitions.

VT No.	Fits
32-9300	DS-6-1
32-9301	DS-6-2

Dyna Coils. 35,000 volt! Works with all points ignitions, aftermarket or factory electronic ignitions. Note: 32-7792 is electronic, 32-7793 is for points ignition.

VT No.	#	Volt	Ohm	Dyna	Type	U/M
32-7789	A	12V	3	DC-1	Angle, Dual	Pair
32-7790	A	6V	1½	DC-2	Angle, Dual	Pair
Use 2 for dual plug heads						
32-7792	C	12V	3	DC-6	Stock, Dual	Each
32-7793*	C	12V	5	DC-7	Stock, Dual	Each
32-8055	B	12V	3	DC-3	Angle, Single	Pair
32-8086	A	12V	5	DC-8	Angle, Dual	Pair
32-9035	B	12V	5	DC-10-1	Angle, Single	Pair

***Note:** Use 2 for single fire ignition.

K.V. Recommends the following coils for Dyna Ignitions:
DS6-1 Ignition VT No. 32-7778
Street, Single plugs use DC-7 or DC-8
Race, Single plugs use DC-1 or DC-6
Street/Race Dual plugs use 2 DC-2 or DC-5, wired in series
DS6-2 Ignition VT No. 32-7777
Race, Single plugs use 2 DC-3
Street, Dual plugs use 2 DC-7 or DC-8
Race, Dual plugs use 2 DC-1 or 2 DC-6
Street, Single plug uses 2 DC10-1

Dyna Electric Tach Adapter Kit must be used with Dyna 'S' single fire ignition is installed on any twin when electric tach is used. **VT No. 32-7799**

Dyna Ignition Booster for single point systems only transforms inconsistent electrical surges into controlled bursts of energy to the coil,power is not wasted.**VT No. 32-7787**

Chrome Module Covers fits 1980-99. **VT No. 42-0399**

Dyna 'S' Hi-Performance Ignition System is self contained, fits behind ignition cover, uses magnetic rotor with the original spark advancer, so factory advance curve is maintained. Improves performance, extends spark plug life, eliminates points and condensers. **Note:** For dual plugged heads, on 1980-up use advance mechanism, VT No. 32-7510.
VT No. 32-7778 (DS6-1)

Dyna 'S' Single Fire Ignition has the features of the Dyna 'S', but fires front and rear cylinders independently of each other which allows accurate timing of each cylinder. Stock ignition systems fire both cylinders at the same time which has the wasted sparks on the exhaust stroke. This eliminates this inherent problem. For use with either dual or single plug heads. On 1980-up models, use VT No. 32-7510 Advance assembly.
VT No. 32-7777 (DS6-2)

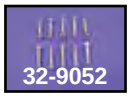

Dyna 2000i Digital Ignition available as a module only or complete kits that include correct coil. Features include single or dual fire operation,8 advance curves, built in tach driver, adjustable RPM limit from 6000 to 7500 and easy static timing with built in timing indicator. Fits all 1970-98 carbureted models and requires 1983-up sensor cup for 1982 and earlier applications. Advanced Programming Software allows the mechanic or tuner the ability to fine tune 2000I Ignition but requires adapter.

VT No.	Item	Plug	Fire	Coil

32-0135

Accel Unilite Distributor with billet aluminum housing is a dual fire type, includes gear and features 12 volt electronic performance. The electronic ignition module fits inside distributor, so no external box is required. There are no points to adjust or replace. Spark plugs can use larger gaps up to .040. The top can be removed without the removal of front cylinder head.

VT No.	Item	Year

Warranty

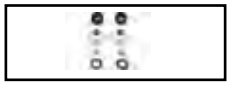

All Electrical Components sold as individual pieces or in kits are covered under our warranty "Replacement Only" Provision. All electrical related item part numbers begin with a 32 prefix. No credit will be issued for these items as they are exchange only.

Replica 1961-64 Big Twin 6 Volt Dual Coil replaces 31604-61. Sold each.
VT No. 32-0131

V-Fire Molded Dual Fire Coil features black late shape with bobbin type windings.

VT No.	Year
32-7572	1965-79
32-7573	1980-82

V-Fire Stock Replica Dual Fire Coils are factory replacement quality to fit stock brackets.

VT No.	Year	Volt	Color
32-0711	Pre1965	6V	Red
32-0128	1965-79	12V	Black
32-1268	1965-80	12 V	Red (4.8 ohm)
32-0129	1980-83	12V	Black (2.8 ohm)

Note: 32-0129 for electronic ignition.

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke.
This is the way the stock motor works on preTC-88 motors.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

Coil

Accel Single Fire Super Coil features ultra fast coil rise time with voltage output 45% higher than stock & 3.0 ohms of primary resistance. Mounts to stock coil bracket & fits under stock coil covers. Fits all Twins except TC-88.

VT No.	Type
32-0090	Yellow
32-7802	Chrome

Accel Power Pulse 12V Dual Fire Coil provides longer spark duration with a greater KV rating and faster rise time than stock coil. Molded in epoxy. For 1965-83.

VT No.	Epoxy Finish
32-0130	Yellow
32-1064	Black

Accel H.V. Dual Fire Super Coil bolt on for points ignition systems. High-tech molding for 1965-99 with 4.7 ohms. Yellow.
VT No. 32-7771

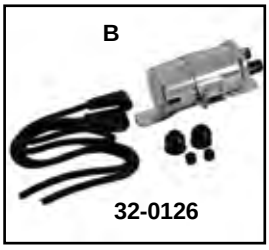

Accel High Energy Dual Fire Coil is a very high KV energy output requires that it be used with our extreme service 8.8mm silicone racing wires. Each coil is complete with two 8.8mm wire leads and appropriate chrome brackets.

8mm Blue Streak XXX Silicone Wire Sets features quality construction of silicone throughout the jacket, insulation and core. This assures high temperature resistance and high durability. Silicone wire sets also offer maximum RFI suppression. Copper core wire sets are for point type ignition systems only and feature a copper core wire to allow for special improved electrical conductivity and mechanical strength. All wire sets are supplied with electrical boots and OEM style terminals that lock onto the spark plug.

VT No. 32-1097

The Lever Starter System with stik start is made from CNC billet aluminum and assembled with accurate components. Unit fits 4 speed electric start models from 1965-88 with separate starter solenoid. This hand operated system will always work. It mounts in the place of the starter solenoid; just pull the lever and go. Requires separate purchase of starter relay depending on wiring configuration. See instructions on the web.

Extreme Duty Battery Cable Set features #2 gauge wires are very fat and flexible. The battery cables will transfer more cranking power with the very least amount of voltage drop. Over 2,000 bare strands of copper are covered with special vinyl insulation that is covered by a synthetic thermo-rubber jacket. Sealed and insulated with black heat shrink tubing means no moisture will get in these cables. Includes a 10" and 12" cable.

VT No.	Item

Braided Cable Heat Shrink Tubing. Clear heat shrink tubing is for use on all braided stainless steel cables to prevent cable from scratching painted or chromed surfaces while still keeping that braided steel look. Kit contains four 16" long heat shrink tubes to cover two throttle cables, one clutch and one speedometer cable. Bulk tubing is in a 10 foot roll.

Important Gas Tank Information: All tanks are shipped unpainted unless otherwise noted. Caps and petcocks are not included. Carefully check the new tank for flaws and fit before painting. **Do not grind or sand the seams or joints**. Clean the inside of the tank and it is suggested to pressure test and use a tank sealer. Check petcock openings, making sure the petcock can be easily installed. Use proper hardware to mount tank, including correct bushings, brackets and spacers required for assembly. **Tedd Cycle, Inc**. is not liable for paint work or labor claims of any kind. Tedd Cycle, Inc. is not the manufacturer of the gas tanks.

***Note:** All tanks with shut off rod provisions may require fuel rod alignment before installation of shut off assembly.

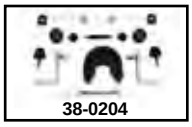

Gas Tank

4.5 Gallon Quickbob Gas Tank is a one piece tank to fit 1948-84 Big Twin frames and features bung filler necks. Mounts with stock hardware and uses petcock, **VT No. 38-0204** required for installation.

40 Spoke Extra Wide Offset Dual Flange Rear Hub features a chrome finish. The drive side is offset 0.875" farther out than standard 1973-1985 style hubs. Helps to eliminate the need for drive side spaces on most applications and places the bearings farther apart for greater stability. Helps to eliminate bent axles often associated with using standard hubs for wide applications using large drive side spacers. Includes 3/4" bearings, races, seals and seal spacers.
VT No. 45-0348

Saddlebag Set

Loctite Style

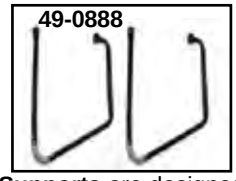

Loctite Saddlebag Set recreated as on 1946-48 models, include chrome plates to fit all rigid frames. Replaces 11785-43 in heavy black leather with orange rosettes. Unique design lid keeps bags closed and in shape. Measure 16” L x 5” W x 14” H.
VT No. 48-3156

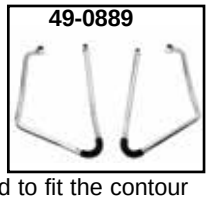

Black X-Large Three Buckle Thro-Over Set measures 14½” Long x 6” Wide x 12” High.
VT No. 48-3127

Large Three Buckle Thro-Over Set. All bags glued, sewn and riveted. Available black only. Measures 13” Long x 5” Wide x 12” High.
VT No. 48-3128

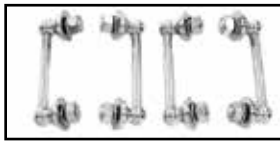

Chrome Saddlebag Supports are designed to fit the contour of the fender struts and protect your bags from the brake caliper and swing arm. Fits 1971-85 FX-FXE.

VT No.	Type
49-0888	Black, Adjustable
49-0889	Chrome, Adjustable

Saddlebag Set

Black Leather Glide Set features chrome buckles, spots, conchos and Neoprene back to hold shape. Each bag measures 21’’ x 14’’ x 6’ and is designed to replace the stock fiberglass saddlebags on 1958-84 FLH, by mounting to existing pins on stock bag supports or VT No. 49-2418 which are available separately. Also included are plate brackets which may be mounted to fenders or most struts. **VT No. 48-3132**

Saddlebag Mount Bars include four bar sets with stanchions.
VT No. 2634-12T

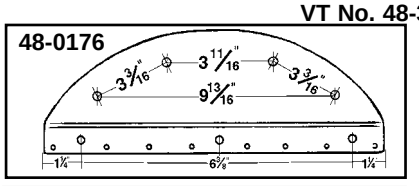

1936 Style Knucklehead Saddlebag Sets. Conchos and a five strap closure decorate these bags which are restoration quality for all 1936-46 Rigid. Include chrome mounting plates. Measure 14⅜” length x 5” width x 12” height.

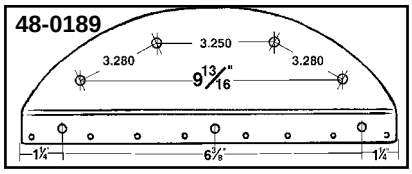

VT No.	Color
48-3121	Black
48-3144	Brown

Black Leather Saddlebag Set is complete with chrome mounting plates, for rigid or swing arm mounting, conchos, fringe and chrome rivets. Bags are suited for a later 1950’s restoration or for a nostalgic late model dress up on 1936-57 Rigid models. Measure 19” long x 5” width x 12” height.
VT No. 48-3120

Saddlebag Mounting Plates are chrome for 1936-57 rigid rear fenders, exact stamped as original. Order chrome acorn mounting bolts separately.

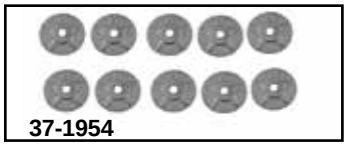

VT No.	Type
48-0176	Mount Plate Set
8205-8	Bolt Kit

Saddlebag Mount Plate Rail Kit is for right and left sides. Each side has five stanchions to use with four or five rigid frame saddlebag mount plates. Each rail has the correct curvature but must be cut to length. Each stanchion has one hole drilled through, so the bar slips through. Fits 1936-52.
VT No. 50-1562

3790-4	Windshield Spacers Parkerized
3791-4	Windshield Spacers Cadmium

Summer Windshield for Spring Fork models 1936-48, includes lower apron as noted. Replaces 11292-36. Includes zinc plated clamp set for mounting to handlebars.

VT No.	Lower Apron
49-0251	Black
49-0262	Army

3789-10 Mount Kit Parkerized

Spring Fork Windshield for 1936-47 Knucklehead or 1948 Panhead. These windshields are molded directly from actual vintage windshields that National Cycle manufactured beginning in 1937. Includes mounting hardware like original. Made of Pyralin plastic which was somewhat flexible and thus required a beaded edge as well as a steel reinforcing ring.

Engine Dress Kit

Dress Kits for XL's include all die cast replacement parts as pictured.

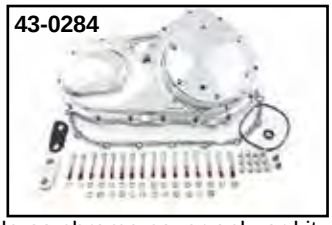

VT No.	Year
42-0690	1994-03
42-1055	1991-93

Die Cast Primary Covers are manufactured from a casting process. It is the nature of parts produced from this process to have small random subsurface imperfections that can be uncovered during the polishing process. These may appear as very small cosmetic imperfections after chrome plating. We also do not polish in areas that are not readily visible once assembled on the motorcycle or by polishing machines such as small depressions or tight corners. As these conditions are common in polished and chrome-plated castings, a reasonable standard of acceptability has been established to bring you the highest quality product at an affordable price. This part meets Perma Chrome™ cosmetic standard. The aforementioned cosmetic conditions are considered reasonable for this part and are not considered warrantable.

(1) **Roller Burnished Stem:** Roller burnishing smooths the finest grind finish (16 microinch) to a 4 microinch.

(2) **Melonite, Special Black Stem:** This is a heat treating process developed and patented in Germany. Gives the valve a Black Smokey look. Very hard and slippery. Currently being used on O.E.M. valves available in Rowe or Black Diamond brands.

(3) **Rowe Pro:** Forged one piece stainless steel valve precision CNC machined. Features special black Melonite finish, swirl polished tulip area and heat treated water tip.

One Piece Valve

MANLEY

Manley Stainless Valve machined from one piece forging with a swirl polished finish and chrome plated stem. Sold pairs.

Kibblewhite Valve Guide Seal Installation Tools
Valve guide seal installation tool kit is manufactured from high strength 6061-T6 aluminum for increased durability when compared to other plastic installation tools. Precision fitment onto the seal OD to help the builder center the seal over valve guide so that a few light strikes from a hammer will seat the seal. Radiused top striking surface reduces the likelihood of a burr forming from deformation. Available in a kit of four tools for various application or separately, Kit 16-0426 includes installation tools for 1999-04 Twin Cam, 1984-99 Evo Big Twin, 1986- 03 Evo XL, 1966-84 Shovel, 1948-84 Shovelhead, 1948-65-84 Shovehead, 1948-65 Panhead and 1957-E83 Ironhead XL Single installation tool, 16-0427 is for use on 1999-04 Twin Cam, 1984-99 Evo Big Twin and 1986-03 Evo.

Valve Spring Kits

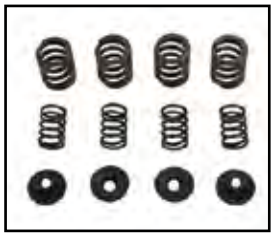

Sifton Lower Valve Collar and Seal Kit for all 1957-85 XL models. Kit includes four special lower collars machined to accept K-line style seals. Two intake seals and two exhaust seals. Top of guide must still be machined to accept seals. Seal installation tool included.

VT No.	Item
11-0821	Kit
11-0821A	Lower Collar Only

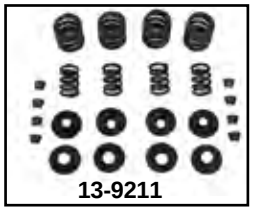

Kibblewhite Lightweight Valve Spring Kits include springs, keepers, retainer, and lower collars unless noted. Fits 1970-84 XL for 160 lb seat pressure, up to .460" valve travel. Hard-anodized aluminum retainers. May require "R" model valve to achieve installed height.
VT No. 13-2210

Valve Spring Set for Sportster .490" Lift Kit except Evolution. The above .490 lift kit features stock OD springs, interference fit to reduce harmonics and control spring surge. No machining required for installation. Springs have 20% more pressure than stock. Use with stock lift cams to .490. Supplied with steel top collars. Uses stock lower collars. Fits 1957-85.

KB PERFORMANCE PISTONS

***Note:** 2009-up cylnders cannot be overbored. Requires the purchase of 1200cc cylinder to be used with piston kit.

The Keith Black 390 Hypereutectic alloy is cast in a permanent steel mold which makes it possible to build a light weight piston that makes more power, runs quietly, uses less fuel and lasts longer than any other type of piston being made today. We can now forget about running loose, noisy, oil-burning pistons. The low heat transfer of the alloy keeps the skirts cool so piston expansion is minimal.
The KB piston will make maximum power at 2 to 4 degrees less total timing than conventional pistons. All KB pistons sets are supplied with Hastings Moly Ring sets.

APPLICATION	RING END GAP FACTOR	PISTON TO WALL CLEARANCE
Street Normally Aspirated	.0065"	.00075"-.0015"
Street Nitrous or Supercharged	.0080"	.0015"-.0025"
Flat Track Gasoline	.0080"	.0010"-.0030"
Flat Track Alcohol	.0060"	.0010"-.0030"
Drag Gasoline	.0075"	.0010"-.0030"
Drag Alcohol	.0065"	.0010"-.0030"
Drag Supercharged or Nitrous Gas	.0095"	.0015"-.0030"
Drag Supercharged Alcohol	.0085"	.0010"-.0030"
Drag Supercharged Fuel	.0115"	.0020"-.0040"

Note: It is important to use our ring end gap instructions to avoid ring butting. Safe top ring end gaps can be found by multiplying the bore diameter by the appropriate ring end gap factor from the adjoining chart.
Example: 3.5" bore "Street Normally Aspirated" = 3.5" bore x .0065" = .023" top ring end gap.
Note: Second ring end gaps do not need extra clearance.

Important Note: Some items on this page may be emission-related parts subject to California or other emission control laws. Please see note on Emission Page for important information regarding emission control regulatory compliance and warranty information.

4-Speed Transmission Installation Tips

VT No. 17-0028, 17-0027, 17-0032, 17-0030, 17-0033, 17-0034, 17-0031, 17-0029

All XL Transmission assemblies are bench tested for positive gear engagement and disengagement but it is always best for a final check after unpacking transmission before being installed.

All V-Twin Transmissions are assembled with late style shifter cam plate that uses welded in pin for neutral switch indicator. On some early(Pre 1974) case this pin may have to be shortened or removed to allow cam plate to move freely. Failure to check this will cause transmission to not completely shift through all gears. This should be checked first prior to assembly.

Gear Engagement Check

Rotate pawl carrier (EE) until pawl carrier contacts lifter arm (Y+X). Hold the shifter cam (D) with opposite hand to prevent cam follower (I) from completing gearshifts. If hand pressure is released from shifter cam the gears will be drawn into complete engagement and all inspection procedures will be performed incorrectly.

Shift transmission into first gear then check gear to dog Pocket Engagement. Correct engagement should be 25%.

Shift transmission into all other gears checking Pocket Engagement, which must be at least 50%.

Filing of lifter arms (Y+X) will produce changes in Pocket Engagement.

Establishing Mainshaft and Countershaft Endplay

Use the thinnest low gear washer and mainshaft washer. On 1954-early 84 models the mainshaft thrust washer must be installed with Tang Down. For 1954-early 1984 models the mainshaft needle bearing will have to be installed. Temporarily install access cover to crankcase with all transmission parts. Carefully align Cover Dowel Pins and with a rawhide mallet tap into position and install four cap screws.

When installing transmission into case check shift fork shaft for correct alignment to case. Do not force transmission into case if shift fork shaft will not go in to case. If shift fork shaft is forced into case damage or bending to shaft will happen causing shifter roller finger to bind against shifter cam plate or shifter fork binging on shaft or with pawl carrier assembly.

On 1954-E84 Models Inspect case race and rollers, if badly pitted scored or worn they should be replaced. Correct fit of main bearing is .0006in-.0014in. If clearance is beyond specified limit a new race and bearings must be installed, and line lapped for proper fit. **Note:** Fitment of door to case may sometimes requires reaming of holes in access door or removal of alignment pins from case. If removal of dowel pins is necessary tapping dowel pin holes and use of additional bolts is suggested.

Note also that even during factory assembly process several access doors were tried before final assembly.

Using a Dial Indicator measure mainshaft endplay from sprocket side of shaft, press against clutch gear so that bearing seats against lock ring in access cover. Move shaft back and forth and measure endplay while holding clutch gear in. If endplay is not with specification (see chart) install thrust washer of suitable size.

With access cover still in place bend a discarded spoke or other suitable wire and wedge into hole on end of countershaft. Push and pull countershaft and measure endplay with dial indicator. If endplay is not within specification (see chart) install countershaft washer of suitable size.

After countershaft endplay has been established install oiler plug in access cover with oil hole up.

Note: On 1959-early 84 models the clutch must be temporarily installed and the 1984-85 models the Stator spacing ring and the Stator must be installed on access door before above Endplay clearances can be established.

When Mainshaft and Countershaft end play established install **new** shifter shaft into the crankcase so that the shifter lever arm is centered. Using a grease pencil mark the shaft at the 12 o'clock position by marking the shaft you can tell if the shifter lever arm position changes when installing the transmission. Correct shaft to shifter pawl yoke engagement is important for proper gear shifting. Install transmission and rotate countershaft slowly to check that the gear shift arm is engaged with shifter pawl. To do so rotate shift lever, a noticeable resistance to movement indicates proper engagement.

4-Speed Transmission

Complete XLH-XLCH 4 Speed Transmission Gear Assembly Unit includes gears, mainshaft, countershaft, shift forks and shafts assembled to trap door. Order right side case races, rollers, shims and bearings separately. Shift selector shaft included.

Andrews "C" Ratio Gear Sets provide true close ratio shifting for XL gear boxes.

VT No.	Fits
17-4850*	Late 1984-90 All XL
17-5622*	Late 1984-90 All XL (Sifton)

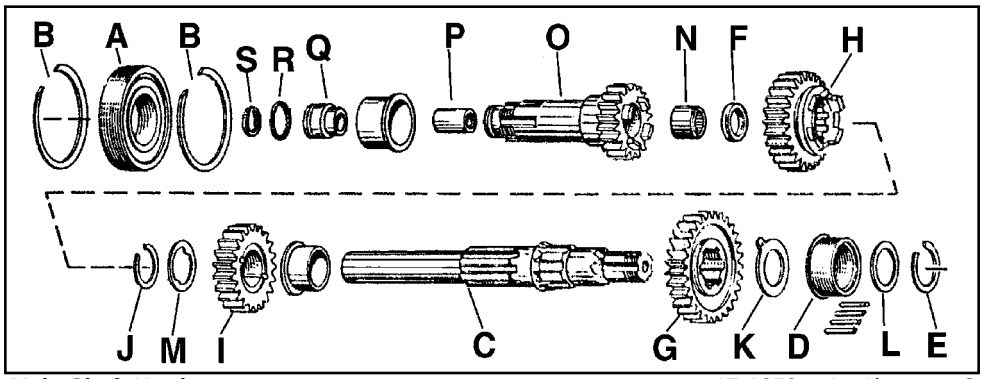

***Note:** From 1987-90 all XL models have "C" Ratio Main Drive Gears as stock parts. Also fits late 1984 alternator 1000cc models.

Gear	Stock Ratio	"C" Ratio
1st	2.52	2.29
2nd	1.83	1.66
3rd	1.38	1.26
4th	1.00	1.00

Andrews Wide Ratio 1st Gear Sets changes 1st from 2.52 ratio to 2.68 for more low end torque with 21T or 22T trans sprocket. Fits 1973-85. Can also be used on 1986-90 models if early type counter-shaft is used. **VT No. 17-9856**

Carbon Fiber Clutch Sets for wet clutch by Barnett. Carbon fiber clutches feature excellent lubricity and very good energy absorption. Order steel plates separately.

VT No.	Year
18-3688	1971-84
18-3690	1991-20
18-3691*	1991-20

***Note:** Consists of nine friction plates and eight steel drive plates. Add 12% more surface area. Double steel drive plate is not used.

18-0634

18-0376

Tamer Clutch Pull Kit will soften the "pull" required on 1986-20 Sportster models. The tamer replaces the stock Harley clutch pull end on 1986-20. The pivot is moved closer to the center so the clutch lever is easier to pull for those who have difficulty holding their clutch while driving. ***Note:** For use with the clutch outer ramp and the inner ramp assembly.

21-0453	Black Talon

XL Forward Control Footpeg Conversion Kits
• 2011-up XL models with forward control no longer allow standard rider footpeg; these kits let you mount standard footpegs on the late model XL's with forward controls
• Also works as replacement footpeg mounts on select OEM and V-Twin forward control kits for 2011-up XL models
• Kits includes a left and right footpeg mount in either chrome or anodized black finish complete with mounting hardware
• Available in standard length or +2" extended length
Note: If converting standard forward controls to extended, a longer shifter linkage rod (10¼" long) is also required **VT No. 27-0253** or use the 2" extension, **VT No. 21-0270** along with the original linkage rod.

Disc Brake Pad

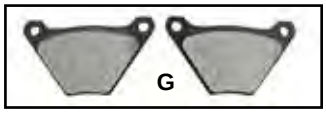

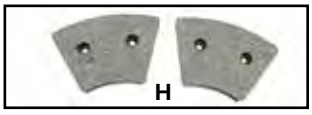

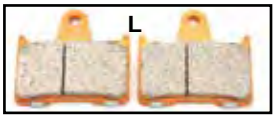

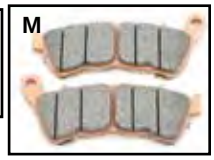

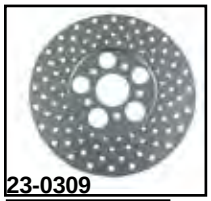

Disc Brake Pads are available in **Duro**, **SBS, Dura Kevlar, Dura Semi-Metallic** for excellent stopping on all types of disc rotors. **Duro** replacement pads are a soft compound designed to be compatible to all types of brake disc rotors. **SBS brand** is available in **Sintered, Ceramic or Carbon Tech** compounds. **Sintered Metal Pads** provides maximum stopping power but can never be used in calipers that were originally equipped with non-sintered pads. Works best with stainless steel disc rotors. **Ceramic Pads** are designed for general purpose use on carbon steel rotors and can be used on carbon steel rotors and can be used on calipers originally equipped with sintered metal brake pads. **Carbon Tech Pads** designed for use in all stock or aftermarket calipers. Works well with stainless steel or cast iron rotors. **Veloprene** is relatively soft compound compared to ceramic or metallic but heat resistant and less abrasive to rotors, including polished stainless types.

10mm Street Legal Universal Brake Lines are build it yourself line assemblies ready for adapter fittings. They are preassembled with high performance #3 stainless braided hose with a rugged veloprene coated inner, and crimp-on chrome plated female swivel hose ends. Clear coated for abrasion resistance. Meet the guidelines of the D.O.T. MVSS-106 requirements and are 50-state legal, and compatible with all brake fluids.

1952-1981 FLST Style Kit
24-2024 Kit with Chrome Lower Sliders

The V-Twin™ Fork Assembly is shipped complete with axle, axle nut, spacer, top nut, bearings, cone nut, dust cover, triple trees and fork tubes & sliders. Fork tubes and sliders are fully assembled with internals. Final assembly of the remaining components is done by the dealer. Every leg assembly is shipped dry. We recommend use of the appropriate fork oil such as Type B. The amount of fork oil to add varies by model. A FX will need about 6 oz per leg, a FL will need about 8.5 oz per leg and a FXWG need about 10 oz per leg. Due to oil cling, dry for leg needs about 1 oz more to fill than a drained leg would require.

41 mm Fat Kid Style Fork Assemblies Only for 1982-03. Include chrome top tree, black lower tree with polished or chrome lower sliders assembled with hard chrome fork tubes and axle kit.

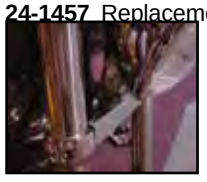

VT No.	Sliders

Narrow Glide Conversion Kit allows use of 41mm leg assembly, 1984-99 style and utilizes the original FXD or XL 19" or 21" wheels, and the caliper and brake disc from the original motorcycle. 24-0958 is shown with stock leg assembly 24-0510 FXST style.

39mm to 41mm Conversion Kit

Narrow Glide Conversion Kit to fit FXD-XL 39mm models includes upper and lower triple trees, stem, stem nut, fork stops, axle, axle spacers and fender spacers. For use with 1984-99 FXST/FXDWG 41mm fork leg assemblies and 1984-99 narrow glide 19" or 21" wheel assembly with aluminum hub and front fender. Accepts OEM 11.5" brake disc and caliper (custom brakes may cause interference with laced wheels). Measures 4 15⁄16" between fender mounts. For front wheel speedometer operation, replace left side axle spacer with speedometer drive unit.

Note: See Vintage section for 1952-72 components.

Attention!!

These fork tubes have been manufactured and tested for exact fit and application per model. It can be difficult to identify the front end assemblies because they may not always be original equipment. Before installing, compare old and new tubes. Be sure the stock top plugs fit into the new fork tubes. To avoid scratching the chrome, we suggest that the tubes be lightly rubbed with oil before installing into fork legs. Be absolutely sure you have the right tubes before you install them. No fork tubes can be accepted for return that are scratched or damaged due to improper installation or handling.

E-Z Fill Fork Tube Top Plugs feature a small oil fill cap built into fork tube top plug which will allow fork oil change/fill without removing top fork cap. Pairs.

Exhaust Pipes and Mufflers Warranty Information

There is no warranty on exhaust pipes & mufflers with regard to any discoloration. Discoloration (blueing) is caused by tuning characteristics, cam timing, carburetor jetting, overheating, etc. and is not caused by defective manufacturing. This means once exhaust pipes have been installed and started these pipes are considered used. **If pipes are not to the dealer/customer satisfaction, contact us immediately for a return authorization before starting your engine.** Refunds and exchanges are not available. Manufacturers will guarantee all sets of exhaust systems against any kind of manufacturer's defects.

		32-6085	Black (180° Kit)

Sumax Thunder Volt 50 Black Wire Sets feature a ferrite spiral wound coated core that is a blend of copper/nickel alloy bonded by a conductive acrylic latex cover. This process is designed to reinforce and assist in holding core resistance to 50 ohms. The fat 10.4 mm (.409") wires also feature three layers of pure zimplex silicone, 600 degrees of heat protection, 102,000 volts dielectric strength with a tightly woven heat treated fiberglass braid and black pro boots bonded to the black with gold lettering wires. Available in 8.2mm. *Note: Not for use on 2007-up XL models.

Accel 8mm S/S Spiral Core Ignition Wire Set

- Designed specifically for Harley-Davidson late model Sportsters.
- Delivers up to 5 times more peak energy than other "Performance Wires"
- Maximum RFI protection to shield sensitive electronics with 500 Ohms per foot
- Spiral core wire utilizes stainless steel alloy conductor with fiberglass/Kevlar inner core for strength
- Lower resistance delivers more energy to the spark plug
- Custom fit sets are ready to install-no cutting or crimping required
- Fully capable with Delphi fuel injection system

Distributor

Unilite Distributor includes gear. Features 12 volt electronic performance. Dual fire type. No external box required. Electronic ignition module fits inside distributor. Adjustable advance limit, using spring kit pre1970, Use with low resistance coils as low as 2 ohms for greater spark energy. No points to adjust or replace. Use larger spark plug gaps up to .040. Billet aluminum housing. Top may be removed without removal of front cylinder head.

VT No.	Item	Year
32-0174	Accel Distributor XL	1952-70
32-7792	Dyna Coil	3 Ohm

Distributor Hold Down Clamp. VT No. 31-3966

Twin Tuner Controller for 2007-13 EFI models. Features include increased horsepower, improved throttle response, easy plug-in installation and setup; can be used with Dynojet Power Commander Maps and is compatible with Twin Scan II service tool VT No. 16-0378. The Twin Tuner allows you to easily adjust your fuel injection to match the requirements of performance parts. You can add or subtract fuel by using the mode and up/down push button switches. For 2007-2013. **VT No. 32-3041**

Auto Advance Distributors are completely assembled with gear and all internal parts. The XLH type fits 1952-70 Sportster models and requires **VT No. 31-3966** hold down.

VT No.	OEM	Years/Model	Type
32-7558	32506-70	1952-70 XLH	Complete, Chrome

Idle Control Adjustment Screw
For EFI models.
Idle Adjustment Screw replaces the IAC activator and allows idle speed to be controlled by adjusting screw

VT No.	Fits
35-1324	2007-20 XL

Daytona Twin Tec Internal Ignition Kit for 1998-03 Sportster models (except 1200S). Kit includes matching Deutsch plug and harness for single fire conversion, coil and spark plug wire set.

VT No.	Item
32-3016	Ignition Kit
32-3054	Above ARB E.O. No. D-641-1 & D-641-2

Twin Tec Internal Ignition for 1970-99 Big Twin models and 1971-1997 XL. Two advance curve families with adjustable advance slope accommodate stock to highly modified engines. Digitally set RPM Limit (100 RPM Steps). Selectable single or dual fire mode. Coil outputs protected against short circuits. Optional PC link cable and software for programming custom advance curve

VT No.	Item
32-1005	Ignition
32-3053	Ignition ARB E.O. No. D-641-1
32-2013	3.0 Ohm Single Fire Coil

Twin Tec External Ignition for 2004-06 Carbureted XL Models. Wide timing advance adjustment range accommodates stock to highly modified engines. Features digitally set RPM Limit (100 RPM Steps). Selectable multi-spark mode for quick starting and smooth cruise. Coil outputs protected against short circuits. Billet aluminum housing with black anodized finish. Easy plug-in installation supports all sensors including theft/security module.
VT No. 32-1014

Important Note: Some items on this page may be emission-related parts subject to CA or NY or other emission control laws. Please see note on for important information regarding emission control regulatory compliance and warranty information.

Dyna Ignition

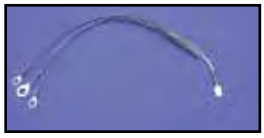

Dyna 'S' Hi-Performance Ignition System is completely self contained, fits behind ignition cover, uses magnetic rotor with the original spark advancer so factory advance curve is maintained. Improves performance, extends spark plug life, eliminates points and condensers. Great for dual plugged heads, on 1980-up use advance mechanism VT No. 32-7510**.**

VT No.	Item	Mfg#
32-7778	Ignition System	DS6-1
32-9300	Rotor	DS-6-1

Dyna 'S' Single Fire Ignition has the features of the Dyna 'S', but fires front and rear cylinders independently of each other which allows accurate timing of each cylinder. Stock ignition systems fire both cylinders at the same time which has the wasted sparks on the exhaust stroke. This eliminates this inherent problem. For use with either dual or single plug heads. On 1980-up models, use VT No. 32-7510 Advance assembly.

VT No.	Item	Mfg#
32-7777	Ignition System	DS6-2
32-9301	DS-6-2	DS-6-2

Dyna Electric Tach Adapter Kit must be used with Dyna 'S' single fire ignition is installed on any twins when electric tach is used.
VT No. 32-7799

Dyna 2000I Digital Ignition available as a module only or complete kits that include correct coil as listed. Features include single or dual fire operation,8 advance curves, built in tach driver, adjustable RPM limit from 6000 to 7500 and easy static timing with built in timing indicator. Fits all 1970-98 carbureted models and requires 1983-up sensor cup for 1982 and earlier applications. Advanced Programming Software allows mechanic or tuner the ability to fine tune 2000i ignition but requires adapter harness.

VT No.	Item
32-9151	Kit Single Plug/Single Fire with DC3-1
32-9152	Kit Dual Plug/Single Fire with DC1-1
32-9155	Kit Single Plug/Single Fire with DC6-5 miniature coil
32-9159	Module Only
32-9087	Sensor Cup, 1983-94
32-9124	Sensor Cup, 1995-up
32-9052	Cup Screw, 10 pk
32-9120	Advanced Programming Software for Above Ignitions

Dynatek Twin Cam Coil that will produce spark voltages in excess of 40,000 volts. Direct replacement unit, .4 ohms primary resistance, 14,000 ohms secondary resistance, increased horsepower, increased throttle response, easier starting. Fits 2007-up XL.
VT No. 32-1086

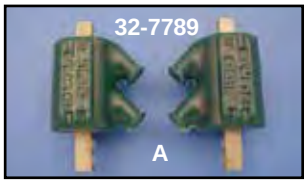

Single Fire: Just the spark plug for the piston that is in its compression stroke will be fired. The other piston, being in its overlap position will not be ignited.
Dual Fire: Both spark plugs are fired simultaneously at the time only one piston is in its compression stroke. This is the way the stock motor works.
Single Plug: One spark plug in each head. Total of 2 spark plugs in one engine.
Dual Plug: Two spark plugs in each head. Total of 4 spark plugs in one engine.

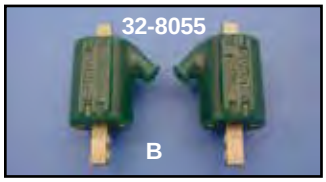

Dyna S Performance Ignition Systems. Available in dual or single fire for street applications only. Each kit includes sensor plate assembly and correct coil for each application. Single plug only. 1980-up applications require 32-7510 advance mechanism.

VT No.	#	Type
32-0800	DSK-6-2	Single Fire
32-0801	SDK-6-1	Dual Fire

Dyna Coils. 35,000 volts! Works with all points ignitions, aftermarket or factory electronic ignitions.

Dyna 2000 Digital Ignition Systems. Systems include Dyna 2000 HD-1 Ignition Module and a matched Dyna Twin Fire Coil for each application. Fits 1991-97 XL.
VT No. 32-0802

Dyna	Application
DC6-5	All FXR-FXST and Dyna
DC6-4	Dual Spark Plug Head

Dyna Twin Fire Ignition Coils are designed to work with Dyna 2000 HD-I ignition modules. Twin fire coils are slightly larger than stock coils, fit the stock mounting bracket. Twin fire coils can be used with any electric advance ignition system that incorporates dwell control except Dyna DS6-2 or similar type ignitions.

VT No.	Dyna	Ohms/Type	
32-9285	DC6-5	3	(A)Twin Fire II Miniature Dual Output Towers, Replaces DC6-3

Module for XL

Power Commander III Engine Management System is for fuel injected models and allows for both fuel and ignition adjustments. The Power Commander includes a link cable and software package which allows you to fully map the fuel ignition curves on a computer. If a computer is not available, the fuel curves can be adjusted by using three touch buttons on the face plate. This unit includes a specific map, designed to improve performance over stock. Fits 2007-2008 XL 883, EFI model.
VT No. 32-3029

Replacement Ignition Modules bolt-on replacements.

***Note:** Does not fit 2000-03 Sport models

Daytona Twin Tec TCFI Gen 4 Auto Tune Fuel Injection Controller is fully programmable plug in replacement for the 36 pin Delphi controller with J1850 data bus.
• Quickly auto-tune fuel curves for front and rear cylinder on a dyno or on-road with new WEGO IID dual channel wide band oxygen sensor interface.
• Powerful Windows software for custom programming and data analysis
• Full support J1850 data bus used for communications with turn signal/ security module (TSM/TSSM) and instrument cluster
• Programmable user input and output.
• Easy plug-in installation
• Supports all sensors including theft/security module
Includes TCFI Gen 4 plug-in fuel injection controller with billet aluminum housing with black finish, dual channel wide band exhaust gas oxygen sensor interface, two Bosch LSU 4.2 wide band exhaust gas oxygen sensors, and two 18 x 1.5mm weld nuts for exhaust pipes. ***Note:** Not legal for sale or use on pollution controlled vehicles. Fits 2007-13 Sportster.
VT No. 32-7401

Power Commander V Fuel and Ignition Timing Control for each cylinder in a new smaller enclosure. Rev Xtend feature increases stock rev limiter. Switch between two maps “on the fly” maps can be adjusted on a “per gear” basis. Allows for one map per cylinder per gear if required. Adjustment of fuel and timing based on engine temperature is provided by the cold start feature. Will power up with USB cable only for programming. Note: not legal for use on pollution controlled vehicle

VT No.	Fits

S&S Spark Technology Ignition System Installation Kit. Fits 2004-up.
VT No. 32-7806

Dyna Tek FI Controller is a plug module that offer 3 user selectable base fuel curves that are designed to improve engine operation and can be modified to suit a wide variety of modifications. Fuel mixture can be enriched or leaned as required. The Dyna FI controller uses the factory connectors for easy installation and there is no PC required for tuning or adjusting the fuel curves. There are no modifications required to the stock ECU and removing the Dyna FI controller returns the vehicle to the factory configuration. Fits 2007-09 XL 1200. **VT No. 32-3036**

Daytona Twin Tec TCFI Gen 5 Auto Tune Fuel Injection Controller is fully programmable plug in replacement for the 36 pin controller with CAN data bus.
• Continuously auto-tunes fuel curves for front and rear cylinders under actual riding conditions with WEGO IIID dual channel wide-band oxygen sensor interface.
• Robust alpha-N (throttle position and RPM based fuel control eliminates problems with long duration/high overlap camshafts.
• Extended data logging and diagnostics.
• Powerful Windows software for custom programming and extending data logging and diagnostics.
• Idle air control including idle RPM and cold start characteristics are fully programmable.
• Includes TCFI Gen 5 fuel injection controller, USB interface for PC link, WEGO IIId dual channel wide-band exhaust gas oxygen sensor interface, two Bosch LSU 4.2 wide-band exhaust gas oxygen sensors, and two 18 x 1.5mm weld nuts for the exhaust pipe.
Fits 2014-up XL.
VT No. 32-3051

Dyna 2000 Ignition Modules for 2000-up Sportster models feature programmable advance curves, rev limiter and LED diagnostic lamp for easy static timing. Plugs into stock harness and bolts to stock module location.

***Note:** Can also be used 1967-70 models but engine cases must be electric start type as kits can be used for replacement only for these years.

32-1806 Installed

Electric Starter Kit includes a 1.4kw compact starter with integral Bendix, solenoid and gear reduction.

VT No. 32-1642

1. Be sure that if you are installing this starter on a kick start only model that your clutch basket has the proper ring gear installed.
2. This starter should be used with a starter relay and the battery cable included.
3. The cooling fins on the cylinder may need to be clearanced slightly as shown in Figure 1 in order for the starter to fit properly.
4. Depending on what type of oil tank is being used, brackets may need to be modified.
5. A battery with at least 255 CCA should be used to power the starter

V-Twin Cables are constructed with the Supra™ stainless steel braid which is tightly woven for a bright, quality consistent finish. The clear coat is UV resistant, heat bonded, non-yellowing grade for long service life. All applications include the correct fittings, adjuster and inner lengths for an exact installation and fit.

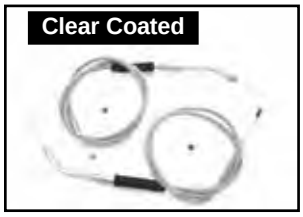

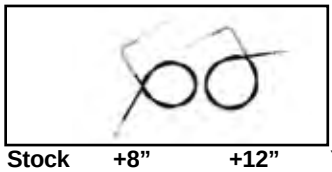

Throttle/Idle Cables are available in black vinyl or braided stainless covering with correct end fitting for each application, also available in over stock length.

Oil Filter

Oil Filter Wrench use with ⅜" drive.
VT No. 16-1941

Oil Filter Wrench fits all spin on filters, ⅜" drive.
VT No. 16-0743

Combination Oil Filter Wrench includes drain plug hex at opposite end.
VT No. 16-0451

Oil Filter Pump Cover Plate includes four ¼" x 2½"-20 screws and four ¼" x 2½"-24 allen screws.
VT No.12-0191

Oil flows in around the outer diameter, through the filter media and out passing by the magnet. The magnet captures particles less than 10 microns which could have escaped through the filter wall.

Note: Chrome and Black Spin On Filters are 3" outer diameter.

Spin-On Oil Filters replaces stock units in chrome or black, Perf-form or V-Twin Brand in stock or with hex nut style. Perf-form Tall Chrome Filter is ¾" longer than stock and will not fit fuel injected models. All filters listed are low restriction type.

Tamer Brake and Clutch Lever Set
The length of the brake and clutch levers greatly affects the rider's ability to modulate the bike's speed and smoothly engage the clutch. Tamer Levers offer a more ergonomic design that ensures rider's have a comfortable grip and reach. The Levers have a reduced length which means that riders can reach and engage them, evenly with a firm grasp of handlebar. This translates to quicker response time, enhance braking capabilities and smoother gear shifts.

Handlebar Control Module

Two style of Can Bus systems,
(A) Pre 2016 Style: The front signal connect to the module itself
(B) 2016-20 Style: The front turn signal direct link to BCM

Handlebar Control Module includes front brake switch, 48" long wire harness and a turn signal reserve wire. Constructed of durable IP66-rated module and connector.
Right or left side modules can be combined together or assembled with the switch housing depending on your preference.

Note: The module does not include turn signal light

Rear Chain

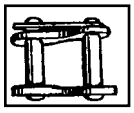

19-0354

530 XLO Diamond O-Ring Chain includes a .214 pin which has been produced using a special alloy steel and case hardened for optimum strength, heavy series inside and outside link plates, special constructed extended solid bushings, solid rollers, quad stakes pin heading. 9300 lbs. average tensile strength.

VT No.	Links	VT No.	Links

19-0349	108		

530 Diamond Nickel Plated Chain offers rust-proof protection along with a nickel finish. Each part of the nickel plated chain is individually plated before assembly to insure maximum coverage. 120 links. Diamond# 50ENP
VT No. 19-0347

Master Links. Replacement link for #50 530 chain. Note: sold in 10 packs unless noted otherwise.

VT No.	Fits Chain Type
19-0350	Standard
19-0351	Nickel
19-0375	XDL Self Lube
19-0353	XLO O-Ring, each
19-0376	N.O.S. Repair Link with 2 Masterlinks OEM, 40052-15

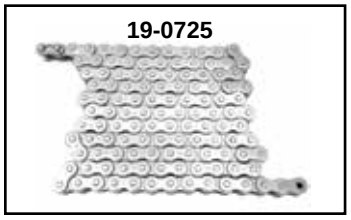

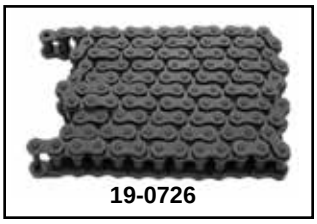

530 XDL Self Lube eliminates the possibility of hit and miss lubrication, as it has a constant and consistent lubrication in the pin bushing (wear) area. Combines the high strength and capacity of Diamond's proven performance with the advantages of fewer adjustment and less maintenance. Added strength is made possible by thicker and redesigned contour inside link plates.

VT No. 36-0000

Internal Throttle

VT No. 36-0570 Internal Throttle Sleeve. Custom design allows pull action of throttle cable for use with billet grips. **VT No. 36-0570**

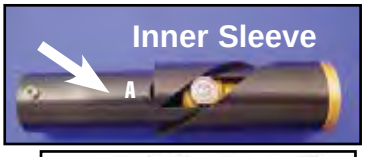

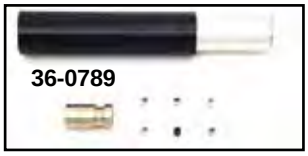

1. Cut 2⅜" off end of handlebar. Remove end of throttle handle that would attach to throttle cables.

2, Mark handlebar for inner throttle sleeve. Drill a hole for the set screw, this will hold throttle on the handlebar.

3. Remove set screw from the outer sleeve of spiral. Slide grip on & mark end of grip on the handlebar. Measure from this mark back to set screw in outer sleeve. This measurement will be used to mark & drill the throttle grip. Once drilled install grip. Use a small amount of Loctite® on set screw for final installation.

4. Note Set Screw (A) do not tighten so as to make contact with handlebar it will prevent throttle from turning.

Internal Throttle/Clutch Assembly features ball and needle bearing construction with built in return spring.

VT No.	Type
36-0575	Throttle
36-0789	Clutch

The LED

The LED (Light-Emitting Diode) is an electronic light source. Invented in the early 20th century and introduced as practical electronic component in 1962. All early devices emitted low-intensity read lights but modern LED's are available across the ultraviolet and infrared wavelengths with very high brightness.

Typical indicator LEDs are designed to operate with no more than 30-60 milliwatts of electrical power.

Solid state devices such as LEDs are subject to very limited wear and tear if operated at low currency and at low temperature. Many of the LEDs produced in the 1970s and 1980s are still in service today. Typical life times quoted are 25000 to 1000000 hour, but heat and current settings can extend or shorten this time significantly.

SMD Bulb

SMD So what is "SMD"?
SMD Stands for Surface Mounted Device. An electrical component that is usually mounted on the surface of a circuit board. Advanced technology has made these components smaller and smaller. Manufacturers are now making SMD LED's (Light Emitting Diodes). These incredible small SMD LED's are extremely bright and allow for more light in a compact bulb. Replace an old conventional bulb with these super bright, extended life, low energy bulbs.

Black Scanning LED Turn Signal Set features a black finish and is fitted with a scanning LED function. **VT No. 33-1878**

Did you know?

LED lights are polarity sensitive. It is a smart idea to test LED assemblies, is not color coded prior to assembly.

LED Polarity

Ever soldered a LED into your project backward it can really mess up a good day! If you don't know, LED's have a positive and a negative side, and will only light when wired correctly. Most LED's have one longer lead to indicate the polarity, but not all.

Warranty

All Lighting (Headlight, Taillight, Signal, Spotlamp and Marker) sold as individual pieces or in kits are covered under our warranty "Replacement Only" Provision. All lighting related items part numbers begin with a 33 prefix. No credit will be issued for these items as they are exchange only.

All custom turn signal/lights require load equalizer.

Spotlamp Rim Set VT No. 33-0546

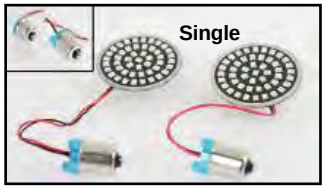

VT No. 33-0578

Frenched Turn Signal Trim Ring Kit includes chrome plated rings fit front or rear on 1988-up FLT and FLST models.
VT No. 33-0578

Cyron Turn Signal Wide View Insert Set
These lights can be seen from much greater angle by other vehicles and drivers on the road. This makes them much more effective when traveling close to the other driver's "blind spot". It is NOT necessary to be directly in front, or get behind a bike equipped with these wide view LED lights to be seen.

In addition, we created a subtle but very cool feature to the "Halo" outer ring of LEDs. When you light them up, they gradually go to full power creating a nice fade effect.

For Bullet Type Turn Signals

VT No.	LED Color	Contact
33-1584	Amber with white halo	dual contact
33-1585	Red	Dual
33-1586	Amber	Dual
33-1587	Red	Single
33-1588	Amber	Single

For Flat Type Signals

33-1589	Amber with white halo	dual contact
33-1590	Amber	Dual
33-1591	Amber	Single

Note: Dual contact type replaces 1157 bulb and single contact type replaces 1156 bulb

Chrome FX Turn Signal Assemblies are an amber replacement turn signal unit. Check factory parts books for the application. Single or dual contacts as noted. Fits right or left side.

Did you know?

LED lights are polarity sensitive. It is a smart idea to test LED assemblies, is not color coded prior to assembly.

LED Polarity

Ever soldered a LED into your project backward it can really mess up a good day! If you don't know, LED's have a positive and a negative side, and will only light when wired correctly. Most LED's have one longer lead to indicate the polarity, but not all.

Clamp Set to mount turn signals to front end fork tubes.

Turn Signal Equalizer

Intensifier Hi-Low Module. Dual input and dual output will convert single function LEDs, Halogen or Incandescent bulbs to high and low dual functions. Works for tail lamps, signals, marker lamps, rear fender tips, LED accent lighting, driving lights or any application where 2 intensities are desired. There is 2 inputs and 2 outputs. Module will run & stop or high & low. Also does run & turn for a pair of turn signals with 1 module. Runs up to 100 watts total for driving lights. For any 12 volt system.

VT No. 33-2216

Turn Signal Load Equalizer returns amperage draw to correct factory specifications when aftermarket marker lamps are used to replace stock turn signals in bikes with self-canceling systems (1991-99). **Note:** For all 2000-up models and 1991-99 models using LED signals use load equalizer III only.

VT No.	Brand	
33-2137	Badland LE-01	
32-1558*	Volt Tech	
32-0874	Volt Tech	
32-2142	Badlands LE-02 for models with 4 way flashers	same features as LE-01
32-2148	2 Pin for LED turn signals on bikes	
32-2149	3 Pin for use with 7 amp batteries or higher	

***Note:** Black wire is ground and two yellow wires.

Turn Signal Load Equalizer III designed to specifically work on all Twins with OEM Alarm System or self cancelling turn signal module. Solid state design works with Halogen or LED signals and eliminates erratic blinking of signals. **All Equalizers** are Plug and Play except 33-2138 and 33-2014 which are hardwire.

32-2146*	Badlands	2014-up FLT
32-2147*	Badlands	2014- up XL

***NOTE:** The ONLY time a load equlaizer is needed is when you install aftermarket turn signals on a 2011-UP FXST, 2012-UP Dyna or ANY 2014-UP model and you have rapid flashing turn signal indicator lights. The bike will also throw a trouble code. Unlike earlier equalizer modules, CAN/Bus bikes require (1) module for front and (1) module for the rear turn signals.

Illuminator Pro Module. This module control features automatic cancelling of signals. Front running lights and turn signals on single filament halogen on incandescent bulbs and LED's. Rear running lights, brake light function and turn signals on single filament halogen or incandescent bulbs as well as LED's. Built in load equalizer runs LED's up to 50 watts per lamp and emergency flasher mode that does not build up heat. Use on all Twins without self canceller.

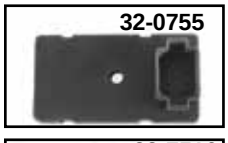

VT No 33-2207

Canceller

Turn Signal Canceller replaces stock units as equipped on the following model years. ***Note:** Namz Brand.

Badlands ATS-03 Self Canceling Modules are designed to provide a less expensive alternative to the factory flasher module. The ATS-03 module not only has a built in 11-second flasher but it also is a Load Equalizer which allows you to use small incandescent bulbs, halogen bulbs or LED's without any rapid-flashing issues. The ATS-03 also has a 4-way flasher feature for safety or parade mode just like the factory flasher unit. Note: Be sure to identify which connector is on the bike before purchasing as the factory was not consistent during 1994-2000 with connector.

Dunlop Elite 4 Cruiser/Touring Tire
- Multi-Tread (MT)Tires have long wearing compounds in the center of the tread and lateral-grip in each shoulder to maximize cornering performance.
- Tire is tubeless
- H-rated for speeds up to 130 mph.
- Offers significantly higher mileage when compared with current single compound tires. Bold new tread pattern offers excellent grip in wet and dry conditions, with a particular focus on even wear and lower road noise.
- Blackwall

150 Series Rear Tire Kit
includes 150 Dunlop tire, brake caliper, splash guard, wheel spacer, hardware, and tail lamp assembly. Fits 2000-17 rear FXSTS, FXSTB.

Tire

Michelin Commander III Tires

The embodiment of the tire maker’s “Michelin Total Performance” promise: dry performance, wet weather grip and longevity. Building on the power reputation of the Commander II Tire, the Commander III promises to raise the standards for V-Twin and cruiser tires to an all-new level. The Commander II offered dry handling and sure-footed wet traction with virtually none of the expected penalty to tire longevity. **Note:** The Commander III “Cruiser” Tires and “Touring” are unique tires. Each model features a specific set of sizes, distinct sidewall designs and slightly different patterns. Available in blackwall only. All sizes are tube/tubeless unless noted.

Replica Tire

Super Eagle Replica Tires feature classic Goodyear style of the 1960's. Available in black, wide and pinstripe whitewall, full 5.00 x 16" height and profile for the needed ground clearance on full dress models.

Coker	Type
46-0304	Blackwall
46-0305	⅜" Double Whitewall
46-0306	1¾" Wide Whitewall
46-0307	1" Narrow Whitewall

The original "Gangster" since 1985!

16" Coker Tire is available 2" wide whitewall or blackwall. Full height is 5.00" x 16" profile. V-Twin was the first to use the term **GANGSTER WHITEWALL** for motorcycle tires in 1985.

VT No.	Type
46-0255	2" Wide Whitewall
46-0037	Blackwall

Coker 500 x 16" Treadwall Trackmaster is a tube type tire. Tire measures 25.75" in diameter and features a width of 4.75" when inflated on suggested 16 x 3" rim. The four-ply construction is authentic for most restorations of vintage motorcycles.
VT No. 46-0044

Blackwall

Double Whitewall

Whitewall

Vee Moto Highway Deluxe Tires replace the classic style of the 1960's with its grooved tread pattern, narrow profile and are available in black or white sidewalls. These are a great addition to complete the vintage look on your chopper. Vee Moto tire use high-quality materials and the manufacturing ensures extremely higher quality compared to vintage tires of the past. Vee Moto tire are 6 ply tires and are available in two tread options. Mt90-16 H-rated and 500-16 that is S rated. Both size are available in black wall, double white stripe and whitewall sidewalls.

****WARNING:** Newly fitted tires should not be subjected to sudden acceleration, hard cornering, or maximum power or braking for at least 100 dry miles. Loss of control and serious injury or death may be a result in doing so. By waiting till the 100 mile break in the rider will become accustomed to the feel of the new tires or tire combination. You should check and adjust inflation pressure to recommended levels after tires cool for at least 3 hours following run in.

Shinko Flat Track Tires are designed and tested to perform at the highest level of the sport. The SR267/268 is available two different compounds, soft or medium, to give you the best tire for any track. Proven performance. DOT approved. Tube type only. H Speed rating. 67 load index front tire. 71 load index rear tire.

Replica™ Early Leather Solo Rolled Seats by Corbin-Gentry are constructed using genuine drum dyed leather cover with padding on an accurate steel formed and ribbed baseplate with brackets riveted in place as original. Authentic style seams are accomplished by first riveting a leather strip to the seat pan and then form fitting the leather cover to the saddle, and finally sewing the cover to the strip. Edge is the “Rolled Edge” where the leather is covering the seam between the cover and fastening strip.

Over 25,000 sold since 1977!

CORBIN-GENTRY

The Solo Seat

The standard **Solo Seat** carries the 52004-25 part number, the longest running part at 100 years! Changes in the cover include Cowhide leather, Rhino and synthetic materials. Tested by police squads thru their dealer. The synthetic by DuPont cholorsulfonated polyethylene was produced in Dupont's Newbugh, NY factory along with their "Fabrikoid" automotive seat covering.

A Note about our Leather Solos

There are literally over 1000 different type of seats on the market today, but if you still want something really comfortable on long trips the old plunger style seats are very hard to beat. This leather covered contoured seat fits like a glove and the plunger action will keep your ribs from dropping to your knee caps by absorbing those large bumps such as rail-road tracks and manhole covers.

Our leather is top grade cow hide for a long lasting appearance. A chrome passenger rail is available for both styles. When you ask any cop, who has ridden the freeways and highways of the USA for 30 or more years, what he misses most on his late model, he will tell you short and simple: the seat.

-Ray Boone RBE 1987

• Finished work order will be returned by UPS

Kwik-way Boring Bar

Cylinder Boring Service. The V-Twin Motor Shop will bore and hone customers cylinder and fit to next oversize required pistons. Boring will done on a Kwik-way Boring Bar and honing will be done on a vertical Winona Van Norman Powerstroke Hone for a precision fit. Choose any brand of piston from our catalog section and note VT Part Number on Work Order/Authorization Form. Work will be performed on sets of cylinders only. Pack cylinders with care as we are not responsible for broken fins in shipping.
VT No. 60-0167

Motor Shop Services Cylinder Sleeving. Send in your worn out original cylinder and Motor Shop Services will bore and fit new LA sleeves liner. Cylinder will then be finished honed to V-Twin standard piston size. Work Order Authorization Number required before sending in. Pack carefully as we are not responsible for broken fins. Service is done per cylinder. Sleeves are also available separately.

Flywheel Rebuilding

FLYWHEEL REBUILDING SERVICE.
We will install new shafts, crank pin, rollers, cages and wrist pin bushings for years listed. Ship your rebuildable matched right and left Flywheels with connecting rods and we will return the Flywheel C.O.D. and notify you if any extra charges are incurred during the rebuilding. Tedd Cycle, Inc. original service since 1969 with a turn around time of 15 working days.

V-Twin Motor Shop Twin Cam Flywheel Remanufacturing Services
Flywheel that are out of round or scissored can be repaired. The new flywheels on the 1999-up Big Twin are pressed together, but no match for our V-Twin Motor Shop. We will press apart and disassemble this style wheel assembly, inspect shafts, and crank pin components. V-Twin Motor Shop will rebuild your Twin Cam flywheel assembly to OEM specification using new bearings, crank pin and solid plugs, then balance and true. We can also weld the pin and plugs, if requested, at the flywheel and crank pin interface, for rigid power. We stock the bearings, cages and oversize crank pins to provide you with the components at hand when your flywheel arrives. We will hone the rods to allow the oversize pin to be fitted as required. Flywheel set will be trued and balanced. The final assembly and press is complete in our dedicated TC-88 flywheel fixture assembly.

We install new hardened crank pin and bearing set into the rebuildable rods. If required, new connecting rods can be installed with customer's authorization. We balance the wheels for the new parts and stock piston weight. We press the flywheel halved back together and true the bearing journals to .001" or less. Truing the bearing journal eliminates engine vibration at cruise speeds.

V-Twin Motor Shop can also install solid crank pin expansion plugs and then tig weld the pin and plugs so flywheels won't flex or scissor. This extra step can help prevent future problems. The rebuilt flywheel is stronger than stock OEM.

For a smoother running engine, high speed balancing is done on a Sunnen Dynamic Balancer. This service will require customer's piston or purchase of new piston kits from V-Twin.

We also offer several other machine shop services. V-Twin Motor Shop can also weld and repair all types of metal and aluminum parts like crank cases, cylinders and heads.

Our newly developed TC-88 Flywheel program allow Twin Cam model flywheels professionally rebuilt in V-Twin Motor Shop.

To Request a work order number or for any questions please contact our Motor Shop department.

Tools for Oil Changes

Jims Engine Dipstick Socket and Adapter allows riders and mechanics to quickly and safely remove the engine oil level dipstick that lies precariously close to a scorching hot for FLT or FXD models exhaust pipe. Features include a square hole for ⅜" ratchet fitment, and a cutout hole, ⅞" hex for wrench fitment and a cutout for clearance around exhaust pipe. Use on all 2007-16 FLT models and 2006-17 FXD models.

VT No.	Item
16-2759*	Socket
16-2760	Adapter

Note: Socket can be used on 2012-up FLT and Dyna models but requires separate purchase of adapter **16-2760**.

Oil Catcher Pan is used when removing oil filter to avoid spilling oil onto engine cases. 12" tube directs oil flow into oil drain pan.

VT No.	Fits
16-0094	2009-17 FXD, 2004-up XL, 2009-16 FLT
16-0256	2017-up FLT

Slim Design Oil Filter Wrench features a slim 14 flute design to fit most filters, and ⅜ ratchet drive hole and slim design that allows more clearance for oil filter removal especially oil coolers and crank position sensors. **VT No. 16-1941**

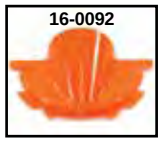

Oil Drain Reservoir. 2.5 gallon. Low profile fits under frames on Softail and FLT models.
VT No. 16-0585

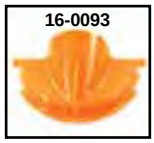

Black Oxide Oil Filter Wrench fits all spin on filters. ⅜" drive. Fits all models and TC-88.
VT No. 16-0743

Oil Drain Spigot fits 2009-up FLT. Tool has a red anodized finish keeps the fluid off of the frame. This tool channels the transmission fluid from the bottom of your transmission case into the drain pan instead of onto your frame. The tool has a helical design that locks the tool into the frame cross member and around the drain plug. This allows you to remove the drain plug through the center of the tool. Tool is not heat treated. **VT No. 16-0096**

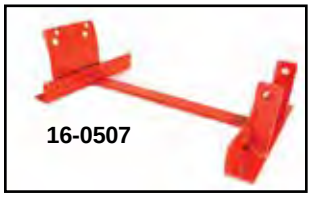

Oil Catcher Pan

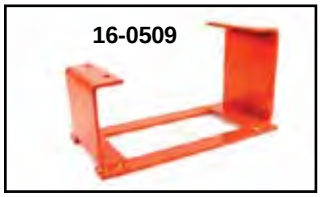

VT No.	Fits
16-0092	1984-06 FXST, FLT, 1991-05 FXD, 1986-06 FLT

M-8 Tool

Jims Main Bearing Remover and Installer for 2017-up M-8 Big Twins removes left or right main bearing without damaging the case. Also provides correct alignment and depth during assembly. Fits 2017-up FLT, 2018-up FLST, FXST.
VT No. 16-1182

Jims M-8 Cam Bearing Remover and Installer Tool is required 2017-up FLT and 2018-up FXST, FLST M-8 models. This tool holds tighter tolerances which allows for a more precise installation depth. This remover uses the "Jims Style" remover collet as well as "Jims" fine threaded installation driver.
VT No. 16-1185

Jims M-8 Countershaft 1st Scissor Gear Alignment Tool ensures that the scissor gear teeth mesh correctly with the mainshaft 1st fear. For M-8 models. ***Note:** it is installed before the scissor gear is removed to maintain alignment of the gear halves under spring pressure.
VT No. 16-1190

16-5832

Jims M-8 Balancer Bearing Remover Tool is for use on 2017-up FLT and 2018-up FXST models. The M-8 engine design incorporates balancers to reduce engine vibration. This tool can remove the balancer bearings both Touring and Softail models without damage to the crankcase. **VT No. 16-5832**

Jims M-8 Balancer Bearing Installer Tool. All M-8 engines incorporate balancers to reduce vibration. This tool has been developed to be used with the balancer bearing removal tool, 16-5832, to precisely install the bearings in the proper location. This installation tool aligns the crankcase via case bolt and dowel locations that allows the bearings to be installed on the work bench without the use of a driver or press. Use on all 2017-up FLT and 2018-up FLST, FXST models.
VT No. 16-5833

M-8 Oil Pump Gear Alignment
VT No. 16-0458

Jims M-8 Cylinder Hold Down Nuts Kit keep the cylinders in place when the heads are removed from the engine. Useful when installing the second cylinder over the piston and rings after the first cylinder has been installed. Fits 2017-up FLT, 2018-up FLST, FXST.
VT No. 16-1186

Jims M-8 Left Main Seal Removal Tool. The Milwaukee Eight has a new crankshaft oil seal that is difficult to remove without potentially damaging the crankcase bore. The tool is designed to do the job with no chance of damage to the case. Simply insert the removal fingers over the engine output shaft, and then slide the lock collar over the fingers. Once assembled, you can easily remove the seal square to the core by simply turning the wrench. Use on the new Milwaukee Eight engine, 2017-up.
VT No. 16-1200

Jims M-8 Shifter Mechanism Sleeve Remover and Installer is for removing and installing the shifter mechanism sleeve in M8 transmissions. The sleeve can be removed and installed correctly without disassembling the transmission.
VT No. 16-1191

Jims Fork Cap Installation Tool
VT No. 16-1198

Jims M-8 Valve Spring Compressor Adapter for diassembly and assembly of the multiple smaller valves on M-8 ***Note:** Conical valve spring adapter only to be used with
VT No. 16-1771 Valve Spring Compressor Tool.
VT No. 16-1189

Jims M-8 Oil Pump Alignment Tool to either assemble as individual components with supplied studs or as an assembly with the alignment dowel. For the cam support plate along with oil pump, gerotors and pump cover to perfectly align with the pinion shaft flat, all while properly sealing the oil pump o-ring in the crankcase can be a challenge for one set of hands.
VT No. 16-1079

Jims M-8"On Bike" Valve Spring Compressor tool is for use when changing valve springs for performance upgrades, or simply replacing a leaking valve seal. This "on bike" valve spring compressor kit for M-8 engines, works with the cylinder head installed on the motor. Simply remove the rocker box covers and rocker arms, and install this unique compressor on the rocker arm shaft. Once the cylinder is filled with compressed air, the technician can easily rotate the tool and compress the top collar of the valve spring exposing the keepers to remove the top collar, valve spring and seal.
Fits 2017-up FLT & 2018-up FXST
VT No 16-5835

Jims M-8 Wrist Pin Remover Adapter quickly and easily removes the wrist pins in M-8 engines. Save space your tool box, use with Jims TC-88 wrist pin remover tool. Fits 2017-up FLT, 2018-up FLST, FXST. **VT No. 16-1187**

Jims M-8 Cylinder Head Holder is two sided, one side threaded for Twin Cam heads, and the other threaded for M-8 models.
VT No. 16-1188

Jims FLT Inner Primary Shifter Shaft Bushing Tool easily removes both worn bushings and quickly installs the new bushings to the proper location at the same time, without removing the inner primary.
VT No. 16-1193

Jims Swingarm Bearing Installer Tool.
VT No. 16-1194

Jims Axle Installation Guide for 2008-up models with either a 1" or 25 mm hollow axle. Aids in aligning wheel with swingarm and brake caliper during assembly.

Balance Tool

Jims Beta Engine Hydraulic Balancer Retainer Tool use these retainers to hold the hydraulic tensioners in place when repairing all Beta engines. The hydraulic tensioners are used to keep constant chain tension on the counter balancer system. Without the use of these retaining tools you will not be able to remove or install the balancing system. Use on all Beta Twin Cam engines 2000-17.
VT No. 16-1858

Jims Balancer Scissor Gear Alignment Screw holds the two halves of the spring balancer gear in alignment before removal for easy installation. Use on 2017-up M-8 engines.
VT No. 16-1181

Balancer Shaft Retention Pin use this tool to secure the engine balancers on Twin Cam engines when servicing flywheel assembly. This tool locks into the balancers sprocket pin holes to prevent the balancer from turning out of sync with flywheel. Use on 2000-17.
VT No. 16-1163

Outer Balancer Bearing Installer and Remover Tool removes and installs the outboard balancer bearing on the 96" and 110" "B" Softail engines 2000-17 chain guide support plate.
VT No. 16-1376

Lapping Tool

Eastern Motorcycles Parts, Inc., was begun in the mid-1960's by Gil and Carol May in their garage, where Gil repaired both their own motorcycles and those of some of their friends. After a few years spent building a solid reputation, the couple decided to open their first retail and repair shop, Gil's Cycle Shop, on Long Island, New York. They also sold tanks, pipes, pistons, patches, and other motorcycle parts, and did repairs that ranged from rebuilding generators and rods to complete motors. If a part could not be purchased from the limited suppliers at the time, Gil would have a local machine shop make three or four of that part for him. Then, knowing he would eventually be able to use them, he would have the machine shop make 25, 50, or even 100 of the part to keep on hand.

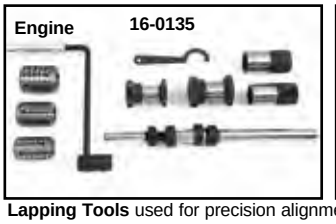

The Mays eventually decided to buy or make these hard-to-find parts themselves and sell them wholesale to other repair shops and in 1972, Eastern Motorcycle Parts, Inc., was born. In addition to selling tanks, pistons, cylinders, fenders, and other parts wholesale, the company manufactured some parts, such as case bushings, sprocket shafts, pinion shafts, and crank pins, and sent them out for heat treating and grinding. In 1987, Eastern moved to Blackville, South Carolina, where they continue to expand in manufacturing, with many items produced start to finish in house. After more than **forty years** after inception, Eastern Motorcycles, Inc., is still a family-owned business and run his wife Carol, and son Jeff. Tedd Cycle, Inc. has been an original distributor since 1975.

Gil May and Jerry Doering 1994, V-Twin Mfg Warehouse

Quality Pays--It don't cost!
Gil May from Eastern MC Parts Motto

Lapping Tools used for precision alignment of engine and transmission shafts. Engine unit replaces 96710-40 to lap right and left crankcase races for oversized bearings. Combo Tool includes transmission lapping tool insures proper fitting of oversized rollers with mainshaft races on Big Twin and Sportsters.

VT No.	Use	Fits
16-0135	Engine	1936-98 Big Twins and 1952-76 XL
16-0039	Combo	As Above
16-0012	All	Spanner Wrench

Main Bearing End Plug Tool allows the setting of proper end play in Big Twin Timken Bearing Assemblies by selection of proper spacer from the catalog. Use when refitting bearings or bearing sets on late models when spacers are not included. Not needed for our **VT No. 12-0309** or **12-0310** Timken sets, these are pre-spaced from the factory. Fits 1955-98 FL, 1971-84 FX, 1979-98 FLT, 1982-94 FXR, 1984-98 FXST. **VT No. 16-1795**

Replacement Lapheads are sold each. For Eastern tools only.

***Note:** Sold separately for 1977-up use with 16-0149 and 16-1837.

1990-98 Big Twin Snap Ring Remover will remove the Timken Bearing outer race snap ring without damage to the case.
VT No. 16-0705

Jims Timken Bearing Race Installer is used to press race in straight in left crank case for 1969-98 Big Twin,1977-03 XL's.
VT No. 16-0668

Sprocket Shaft Bearing & Seal Installation Tool Adapter upgrades Jims bearing installer tool (VT No. 16-1353) for work on fine-splined Twin Cam sprocket shafts. Allows for installation of Timken bearing (OEM# 8028) & roller bearing race assembly (OEM#24004-03) onto the sprocket shaft. For 2007 all 2007-16 Big Twin.
VT No. 16-1364

Jims Main Bearing Remover and Installer for 2017-up M-8 Big Twins removes left or right main bearing without damaging the case. Also provides correct alignment and depth during assembly. Fits 2017-up FLT, 2018-up FLST, FXST.
VT No. 16-1182

Jims M-8 Left Main Seal Removal Tool. The M-8 has a new crankshaft oil seal that is difficult to remove without potentially damaging the crankcase bore. The tool is designed to do the job with no chance of damage to the case. Simply insert the removal fingers over the engine output shaft, and then slide the lock collar over the fingers. Once assembled, you can easily remove the seal square to the core by simply turning the wrench. Use on the new M-8 engine, 2017-up.
VT No. 16-1200

Twin Cam Timken® Case Bearing Conversion Tool is a must for the big cubic inch late model Twin Cam 88" or 96" engine. Utilizing the special Jims precision insert, it is designed to easily and accurately convert the left side crank roller bearing (OEM# 24604-00D) to the more durable Timken Bearing (OEM# 9028). This insert is manufactured from aerospace quality steel that is several times stronger than the aluminum case material the standard bearing rides in. The tool includes:

- A new steel bearing insert held under .002" TIR (total indicator reading).
- A press plate that will hold the bearing insert in line with the case bearing bore at the time it is being pressed into case.
- All the necessary drill bits to drill oil feed and return holes, hardware and detailed instructions.

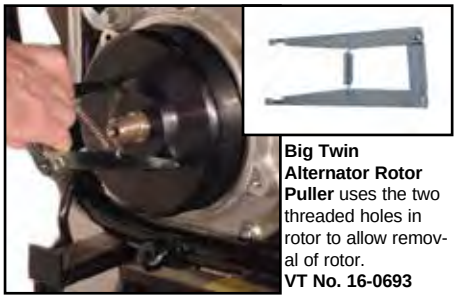

This job can be performed with normal hand tools , a hand drill and a 2 ton press.
Use on Twin Cam engines 2003 to the 2016. Must also use existing Jims Tool (16-0668) for race installation. Order bearing inserts and Timken bearings separately.

Tappet Tool

Sifton Pushrod Adjustment Gauge for use on Big Twins 1953-84 with hydraulic lifter. Replaces 91438-79. Complete with instructions.
VT No. 16-0993

Jims Tappet Test Stand Adapter for 1984-98 Twins. **Note:** Adapter for use with tester on Evolution Style tappets that bleed down.
VT No. 16-1863

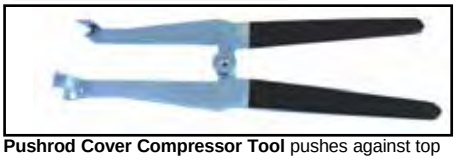

Jims Magnetic Tappet Holder Tool hold tappets up in tappet bores while changing cams, cam support plate or oil pump. For use on Twin Cam and M-8 engines 1999-up.
VT No. 16-1045

Sifton Pushrod Cover Compressor Tool allows removal and installation of pushrod clip. Use on 1936-98 Big Twins and 1957-03 XL.
VT No. 16-1728

Pushrod Cover Compressor Tool pushes against top rocker box to allow one hand operation. Use on 1936-98 Big Twin and 1957-03 XL.
VT No. 16-1052

Jims Tappet Position Holding Tool for all 1991-17 Twin Cam and 2000-up XL engines. This tool allows the tappets and anti-rotation pins to be safely and accurately stored for proper re-installation. Tappet locations are clearly referenced on the tool, which also serves to protect the tappets from damage when removed from engine. **VT No. 16-1031**

Cam Tool

Twin Cam Inner Cam Bearing Tool. This tool will safely install the inner cam bearing in all 1999-06 FXST-FLST and Dynaglide models. Installs bearings to the proper depth in case without damaging bearings.
VT No. 16-1390

Jims Cam Gear Remover and Alignment Tools. The alignment tool is designed to index the cam gears position while removing on installing the cam gear. This tool will allow you to accurately position and or reposition the cam gear from one camshaft to another, as well as allowing you to retard or advance the gear position by up to 10 degrees with the accuracy of a ¼ degree. The cam gear remover tool is use to remove the cam gear from the camshaft. This tool acts as stable base to keep the camshaft perpendicular to the press. Use on all 1970-98 BT.

VT No.	Item
16-1282	Alignment Tool
16-1283	Remover Tool

Jims Camshaft/Crankshaft Locking Tool will lock the gear teeth on the Twin Cam model engine. Instructions included.
VT No. 16-0790

Jims Cam Locking Tool allows removal and torquing of cam sprocket bolts by locking camshaft and crankshaft sprockets. Use on 2006-17 Dynaglide and 2007-16 FXST-FLT models.
VT No. 16-1352

Inner Cam Bearing Remover Tool allows removal of needle bearing and will also keep needles and rollers from falling into engine.

VT No	Jims	Year
16-1271		1958-98 Big Twin

Cam Tensioner Removal and Installation Tool to remove and replace the spring loaded cam chain tensioners. Fits 2000-06 FXST, FLST and 1999-06 FLT.
VT No. 16-0188

Jims Cam Chain Tensioner Unloader will hold the tension of the primary cam chain on the Twin Cam model engine. Instruction included.
VT No. 16-0793

Jims Camshaft Remover and Installer Tool allows removal and installation of cams in the Twin Cam model engine. Tool is used in conjunction with VT No. 16-0793 cam chain tensioner unloader.
VT No. 16-0792

Jims Twin Cam Bearing Puller used to remove bearing from camshaft, this tool is designed to remove the bearing straight with no slipping or binding. Use on all Twin Cam.
VT No. 16-1280

Oil Pump

Oil Pressure Sending Unit Wrenches. These reversible ratcheting wrenches are used to install and remove oil pressure indicator lamp or gauge sending unit on all FL Touring models 1999-up.

VT No.	Year
16-9723	1999-up
16-9724	1984-98

Oil Pump Check Valve Ball Seat Tools. The Burnishing Tool will burnish relief valve ball seats that have wear and will not seat correctly. The Cutter Tool is for badly damaged or pitted seats that no longer seal. For use on all oil pumps used on Side Valve models and Overhead Valve models 1936-98.

VT No.	Item
16-1033	Burnish Tool
16-0519	Cutter Tool

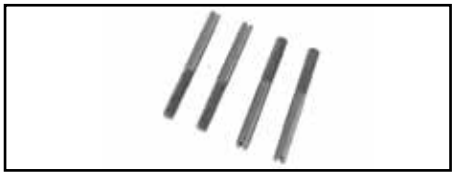

Oil Pump Snap Ring Installer makes it easy to install outer snap ring on oil pump shaft, without stretching the ring. Just apply oil to ring expander, holder up to the big end of ring expander, hold up to the end of the shaft, then push ring onto the shaft with sleeve. Use on Big Twin oil pumps.
VT No. 16-0889

Oil Pump Drill Fixture allows drilling of cases to accept late model stock or S&S oil pumps. **VT No. 16-0986**

Oil Pump Shaft Reamer features an adjustable ream for use with oil pump shaft.
VT No. 16-1894

Gasket Alignment Stud Tool Set includes 1/4" x 20 and 1/4" x 24 threaded studs, with slotted heads. Install to hold oil pump gaskets in place.
VT No. 16-1677

Tappet Oil Screen Plug Tool. Wide slot type to remove stock slotted plug without removing exhaust pipes.

VT No.	Brand
16-0875	V-Twin
16-0665	Jims

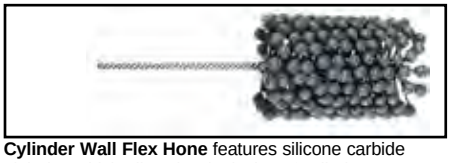

Oil Pump Drill Jig replaces 94461-81 for installation of factory type updated pump VT No. 12-9971 on 1973-78 crank cases.
VT No. 16-1843

Cylinder

Cylinder Hold Down Nuts are used to hold down cylinders during service. Allows motor to be turned over with heads off. Use on all Twin Cam and Evolution and M-8 Twins.

VT No.	Fits
16-0446	Evolution and Twin Cam
16-1186	M-8

Cylinder Wall Flex Hone features silicone carbide globules which allow the deglazing of cylinders 3" to 4¼" when powered by a ⅜" or larger drill,180 Grit.

Piston Ring Installer Tool.
VT No. 16-0628

Piston Ring Compressor Kit.
VT No. 16-0622

Jims Piston Support Plate provides a non-mar-ring flat support to push the bottom of the piston as rings and cylinder are installed over piston.
VT No. 16-1164

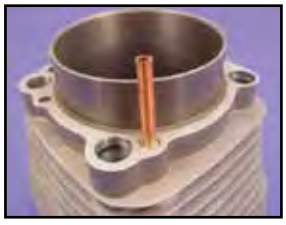

Piston Ring Grinder Tool.
VT No. 16-0976

Jims Twin Cam Cylinder Torque Plates lasered with correct torquing sequence for TC-88 and TC-96 OEM cylinders.
VT No. 16-1287

Jims Evolution Case Cylinder Spigot Bore Tool allows boring of cylinder spigot hole, up to 3.8125" by utilizing the stock cylinder stud holes. Use on all 1984-99 style Evolution crankcases.
VT No. 16-1409

VT No. 16-0911
Tube Installed

Evolution Cylinder Oil Passage Drain Tubes for stock bore size cylinders only. Each kit is supplied with tap, hex wrench two drain tubes and instructions.

VT No.	Item
16-0911	Kit
16-0912	Pair Replacement Tubes only

VT No. 16-0912

37-9259

Sifton Racers Evo Stud Kit has 8 inserts, drill tap and 8 chromoly studs. Allows more torque to be applied, to cure oil leaks and protects case threads during frequent disassembly. Detailed instructions included.

VT No.	Item
37-9259	8 Studs only
11-0636	8 Inserts only

Jims M-8 Cylinder Torque Plates. Aluminum cylinders cannot be accurately honed and measured without the use of torque plates. The Jims Torque Plate kit for use on Milwaukee-Eight ® cylinders will simulate operating stress conditions when boring or honing cylinders. These plates adapt easily to conventional boring bars or Sunnen honing machine, and do not require the removal of ring dowels. Use on 2017-up Milwaukee Eight® engine
VT No. 16-1201

16-1845

16-1846

Evolution Cylinder Tools allow installation of stud to correct height or removal by locking to stud.

16-1766	Installer
16-1196	Installer 2014-up FLT
16-0065	Driver Handle for A
16-0895	Driver Handle Adapter, 1992-up FLT-FXD

Fork Stem Nut Wrench fits FLT.
VT No. 16-1977

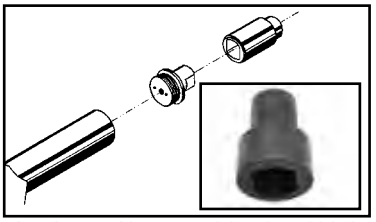

Fork Pre-Load Assembly Tool allows pre-load to be set on 41mm forks during assembly.
VT No 16-1197

Jims Fork Cap Installation Tool allows the installation of the fork tube caps on the motorcycle without removing other parts. 49mm forks only. Fits 2014-up and 2006-17 FXD. **VT No 16-1198**

Fork Leg Holding Tool holds fork tube securely in place while servicing lower legs. For use on 41mm and 49mm fork legs.
VT No 16-0898

Fork Tube Plug Tool has a special socket which fits 1948-up Glide Fork Plug, 1/2" drive.

VT No.	Brand
16-0630	V-Twin
16-1008	Jims

Fork Spring Compressor Tool puts pressure on top fork plug to compress spring to ease in assembly.

VT No.	Type
16-1009	Jims

Fork Cap Wrench for use on 41mm fork plugs. Thin design allows for removal of fork plug without disassembling handlebars. Will remove 1-3/8" hex fork cap nut on 1/2" drive with o-ring insert.
VT No. 16-1034

Duo-Glide Nut Double Ended Wrench used for removing and installing crenulated nuts and dust covers with internal thread.
VT No. 16-1344

Jims Castlenut Socket is for use with FXST inverted forks. The 2017-up Softail models requires the fork nut (Castlenut) to secure and compress the fork spring. This one piece solid steel socket is designed to secure the joint rod prior to final assembly.
VT No. 16-1061

Fork Seal Drivers

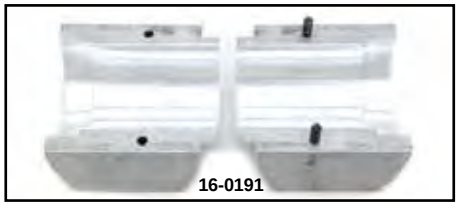

Fork Seal Installer. Installs bushing and seal without damaging components.

VT No.	OEM	Use
16-0055	34190	1983-87 FXRT 1983-87 XR 1984-87 FX-XL
16-0056	34634	1984-13 FLT-FXWG
16-0964	36583	1987-94 FXR-FXRS, 88-up XL

Adjustable Split Fork Seal Driver Set use on all 35mm, 39mm and 41mm forks. Includes seal drive and three seal guides.
VT No. 16-0074

49 mm Fork Seal and Dust Shield Installer Tool installs the lower leg 49mm fork seal squarely into the bore with no damage to the lip seal surface. Provides accurate alignment fr seal replacement, factory style tool.
VT No. 16-0191

Lubrication

Combination Oil Filter Wrench includes drain plug hex at opposite end.
VT No. 16-0451

Seal Puller Tool. Simply insert the tip of the tool behind the oil or grease seal, press and pull leverage works for you. No more pounding, hammering and digging that might damage bearings. Two size tips reach in and fit nearly all seal applications. **VT No. 16-0838**

16-0803

16-1674 Alemite Piston Grease Gun Kit includes adapter and fittings
16-1298 Alemite Pistol Grease Gun Kit includes grease gun with special adapter

Gauged Fuel Line Extension Kit is for fuel injected models. The fuel line gauge extension will allow the motor to be run using its own fully functional fuel system. The kit allows the mechanic the ability to check fuel pressure and make adjustments to fuel injection system. Fits 2002-up FXST, FLST, 2002-16 FXD
VT No. 16-1078

Fuel Tank Pro-Stand is for use with Touring models with 6 gallon tanks. The Pro stand allows the fuel tank to be raised 6½" above the frame without removing the console or fuel pump wiring and vent lines, to gain complete access to the top of the motor for fuel injection servicing, dyno tuning and fuel system diagnostics. The Pro stand will also provide a positive lifting point for complete removal of the fuel tank from motorcycle. To run motor with tank lifted, the gauged fuel line extension is required. Fits 2008-up FLT, FLHT, FLHR.
VT No. 16-1077

Service Scan Tool

Computer Diagnostic Service Tool. This tool is capable of diagnosing trouble codes for all 1994-99 computer controlled Big Twins. Available as a standard tool that includes scan tool, software cables, adapters, A/C power adapter and instruction manual. For USA 110v 60 cycles application.
VT No. 16-5000

16-0388

Daytona Twin Tec Twin Scan Tool for all 2001-up fuel injected models and 2003-06 carbureted models with 12 pin ignition modules reads and cleans diagnostic trouble codes from engine control unit, turn signal/security module, speedometer and tachometer. The Twin Scan is especially useful for diagnosing hard to find intermittent trouble codes. The motorcycle can be operated while the unit is installed under normal condition (no trouble codes) the unit will store data of the last hour of operation. If a trouble code is set the unit automatically stop logging data 30 minutes after the code is set. This allows you examine data before and after the code was set. Twin Scan II+ includes WEGO IID dual channel wide ban exhaust gas oxygen sensor interface for logging AFR date along with engine date.

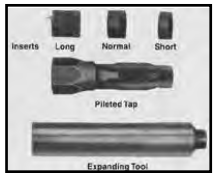

VT No.	Item	Fits
16-0379	Twin Scan 3	2011-15 with CAN data bus
16-0388	Twin Scan 4	2011-18 FLST, FXST
		2012-17 FXD, 2014-up XL
		2014-up FLT with Can data bus

Thread Repair Kit

HELI COIL

Safety Wire Tools. Wire twisting pliers have an automatic twisting and playing motion which gives uniform twists without damaging wire, with an attractive end result. Bolt drill fixture allows drilling of 1/16" diameter holes in heads of hex, 12 point, or allen head cap screws from 3/16" to 5/8" shank diameter. Includes drills and bushings, which secure the bolts during the drilling operation. Tools sold separately.

VT No.	Item

Battery Maintenance

"Activator" Battery Filler attaches to any standard acid pack tube. Positive thumb release valve absolutely controls acid flow. No acid spills, burns or holes in clothing.
VT No. 16-0037

16-1792

Battery Booster Cable Set. 10 feet in length. 10 gauge in size.
VT No. 16-0350

Deltran Battery Tender LCD Battery Meter allow is for use with the Deltran battery tender harness.
VT No. 16-0595
Deltran Battery Tender LCD Battery Meter.
The LCD displays battery voltage when the button is pressed or when initially plugged in.
For use with Deltran Battery Fender Harness. The red LED flashes when voltage is low. 3-16 voltage range.

16-1870

Super Smart Battery Tender constantly monitors battery without the damaging effects of a trickle charger. Initial charge brings battery up to full charge then converts to a float charger, keeps a 12 volt battery at 13.6 volts.

VT No.	Type
16-1792	12 volt
16-1870	12 volt, Junior Tender
16-1794	Snap Cord

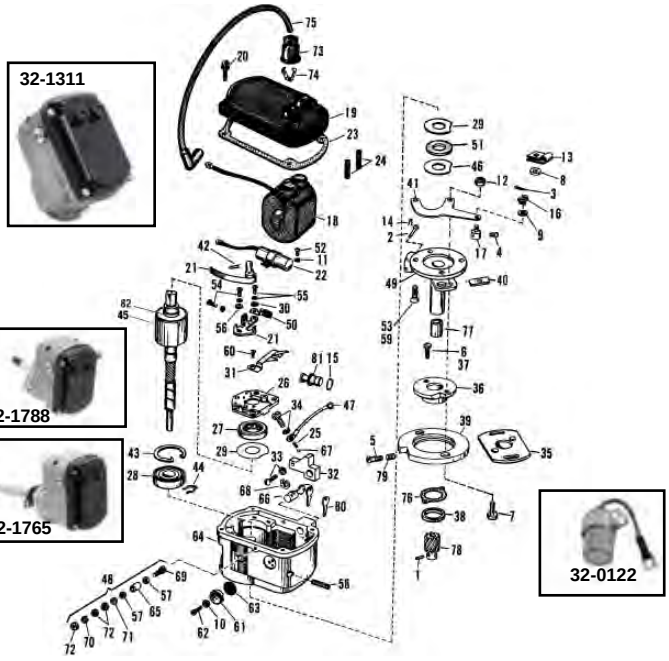

Battery Eliminator allows operation of Magneto models without battery and boosts spark voltage when starting and prevents light flickering at low engine speed.
VT No. 32-0548

Skyrich Automatic Battery Charger. 12 volt 2 amp intelligent battery charger for Lithium-ion and lead acid batteries. Includes power cord, alligator clip cord and quirk disconnect cord.

Magnetos

32-1275

Joe Hunt H-4 Automatic Advance Vertical Magnetos for Big Twins features include H4 automatic advance for easier starting and hotter spark, aluminum cam cover in either natural or polished finish (no frame, pipe, or-brake pedal modification are required) and rare Earth magnets that never need to be recharged.

VT No.	Fits	Finish
32-1296	1970-92	Natural
32-1250	1970-92	Polished
32-1299	TC-88 Carburetor Models Only	Natural
32-1275	1993-99 Drive	
32-1679	Advance Assembly	

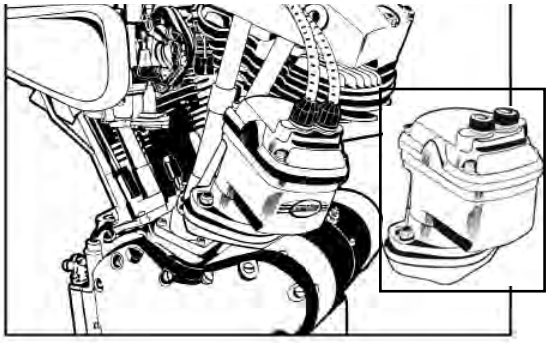

1966-69 Big Twin Distributor Mount Clamp Kit includes zinc plated clamp, stud, O-ring and nyloc nut.

VT No.	Item
32-0169	Kit
32-0135	Zinc
32-1342	Chrome
12-0547	Stud only

Burkhardt Offset Magneto Assembly is for the generator on 1941-69 Knucklehead, Panhead and Shovelhead engines. Offset drive allows these magneto head to clear cylinders and lower head fins. Includes a natural die cast finish body, cast cap with screw-in spark plug wire connections and a vintage wire set. Includes offset base drive, Magneto head, Burkhardt alloy cover, and retro wire set. Must use 2 bolt to mount to engine case.
VT No. 32-1799

1973-92 Big Twin Nose Cone Magneto Assembly. Full kit includes Joe Hunt magneto. Head has a vertical Burkhardt drive. Features adjustable manual advance.

COMETIC GASKET

Cometic AFM Gaskets feature a chemically blown compound nitrite synthetic rubber bonded to an aluminum core that has a temperature resistance of over 2500 degrees F. AFM does not require gasket sealers or silicone bead and re-torque of mounting bolts is not required.

THUNDERVOLT® AGM BATTERIES

Ultima®'s AGM Thundervolt® batteries are the highest performance batteries we offer today! These are an industry first, with a direct fit aftermarket replacement for OEM# 65989-97A. These batteries provide some of the highest power ratings available in the aftermarket.

FEATURES:

- Patented post design reduces internal battery resistance by replacing 3 internal connections with 1.
- Flush mount, threaded terminals allow for easy connection to bike terminals.
- Nonspillable, sealed AGM Valve Regulated Lead Acid (VRLA) design is maintenance free and meets all require ments for shipment via air carrier.
- Rugged construction has been lab tested and field tested to ensure long life, even in demanding V-Twin applications.
- Higher AH capacity than OEM means more starting capacity before wearing battery down, particularly useful for those stubborn steeds.
- Manufactured by an ISO 9001:2000 registered factory
- Patented Cast-On-Strip (COS) manufacturing technology ensures consistent long battery life.

ULTIMA® 'STANDARD VOLUME' & 'HIGH OUTPUT' OIL PUMPS

ULTIMA® OIL PUMPS

Ultima® now has its own line of oil pumps including the Ultima® Standard Volume (S.V.) Oil Pump, and the Ultima® High Output (H.O.) Oil Pump. Ultima®'s main focus on the development of the oil pumps was consistency. Ultima® pumps are checked on a Coordinate Measuring Machine, and flow tested on a test stand to insure the oil pumps are consistent from one pump to the next, and the motor is getting adequate oil. Ultima®'s S.V. pump performs with similar characteristics of the stock pump for volume and pressure. The H.O. pump has a much greater potential for pressures and volume. Unlike stock oil pumps which won't start feeding the bottom end oil until 2000+ RPM, tests show the H.O. Pump will feed the bottom end at idle speeds, and keep a consistent flow throughout the R.P.M range to keep from floating bottom end bearings. Bottom line, you are getting a precise pump that you can be confident in. Check fitting for Baggers due to master cylinder.

Starter Bolt; 10-32" x 6"

1.4 KW SERIES

- Availible in Black or Chrome
- 6.375" L x 3.5" H x 5.25" W
- Fits all 89/05 model Big Twins with no clearance issues
- Works with OEM battery
- Each Starter is individually tested with data sheet included

1.75KW SERIES

- Great upgrade for stock and 1.4 Kw starters. Made for trouble free starting of most small strokers
- 6.875" L x 3.5" H x 5.25" W
- Fits some stock applications on Big Twins where 3/4" longer body is not a problem.
- Includes manual push button cap on solenoid
- Works with OEM battery
- Each Starter is individually tested with data sheet included

2.0 KW SERIES

- Made for Big Inch engines
- Heavier Clutch Gears
- 8" L x 3.5" H x 5.625" W
- Fits some stock applications on Big Twins where 7/8" longer body is not a problem.
- Fits FLT and Dyna® when used with **89-14** oil filler spacer
- Includes manual push button cap on solenoid
- Requires a 300 amp Battery and good cables for best results
- Each Starter is individually tested with data sheet included

2.4 KW SERIES

- Made to Start anything Big Inch
- Heavier Clutch Gears
- 8.25" L x 3.5" H x 5.625" W
- Includes manual push button cap on solenoid
- Requires a 300 Amp Battery and good cables for best results
- Each Starter is individually tested with data sheet included

Ultima® has continued the standard in Starter performance and value with the Heavy Duty series Thunder Fire starters for 2007 & later model Softail® & Touring models, and 2006 & later Dyna®. These Starters are built with all new parts & tooling. Not Re-manufactured like some of our competitors. Works with OEM battery & individually tested w/data sheet included. We are sure you will agree these are a best value product.

ULTIMA® 2" LATE MODEL PRIMARY BELT DRIVE

The Ultima® 2" Late Model belt drive has been designed to effortlessly transfer the torque & power of even the most brutal high horse power engines. We have taken our time tested & proven technology of clutch drive systems & applied it to this late model belt drive. Designed to fit 06-present Dynas & 07-present Softails® (except Breakout Model), this 2" belt drive will improve the look & performance of your motorcycle without emptying your pocketbook. Distinguishing features include a premium polished 6061-T6 billet aluminum backing plate, high performance Ultima® clutch plates, Ultima® 2" belt & stainless clutch basket inserts to eliminate clutch plate wear on the outer basket. 53T motor pulley & 72T transmission pulley. Not designed for use with mid-controls. Will work with floor-boards although some spacing may be required.

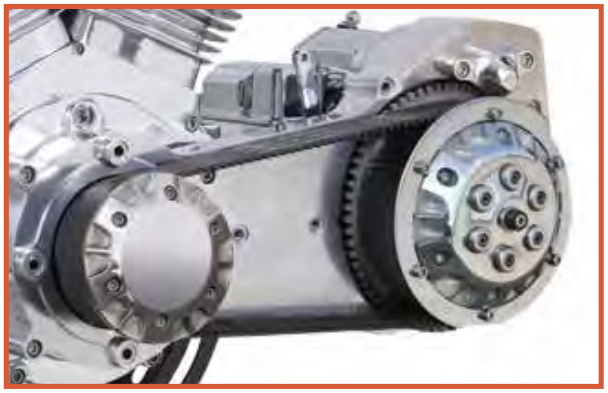

20-8960 2" Late Model Belt Drive Billet Polished.
06'-Present Dyna, 07'-Present Softail®

ULTIMA® 2" EVO & TWIN CAM® SOFTAIL® PRIMARY BELT DRIVE

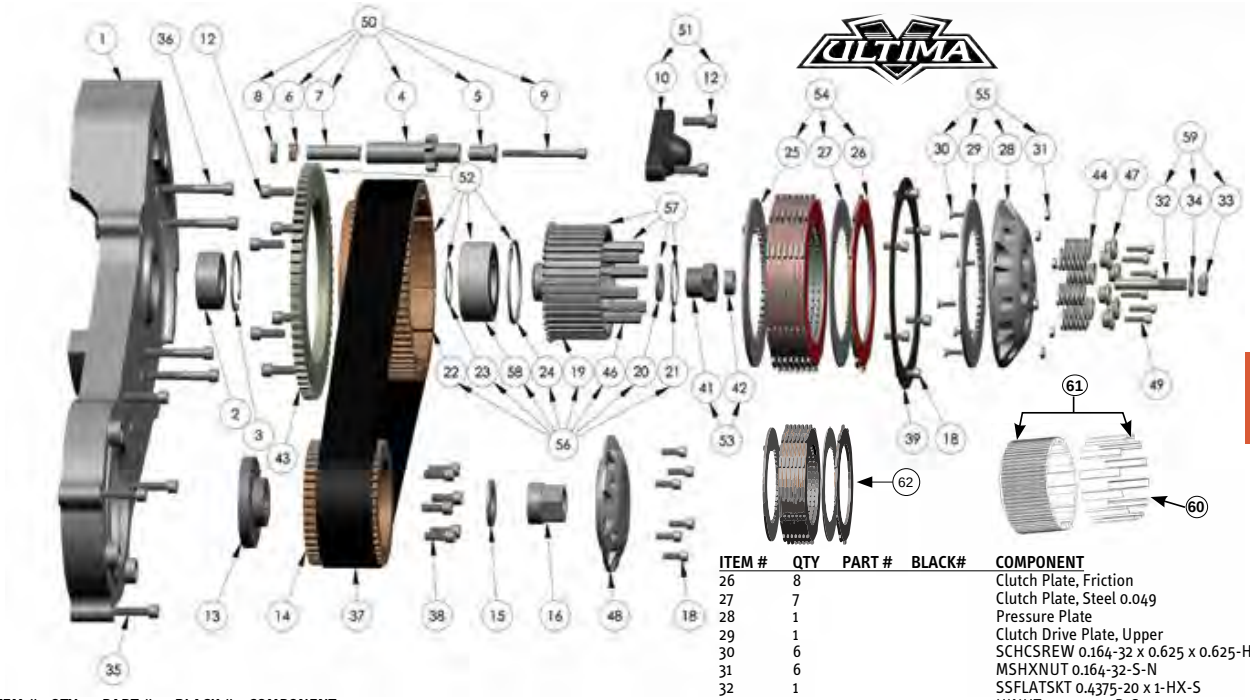

Midwest's commitment to engineering excellence and competitive pricing are very apparent in Ultima's 2" Old School belt drive assembly, where form and function meet. With High Performance Alto clutch plates and a 2" Goodyear belt, this high quality belt drive assembly will surely enhance the look and performance of any American motorcycle. Designed to withstand all the pavement pounding power you can throw at it, and with a more centered weight distribution this belt drive is a textbook example of getting the most "bang for your buck". **For Evo & Twin Cam® Softail® and custom applications.**

ULTIMA DRAG RACE STYLE

20-8946

ULTIMA STREET STYLE

20-8947

7

Ultima's 3.35" belt drive assembly revives the Old School drag race style primary drive at an affordable price. The Drag Race style unit with features like the out board bearing support, extra plate clutch assembly and Goodyear 85mm wide (3.35") belts was designed to handle all the power you can throw at it. If you need to keep some extra cash try out the street version which has all the same features without the added cost of the out board bearing support. The Street units feature the same machining as the Drag Race Style so they can be upgraded with outboard supports anytime. **For Evo & Twin Cam® Softail® and custom applications.**

*Instructions included and available online @ www.ultimaproducts.com.
