JAYBRAKE

J-FL Forward Controls transform the look and feel of your bagger by eliminating the factory floorboards in favor of oversized folding pegs. Retains factory master cylinder and side stand. J-FL fits '97 & up Baggers. J-FL Forward Controls mount to bike with or without a crash bar. Available in chrome or black. Peg Adapter Kits come with H-D-style foot peg clevis adapters and shift / brake pedal adapters having 5/16"-24 threads. Matching grips (pg. 144) & pegs (pg. 138) available.

Peg Adapter

JayBrake's Classic Solid Forward Controls feature an old school design that looks great with all types of bikes ranging from choppers to bobbers. Controls feature adjustable brake & shift levers to create that perfect riding position. 2000 & up controls extend foot reach 2 3/8" forward and 1/2" lower compared to stock. Pre-2000 controls extend foot reach 1" forward and 1" higher compared to stock. Requires a 2000 - 2006 Softail-style kickstand. Peg Adapter Kits come with HD-style foot peg clevis adapters. Foot pegs, shift peg and brake pedal sold separately. Comes w/ banjo bolt J-300-8. Available in polished aluminum, chrome or black. Matching grips (pg. 144) & pegs (pg. 138) available.

2 Button Switch Clamp
See pg. 160

The beauty of STK Hand Controls is that they are designed specifically to work with stock '96 & newer H-D switch housings meaning no additional wiring is required. Two piece bottom clamp design eliminates mounting bolts from being seen. Most OEM style levers will work with STK controls. Right hand master cylinder available in a 9/16" or 11/16" bore to accommodate most brake systems. Banjo bolt will work with #10 or #12 fittings. Comes w/ banjo bolt J-300-816. Available in polished aluminum, chrome or black.

True progressively sized six piston billet aluminum caliper with two distinct looks. Available to fit 11.5", 300mm & 13" rotors. Works w/ OEM ABS systems and provides incredible braking power. Engineered with a six piston differential bore design for optimal performance and pad wear. Dual seal design utilizing a wiper seal for longer seal life. JayBrake logo offset to allow for uninterrupted smooth lines. More compact than JayBrake Classic J-6 Calipers. Direct bolt-on to '00 & up H-D style front lower legs (except Springers). Comes w/ banjo bolt J-300-8.

See pg. 158 for Replacement Brake Pads.

MSRP: Polished Aluminum = \$103.00 / Chrome or Black = \$130.00

(For mounting to rear rotor. *300-425 will need left caliper for left side mounting.)

JayBrake's Tranzbrake is an integrated brake caliper system mounted directly to the transmission. Designed for right side drive transmissions only. Eliminates the need for a rear brake caliper and rotor. Great for showing off custom wheels by eliminating the rear brake setup. Brake system is supplied with 23 tooth sprocket, stainless steel rotor & stainless steel mounting hardware. Billet aluminum housing with integrated brake caliper. Designed for chain drive applications only. No need to change seals or modify transmission in any way. Comes w/ banjo bolt J-300-8. Available in polished aluminum, chrome or black. Hydraulic clutch only application. (JayBrake hydraulic clutch controls are available for both hand and foot applications.)

J-100-44	86 - '90
J-100-45	91 - '02
J-100-46	03 & up

MSRP = \$299.00

Give your motorcycle a unique attitude while stabilizing your feet and isolating vibration. Machined from billet aluminum and topped off with stainless steel studs pressed into the base. Provides secure no slip foot placement in all weather conditions. Utilizes specially engineered elastomer mounts to isolate vibration. Mounts directly onto Traditional & Swept style board. Mounts on both Softail and Touring models. Top surface is satin grained and either chrome plated or black anodized. Available in four design patterns.
