

INDIAN CATALOG 2025

Updated 07.11.25

In 2016, the S&S Cycle R&D team utilized our 60-plus years of racing experience to engineer a winning flat track bike for Indian® Motorcycle. The team introduced the FTR750® race motorcycle to the tracks, raising the bar in flat track racing competition. By 2020, the team had won four championships and made the decision to develop motorcycles for the new “King of the Baggers” road-racing platform and race them for the first time in 2020. After securing several championships in these demanding racing series, the team still continues to push further in advancements. Through racing development, the R&D team at S&S Cycle bring you parts inspired by the race track for your Indian Motorcycle.

EXPERIENCE UNMATCHED POWER AND PERFORMANCE

This isn't your average cruiser engine. The S&S Race Engine for the Indian Challenger is meticulously engineered for the demands of the track. Designed to deliver explosive power and unmatched performance, this engine will transform your Challenger into a dominating force.

FITMENT

- 2020-'24 Indian® Challenger® Models

FEATURES AND BENEFITS

- Enhanced Displacement: Increased displacement, (112ci), for a significant boost in horsepower and torque.
- High-Performance Components: Featuring forged pistons, high-flow CNC ported cylinder heads, a race-tuned camshaft for maximum power output, billet solid adjustable rocker arms, and an STM slipper clutch.
- Improved Reliability: Time-Sert cylinder studs, high performance rod bearings, ARP rod bolts, retained main bearings, improved transmission lubrication.
- Lightweight Construction: Utilizing high-strength, lightweight aluminum clutch and stator covers with improved ground clearance for negotiating tight corners. Lightened and polished crankshaft.
- Race-Proven Technology: Meticulously assembled by S&S/Indian race team engine builders.

NOTE: THIS RACE ENGINE IS DESIGNED FOR TRACK USE ONLY AND IS NOT STREET LEGAL. PROFESSIONAL INSTALLATION AND TUNING ARE RECOMMENDED.

S&S Cycle—Emissions Lab

Commitment to the Powersports Industry is a statement a lot of companies throw around, but don't necessarily deliver on. S&S Cycle has been living up to our commitment by addressing the need for emissions compliancy for more than 35 years. After working with outside labs for a number of years, S&S made an investment in the Powersports Industry by launching our own Emissions Lab in 2007, allowing us to test, validate and certify components for our dealers, our partners, and even our competitors.

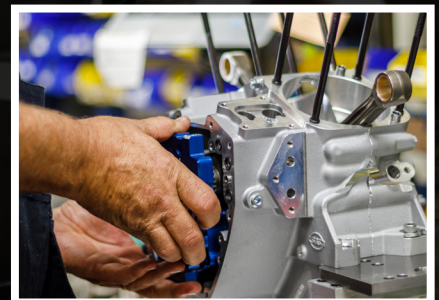

The S&S Emissions Lab is the industry leader in motorcycle emissions testing and consulting services. As a recognized testing facility by the U.S. EPA, California ARB (CARB), and Idiada in Spain, S&S is able to perform all of the testing necessary to show products are in compliance with EPA emission regulations, obtain a CARB EO, or obtain an EU Homologation. Not only does S&S perform emissions testing but we also have the expertise and experience to guide companies through the complete regulatory process to ensure their product meets the Federal emissions requirements, obtain a CARB EO on it, or an EU Homologation.

When we say we are committed to the PowerSports Industry, our actions prove it.

**At S&S Cycle, we pride ourselves
on our dedication to quality
Proven Performance products
proudly **MADE** in the **USA**.**
